

Comly Independent Candidate.

Reuben T. Comly, of Union township, has filed papers that will put his name on the ballot to be voted on November 7th, as a candidate for county treasurer.

Mr. Comly was a candidate against George G. Fink at the Republican primaries three years ago, and again this year against Prichard, the Phillipsburg Republican, who won out. He is a clean man in politics, and has a large personal following, and may lead Prichard in number of votes cast for treasurer when the ballots are counted.

Round Table Conference.

The Superintendents and Principals of High Schools in Central Pennsylvania will hold a round table conference at Pennsylvania State College, Friday and Saturday of this week.

H. H. Balsb, of Altoona, is president, and W. R. Ham, of State College, is the secretary, and the chairman is S. E. Weber, also of State College.

Gingery Not a Candidate.

D. J. Gingery, has given up the idea to be an independent candidate for sheriff. He is now no doubt convinced that the Democratic chairman did nothing to hinder him in his campaign to secure the nomination for the office of sheriff.

S. S. Brown, the Milroy hotel keeper, attended the Hagerstown, Maryland, fair during several days last week.

Spring Mills, Linden Hall, Boalsburg, Lemont, Potters Mills, and other near-by points will have representatives at the lecture on Saturday evening.

Mr. and Mrs. Thomas Everett, of Madisonburg, were in Centre Hall on business on Tuesday. Mr. Everett is engaged in the mercantile business in Madisonburg, and has the reputation of being a good business man.

Lieutenant E. S. Burkert, of Chicago, Illinois, mention of whose visit to Pennsylvania was made last week, is in Centre Hall. Among others with whom he is spending the time are H. W. Kresmer and Mrs. D. J. Meyer, his cousins.

Make your plans to attend the lecture on Saturday night. Former Governor Glenn is not an ordinary man, you will have few opportunities to hear men of his calibre in Centre Hall outside of those brought here by the lecture course.

Hon. Leonard Rhone went to Harrisburg on Tuesday to meet a number of representatives of the order of Patrons of Husbandry, who are formulating a nation-wide co-operative scheme. Representatives of national reputation were at the conference.

Mrs. Martha Teed and daughter, Miss Lina Teed, of Philadelphia, the mother and sister of Mrs. Samuel W. Moore, of Centre Hall, are at the Moore home, having arrived Tuesday afternoon. Mrs. Teed is seventy-seven years of age, yet greatly enjoyed the trip through the country and mountains.

Based on the expressions of several prominent citizens at Spring Mills, it may be said that the movement to erect a milk condensing plant is progressing. Mr. Oul, representing the Mill Hall plant, was at Spring Mills for several days last week, leaving there on Friday. He expressed himself as hopeful of being able to raise the necessary stock—\$50,000—to make the building of the plant a certainty.

The daily Democrat and Sentinel, published at Lewistown, became nine years of age last week. There are few dailies, outside of the cities, that furnish as much news as the Democrat and Sentinel, or show as progressive a spirit. Its plant is well equipped with linotypes and modern presses, and its facilities for gathering news much above the average country daily. The paper is liberally supported by business men who use its columns continually, and its number of daily readers is also increasing.

Last week reference was made to the fraudulent manner in which newspaper contests are conducted, and that charges had been preferred against the Williamsport postmaster for having permitted the News to circulate through the mails while conducting such a contest. It is now learned that the contest has been termed a lottery and a fraud by the postoffice department. The chief feature complained of was that when the contest was started nine prizes were offered, and later by "combining districts" the number of prizes were reduced.

The special term of court will open Monday, October 30th.

Potatoes, apples and onions wanted—The Howard Creamery Corp.

Preaching services will be held at the Pine Stump school house, Sunday at 3 p. m.

Mrs. Sarah Kerlin is expected home from her trip to Haverhill, Conn., sometime this week.

Mrs. Annie Klinefelter will make public sale of her farm stock, implements, etc., November 23, on the Fleisher farm, near Tusseyville.

