Made the Card Sharp Nervous.

A transatlantic card sharp, returned recently from one of his numerous ocean ferry trips, lamented that he did not have a chance to do business on the liner because he fell in with a judge before whom he had been arraigned for crooked dealing. He said he had sat down with a party in the smoking room on the second day out and had scanned faces to make sure that not a professional was in the lot. The man opposite him was peering at him intently when he glanced across the mahogany. He recognized the judge, and apparently the judge recognized him, but neither mentioned the circumstance. The card sharp got nervous. He was afraid to win, either legitimately or otherwise. He also feared that if he left the table the judge would give him away. So he struggled through the game a loser. He went to the judge the next morning and told him that he had decided not to play any more on the trip, and the judge remarked that it was a very wise resolution.—New York Sun.

Definitions of News.

The city editor of a local paper tells us that he recently tested the intelligence of a bunch of applicants for jobs by giving them a bit of copy paper and requesting them to write thereon a definition of "News." Here are some of the answers that are either very usual or very unusual. "News is what the public will read and pay for without kicking." "News is anything the public ought to know." "News is a report of what happened, not of what ought to happen." "News is anything a paper can print that's new, except (a) new stuff that might start a libel suit, (b) anything that might lose an advertiser, (c) anything that might alienate a bunch of subscribers." This last epigram landed a job for its author. The city editor saw at once that this chap had worked on a paper before.—Cleveland Plain Dealer.

Farmers, Attention
This is the time to make those much needed repairs about the house and barn. Arrange to make them of
Concrete
Cheaper and more Lasting than Wood
I have just received another car of Portland Cement, thus assuring you a fresh article, which is so much appreciated by users of cement, as that stored in warehouse since early Spring is often partly set in the bags when purchased.
I have also two sizes of Crushed Lime Stone, and sharp river sand, especially adapted for cement work. Plans and specifications for concrete work on the farm, may be had free for the asking.
Might be well to look after your chimneys before cold weather sets in. A few brick and a bag of cement may save your home from destruction. I have two grades of brick suitable for the work.
