The election proclamation issued under the election laws by Sheriff A. B. Lee appears in this issue. If you read the proclamation with care, study the ballot diligently, you will learn when to vote, where to vote, and how many officers to vote for, as well as to learn who the candidates are for the various offices to be filled; the standard bearers of the Democratic, Republican, Prohibition, Socialist, Bull Moose, Industrialist, Roosevelt Progressive and Washington parties, and the electors representing each party.

Don't go into the voting booth without first having studied the ballot given in connection with the election proclamation on a sample ballot. Of course, it is a very simple matter to vote, and it is just as easy for anyone, no matter how often he has voted before, to make an error in marking his ballot that will lose to his party one vote. Be careful where you make your X. The Reporter believes the best and safest place for you to make your mark is in the square opposite "Democratic," found on the left hand side of the ballot.

Attention, Farmers

Seeding time is on, and the question of fertilizing will, no doubt, be carefully debated by you. I want to call your attention to the fact that I have in stock ROYSTER FERTILIZERS. If you have failed to place your order in time for fertilizer, or find that you have insufficient for your requirements for Fall seeding, I invite you to give the Royster a trial. I have the goods here and you can drive in at your convenience and get them—the only right way to handle fertilizer. You need not inconvenience yourself by hustling out at a time when you are busy with some other work to get your fertilizer out of a car. When you need the fertilizer, come in, or if you are in town with a team, take some along and save an extra trip.

You will not go wrong on Royster goods; they are founded on Merit and based on Quality. Royster Fertilizers are compounded, not merely mixed. Don't delay; come early.

Oh yes, you no doubt have been thinking of doing some concrete work this Fall yet. In case you do, you will need good cement, for you cannot make good concrete work with poor cement. For all round concrete work the ALPHA PORTLAND CEMENT stands second to none. It will make a good substantial job and color out right. I have sold lots of it and not one sack went wrong. Try it.
