**Do Not Repair an Old Wooden Porch**  
 In a few years its props and posts will decay again, through exposure to the weather, and you have the job to do over again. Better tear down the wood structure and build it of concrete—posts, steps, foundation and even the floor. Then you will have an everlasting porch of solid appearance and beautiful design, which is also fire-proof. **Mix a few sacks of**

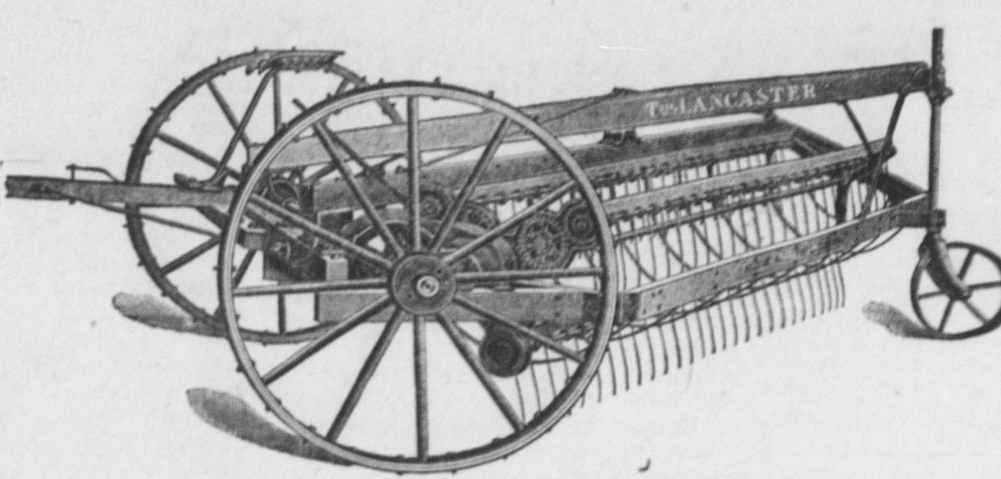

**Universal Portland Cement**  
 with clean sand to make your concrete. It is absolutely uniform in quality and is easily handled. We will gladly show you how to use it in making concrete.

**Attention, Farmers.**

**The "Lancaster" Side-delivery Hay Rake**

The haying season will soon be on, and the Lancaster Side-delivery Hay Rake is a labor saver. It is simple, durable and easily operated. The Lancaster gathers up the hay in a continuous, loose and fluffy windrow, which allows the air to pass through freely. The machine will rake clean the shortest blue grass as well as the heaviest clover and timothy.

**The "Gearless" Hay Loader**

Its name describes it—it is gearless, and has no gears to break, clog up, chains and sprockets to break, run off and cause no end of trouble. The long easy stroke delivers the hay whether heavy or light, on the wagon in better shape without chewing it up, without tearing off the lever or without threshing out the seed as other loaders do.

The GEARLESS Hay Loader is not the cheapest hay loader you can buy but it is the best one. They are worth more than is asked for them.

The GEARLESS does its own loading. It pushes the hay well up onto the wagon; it does not need a watchman to keep it from clogging. The Gearless is sold on its merits, because it never fails to perform the work it is sold to do. The Gearless will pick up and load winrows and haycocks which other machines cannot handle.
