We are having very fine weather here and all the crops are looking good excepting the hay crop which is very short on account of the drought in the month of May. As to fruits the peach and apple crops look very good. There will be an almost full crop of peaches while apple will be plenty and of a fine quality. An abundance of all small fruits is expected.

The reciprocity question with Canada will be the means of defeating President Taft, for his second term, as nine out of ten of the agriculturalists are opposed to it.

The York firm employing Guy W. Jacobs is constructing the third plant in the United States to make ice from raw water, all other plants using distilled water. This plant is being built in Indianapolis, Indiana, where Mr. Jacobs has been located for some months, and he will remain there until the plant is in perfect running order.

Martin, after making a tour through many of the wheat growing counties in the state, declares the wheat crop in Pennsylvania will be short—not over sixty-five per cent. of the average. The harvest is more plentiful than the laborers, and yet there are thousands of idlers in the city.

Many farmers are done making hay, and as a rule they report the yield not as good as last year. The perfect weather during the last few days in June and the first eight days in July, made it possible to house the crop in first class order. There will be \$20 dollar hay next year.