James C. Furst, candidate for district attorney, was in Centre Hall this week looking for "second-story" Republicans who might want to vote for him.

J. D. P. Smithgall, who until the Austin flood was principal of the high school in that town, is in Centre Hall at present, his wife and two little children also being here.

Miss Maude Neff, daughter of Mrs. Sadie Neff, of Colyer, is a patient in the Bellefonte hospital, and last week was operated on for appendicitis. Her condition at present is very favorable.

Hunters must wait until November 1st before they can lawfully kill rabbits, turkey, quail, pheasants, and squirrels. Last year the seasons for most of this game opened October 15th.

William Andrew Sinn, right worshipful grand secretary of the Grand Lodge of free and accepted Masons of Pennsylvania, died Tuesday at the Hahnemann Hospital of cancer of the throat.

The Syracuse one-way riding plow will relieve you of much hard work this fall, besides the plowing will be better done than you ever did it with a hand plow—J. H. and S. E. Weber, Centre Hall and Oak Hall Station.

Mrs. James B. Strohm is at the home of her daughter, Mrs. Ammon Burkholder, who just began house-keeping in Phillipsburg, New Jersey. Her son Rufus Strohm and his wife, are due at New York from London this week.

C. P. Long, of the Long Department Store, went to Philadelphia and New York for fall and winter goods. The selection will be larger and more varied than ever. There are always opportunities for bargains at the Long store, keep that in mind.

Mrs. W. O. Resarik, of Lombardy, Kentucky, is among Centre county friends, and is now with her brothers, Frank W. and James L. Decker, east of Centre Hall. She arrived here on Friday, her husband having accompanied her as far as Cincinnati, where he was called on business.

Mrs. Kizzie Swabb is seriously ill at the home of her daughter, Mrs. A. B. Lee, at Tusseyville. Last Sunday all of her children were at her bedside to give what comfort they could. The children are these: Matthew, of Johnstown; Luke M., Monaca; Paul, Farmers Mills; James, Tusseyville; Mrs. E. B. Bower, Bellefonte; Mrs. Ezra Burd, Coburn.

William A. Stover, of Penn township, was a caller at this office on Friday, having come to town to transact a bit of business. Mr. Stover was one of the Democratic candidates for county commissioner, but is not complaining about the results. He is for the ticket to a man, and says a stronger ticket could not have been made; he is a man of honor, and one whom the party may safely trust.

At this season of the year, when the apple crop is being picked and nuts are ripe, more than during any other season of the year, accidents by falling from ladders and trees are reported. George Sechrist, of Millheim, is one of the victims in this class, he having fallen from an apple tree while gathering fruit in the vicinity of Madisonburg. The limb on which he was standing snapped off, causing the man to fall a distance of fifteen or more feet yet without breaking a bone. The bruises were numerous.

Hon. L. Rhone and a party of friends took dinner at an old pavilion in the eastern section of Greens Valley, along the beautiful stream of water flowing almost the whole length of the valley. The State house, occupied by Howard Wells, the warden, was inspected as were also other improvements about the premises, the nursery, etc., and everything was found in good condition. There is much young timber on the state land, and in the course of twenty-five years much of it will be ready to market. Last Thursday was but one of a half dozen days Mr. Rhone spent in the mountains this fall.

Mr. and Mrs. Benjamin Musser, of Excelsior Springs, Missouri, are in Centre county and are having a delightful visit among friends. They are at present guests of the Fishers at Penn Hall, and on Tuesday Mr. and Mrs. Frank M. Fisher were showing them the old familiar sites in Penna Valley from their five passenger car. The Reporter was visited for a few minutes, when Mr. Musser took occasion to say that he never before realized that they had so many good friends in old Pennsylvania until this trip. Mr. Musser is a banker, being president of the Jewel City (Kansas) bank, but as stated above is a resident of Missouri.

Francis Here Again.

