# Chest Pains and Sprains

Sloan's Liniment is an excellent remedy for chest and throat affections. It quickly relieves congestion and inflammation. A few drops in water used as a gargle is antiseptic and healing.

### Here's Proof

"I have used Sloan's Liniment for years and can testify to its wonderful efficiency. I have used it for sore throat, croup, lame back and rheumatism and in every case it gave iostant relief." REBECCA JANE ISAACS, Lucy, Kentucky.

Can Easily Be Made Out of Piece of 2x6, Ripped in Two and Then Nailed Together.

A method for making a cheap bart wire spool is given by a writer in the Homestead as' follows: Take a piece of 2x6 six feet long, and rip it in two and nail the two pieces together in the center to make them like the letter X Then take four pieces about twelve inches long and nail on the ends of

A Barb Wire Spool. these first two pieces, nailing them on crossways, and drive nails in both ends to hold the wire on. Now lay your barb wire out a short distance from the fence, a few feet is pienty, and fasten one end of the wire on the end of one of these twelve-inch pieces and roll the spool along over the wire, and you can take it up as fast as you can walk, as the spool will be as high as a man's head and he can stand up straight to take up the wire, and it can be unrolled just as easily. To unroll wire from the spools on which it comes, take two pieces of 2x4, four feet long, and bore a hole in one end about the size of the holes in the barb wire spool, then take and nail a wide board, or a few narrow boards, about eighteen or twenty inches long, on these 2x4s and have them just a little wider than the spool and nail a narrow board on the opposite end of the 2x4s from the holes. Then take a stick that will go through the holes. put the spool of wire in between and barb wire spool and take hold of the

### WOMEN TO ADOPT AEROPLANE

Helene Dutrieu of France Comes to Fly in America-Never Injured in an Accident, She Says.

At last, after much heralding, the United States is virited by the world's greatest "lady-bird," Mlle, Helene Dutrieu, champion woman aviator of France, where she holds the best records for high and long-distance flying. She arrived on the Le Provence.

"I am so glad to be here for a visit and to do some flying," Mlle. Dutrieu said. "I feel certain that women as vell as men will use flying machines to travel from town to town."

Mile. Dutrieu in 1910 flew 160 kilometers in two hours and forty-five minutes. This year she beat her own record by flying, on September 22, 230 kilometers in two hours and thirty-two minutes. Her highest flight was 800 meters or about 2,640 feet. Before she became an aviator she held the women's bicycle records for time and distance.

Asked if she had ever been hurt, Mlle, Dutrieu said: "Never! Never! I have had three accidents, once falling from a height

ing in a ditch. At Odessa, Russia, I fell into a house, but escaped injury." She believes that married people should not fly singly. If the wife files, her husband should fly with her, committee will have trouble raising or in another machine. "And the man who wants me must catch me in the

air. Ha! ba!" she added. Mile. Dutrien will compete with Mathilde Moisant and Harriet Quimby, American flyers.
