Milking Country Banks, Manager Scherer, of the New York clearing house, testified to many things before the money trust investi- with a cement floor and pit. gating committee that will cause the country banks to sit up and take notice. The clearing house was shown to be composed of fifty New York banks. No bank with a capital stock amounting to less than \$1,000,-000 is eligible to membership. Mr. the country banks and their clients | ter than we do. out of millions. He said that it costs seven cents per \$1,000 to collect the checks of country banks. The clearing house, he said, collects seventy cents per \$1,000 or ten times the real cost. The average charge per day for collections is about \$80,000. It amounts to about \$50,000,000 a year. From this fleecing process the fifty banks comprising the clearing house association extorted sufficient tribute from the country bankers last year to enable each of the fifty New York banks to pay an eight per cent. dividend on their capital stock. Thus it becomes apparent to every fair-minded person why the New York city banks and financial magnates so bitterly opposed the investigation by congress of the money trust.