State Penitentiary Warden Francis and a party of officials came to Bellefonte Tuesday evening, and Wednesday viewed the several sites in Centre county that are spoken of as favorably located for the proposed pen.

They Have Never Yet Been Made, Even In the Laboratory.

One of the needs of the day is a perfectly spherical steel ball, and yet it has never been made even in the laboratory, much less in the shop for commercial uses. When we consider the importance of ball bearings for automobiles, motorcycles and other machinery the imperfections in steel balls must appeal to all as of the greatest moment. Of course we make pretty good steel balls, which could not have been manufactured a few years ago. So far as the eye can discern, they are perfectly spherical, too, and ordinary measuring instruments will not be able to detect any difference in them, but nevertheless they are not perfectly spherical.

A steel ball for automobile bearings must be perfect within .0001 inch, and they are made even more perfect than this, but mathematical perfection in this respect seems to be almost as illusory as squaring the circle or discovering the perpetual motion machine.

When the steel ball was first used in the bearings of bicycles it was a very imperfect sphere. It was not called upon to bear any great load, and the velocity was not great. At the best the load on it was not more than 200 pounds, and at the rate of sixty miles an hour the revolutions were not more than 720 per minute. Compare that with the load and velocity of the modern ball bearings of automobiles. Frequently the load approximates a thousand pounds and the velocity is anywhere from 800 to 1,200 revolutions. The small steel balls must take the maximum load of the car and pass it on to others without binding or catching. A slight imperfection in any one ball would cause trouble. In fact, it is impossible to use balls with any appreciable variation in size from one another, and the more nearly round they are the better the results.

Steel balls are not only made more perfect in shape than ever before, but they are harder and tougher. As there is a tendency to flake, only special steels can be used in their manufacture, and these tough, hard steels are all the more difficult to work with to secure perfect roundness. The chrome steel, of which most balls for bearings are made, is one of the most difficult of steels to cut or shape, and the work of handling it has developed special tools and machines made of even harder material.

While we have not yet made the perfectly spherical steel ball and perhaps may never succeed, the point of perfection reached is little short of wonderful. The approximately perfect steel ball is a matter of vital importance wherever machines and machinery are made and used. The application of the ball bearing system is extended to new lines of industrial use each year, and builders of all kinds of apparatus are taking advantage of the perfection reached by the manufacturers of these little spheres of tough steel.—Harper's Weekly.

Dancing in Washington's Days.

It was a dancing age. None was too old or too dignified to join in the pastime. We have it on the authority of General Greene that on one occasion Washington danced for three hours without once sitting down. Patrick Henry would close the doors of his office to betake himself to dancing or fiddling, and Jefferson dearly loved to "rosin" his bow for a merry jig. The story is told of him that once when away from home he received news of the burning of his father's house. "Did you save any of my books?" he asked of the slave who brought him the tidings. "No, massa," answered the negro, "but we saved the fiddle."—Maud Wilder Goodwin in "The Colonial Cavalier."

