The Keystone Gazette makes this reference to the milkmen of Bellefonte: Three Bellefonte dairymen were recently caught in the net of agent Banzhoff, of Altoona, representing the pure food department of Pennsylvania, and as a sequel at a hearing before Justice of the Peace W. H. Musser last Friday morning one of the trio paid a fine of \$50.00 and costs, because both his milk and cream was below the state standard. The two others were each fined \$25.00 and costs for milk below the standard. Agent Banzhoff collected the samples from dairymen in this vicinity during the latter part of May.

BETTER ROADS

State Made C. P. Long Manager of Road Improvements Between Old Fort and Millheim—Work Now Being Done.

The old turnpike between Old Fort and Millheim is being improved under the supervision of the State Highway Department, C. P. Long, the Spring Mills merchant and man of affairs, being the manager and is superintending the improvements.

The first work done was to remove all the loose stones from the roadbed, not by casting them to one side but carting them to convenient places where later they will be crushed and instead of being a nuisance will become of service in road making. The road was divided into sections, and almost before the public knew what was being done, the stones had been removed. In some sections as many as six loads, equal to twelve tons, were gathered within one-half mile. In one day sixty-two nails were picked up by the workmen. In many places the roadways had become the dumps of all kinds of refuse, and it will be seen that the removal of nails, glass, etc., will tend to lessen the risk of driving the highway with horses as well as with automobiles. When it is remembered that the work between the two points named—Old Fort and Millheim—was done within three days, it can readily be seen that the workmen were under good management.

The next work to be done is to properly grade the roadbed, cutting out some breakers and lowering others, filling in short breakers and mud holes. The split-log drag will be used in such places where the work can be done with it, and in some sections the ground washed from the hills causing mud in wet seasons and dust in dry seasons, will be removed. After the road is shaped up, crushed limestone will be used to form a roadbed. It is the intention to crush stone at convenient points along the road, at no too great distance apart, to avoid long hauls. The stone now on the road will be used, and accounted for to those who hauled them there as crushed. Until the available stones on the farms along the route are consumed, there will be no quarrying.

The State Highway Engineers, Messrs. Gephart and Myers, with several others, traveled over the old pike, in company with Mr. Long, in a car last Thursday. Mr. Long was further instructed how to proceed in the road building, and by the time this issue reaches the majority of its readers, several miles of road west of Millheim will have received attention.

Mr. Long is very much interested in the work and is endeavoring to perform his duties in such a manner as will be gratifying to the state, the public, and the land owners adjoining the route being improved.

Musser-Condo.

John F. Musser, of Millheim, and Miss Ella V. Condo, of Spring Mills, were united in marriage, on Saturday, at the home of the bride's sister, Mrs. H. N. Meyer, in Bellefonte, by Rev. W. D. Donat, of Aaronburg. The groom is the senior in the firm of A. C. Musser's Sons, granite dealers, in Millheim, and is one of that town's progressive and energetic citizens. The bride is the daughter of J. C. Condo, the Penn Hall carriage builder, and has been for several years a successful school teacher.

The young couple omitted the wedding trip, and at once went to Millheim where they have already commenced housekeeping. The acquaintances of both bride and groom in the Reporter in extending the best wishes for everything that is good.

An Unusual Bequest.

Among the most eccentric of testators are those who make bequests of their bodies. In 1871 a Mr. Sanborn of Medford, Mass., bequeathed his body to Professor Agassiz and Oliver Wendell Holmes, requesting that it should "be prepared in the most scientific manner known to anatomic science" and placed in the museum at Harvard. He also directed that his skin should be made into two drumheads to be presented to his "friend and patriotic fellow citizen, Warren Simpson," on condition that he beat on them the national air of "Yankee Doodle" at the foot of the monument on Bunker hill at sunrise every 17th of June. On one drumhead was to be inscribed Pope's "Universal Prayer" and on the other the Declaration of Independence.—Exchange.

The Very Best Make.

A commercial traveler remarked the other day to a storekeeper: "Get yourself a cash register. It will keep strict and accurate account of all you receive and all you disburse. It will show what you save and what you squander, what you spend foolishly and what you spend wisely, where you should spread out and where you should retrench, what you waste and how you waste it."

"But," said the storekeeper, "I've already got a cash register which does all that and more."

"Whose make is it?" asked the salesman, frowning.
"God's make," the storekeeper replied, and with a smile at once reverent and grateful he nodded toward his handsome wife seated in the cashier's cage.—Exchange.

A Feet With the Feet.

Place a cork upon the floor. Measure four lengths of your foot from it and, standing at this distance, attempt with one foot to kick the cork over and recover position (both feet together) so that the foot that does the kicking does not touch the floor till it has returned to its mate. The efforts of any one trying to maintain an equilibrium in performing this stunt will arouse considerable mirth.—Woman's World.

That Held Him.

A Yankee clinched his heated argument with an Englishman as to the relative size of the Thames and Mississippi by saying: "Why, look here, mister, there ain't enough water in the whole of the Thames to make a gargle for the mouth of the Mississippi!"

Husbands.

"The majority of husbands complain that their hands are always in their pockets."

"They do, do they? Then why don't they find there the letters they have forgotten to mail for their wives?"—Baltimore American.
