W. C. T. U. RECEPTION

In Grange Arcadia, Friday Night, To Its

New Members Largely Attended. The reception on Friday night, in Grange Arcadia, given by the W. C. T. U. to its new members was a most enjoyable affair. The spirit of the W. C. T. U. and its junior department, L. T. L, is growing, as is attested by the large membership in both organizations, and their activities. The growth of these organizations is, indeed, remarkable, and, like in all communities the best families, no matter what the standard of measurement, are represented. There sat about the board at this reception more than one hundred persons, each one enthusiastic in the cause of the work. The assembly had more of the appearance of a town meeting, with unrestricted admission to the American Boy, than aught else.

The members of the L. T. L. were seated on the rostrum, and the W. C. T. U. members formed the audience The first was a prayer by Rev. S. A. Sayder, then followed a program executed by the little people and directed by Mrs. W. H. Kreamer. Recitations were rendered by Grace Snyder, Frederick Moore, Frank Rearick and Stanford Snyder ; Doretha Snyder sang a Huyett and Doretha Snyder sang a Bosisburg.

The older ones who took part in the p'ogram were Misses Mary Whiteman and Mary Dinges, in a vocal duet, Mrs. L. G. Rearick, Mrs. S. S. Kreamer, Rev. S. A. Snyder, L. G. Rearick. Mrs. T. L. Moore, Mrs. J. H. Puff. Miss Helen Bartholomew, in vocal quartetta; Misses Leila Huyett, Bertha Strohmeier, and Bessie Breon, in piano duets.

A short address by Dr. W. H Schuyler, who reviewed the history of the organization, was a feature.

After the program was completed, refreshments were served, and after that an hour was devoted to social intercourse.

Pennsylvania Free Library.

A new set of books have been received by Progress Grange for the "Pennsylvania Free Library." The lierary will be open every Saturday, at School, at Lock Haven, died Satur-

In planting seedlings on a large scale an instrument of some sort to pack the earth is needed. A stone with a flat face has been long used by foresters, but it has many disadvantages. Keeping these points in view Mr. Ludwig constructed the mallet The mallet is constructed in the ordinary way, except that one end of it is wedge shape, and edged with a piece of steel, which serves to cut away any roots or debris from the hole, and pull the dirt into the hole, to be placed around the roots of the tree which is being planted. "Forest Leaves," published bimonthly by the Pennsylvania Forestry Associaton gives a minute description and an illustration of the mallet.