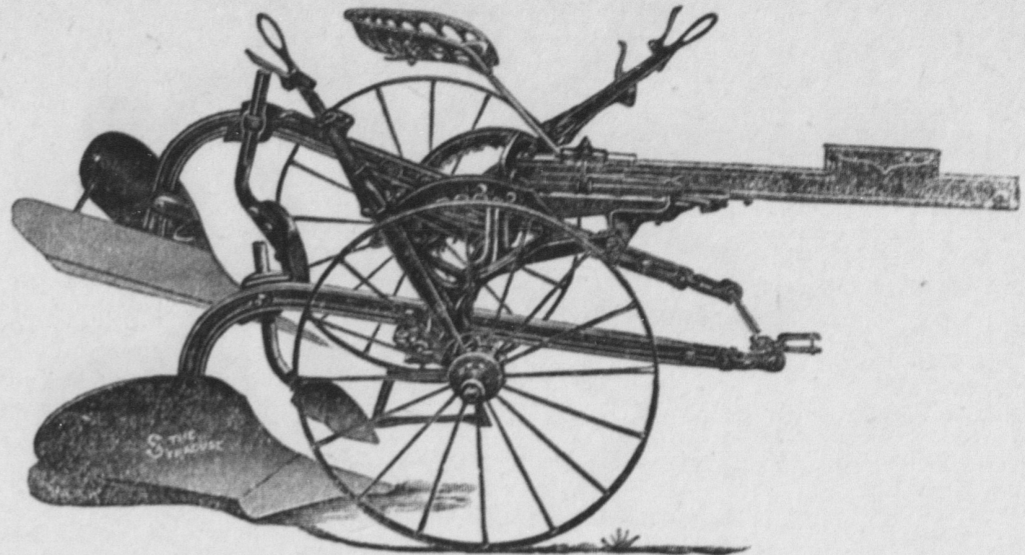

Ten Out of Five.

It was in an ideal seacoast town of Maine, to which they had fled for a lazy two weeks, that they found him, one of those "natives" with a large stock of undeveloped wit. They were out gunning with the native as their guide. A flock of five birds flew over. Raising his gun, he took aim and fired. All five fell to the earth, and they were loud in their praises of his skill. "That ain't nothin'," said he contemptuously. "If I'd had my other gun along I'd 'a' done better than that."—Metropolitan Magazine.

Arrows and Big Guns.

In the days of mailed knights and battleaxes there was safety at a distance of 400 yards. That was about as far as the best archers could shoot an arrow. Neade, a famous archer under Charles I., states that the ordinary range of the bow was between 320 and 400 yards, though it is on record that one man was shot a distance of 463 yards with the wind. Compared with this is the latest naval gun with a range of fifteen miles.

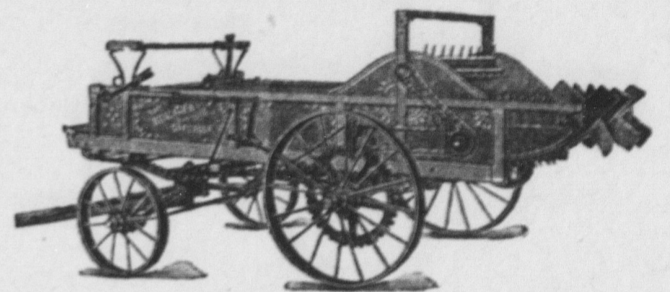

THERE IS NO PLOW SUPERIOR TO THE SYRACUSE RIDING PLOW

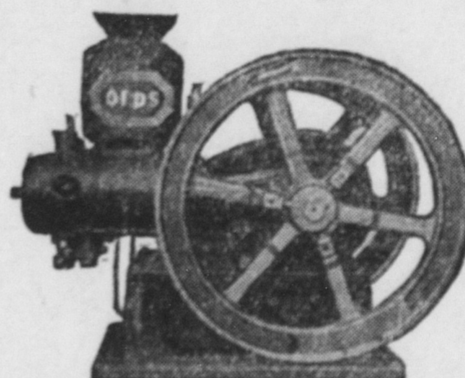

It plows the same depth the whole day long; sticks to the ground in stormy soil; can be well handled on rocky hillsides. It leaves no dead furrows to wash; will throw the soil up hill better than any other plow made; it is strong enough to do its work, yet not clumsy. It is made for two or three horses.

NEW IDEA MANURE SPREADER Does its Work To Perfection

There are many of them in use, and every machine is giving satisfaction. The draft is light, yet no other spreader will do the work as well. The wear and tear has been reduced to the minimum in the New Idea.

THE "OLDS" GASOLINE ENGINES

have many superior qualities. The cut here represents the 4-A Hopper Jacket Engine. From the material that enters into it to the smallest detail, the engine is superior in quality. The Olds engines are built in all sizes. Ask for a descriptive catalog.
