

DEATHS.

John C. Stover, a well-known and representative citizen of Haines township, died Tuesday of last week at the home of his daughter, Mrs. George Weaver, at Aaronsburg, after a lingering illness, aged seventy-seven years, five months and twenty-four days. He was united in marriage, November 5, 1857, to Miss Amelia Hosterman, a daughter of John and Polly (Bower) Hosterman. To this union seven children were born, six of whom survive, viz: Mrs. John A. Grenoll, of Spring Mills; Mrs. E. E. Arderly, of Bellefonte; Mrs. Frank Guisewitz, of Woodward; Mrs. George Weaver, of Aaronsburg; Mrs. T. A. Meyer, of Coburn, and Clymer H., of Lewisport. Funeral services were held Saturday forenoon, conducted by Rev. W. D. Donat, and interment was made in the Reformed cemetery at Aaronsburg.

Mrs. Phoebe Wagner, widow of the late J. D. Wagner, died at the home of her son Wilbur, at Martha, of general infirmities. She was born at Martha, January 16th, 1835, hence was in her seventy-eighth year. She was a member of the Methodist church and enjoyed a wide circle of friends. Her surviving children are as follows: Mrs. John C. Gingery, of Woodward; Mrs. M. Adams, of Bigler; Mrs. Morris Overly, of Clearfield; Mrs. William Smith, of Spring Mills; Mrs. William Richards and J. Wilbur Wagner, of Martha; Mrs. N. Weaver and Mrs. Jennie Isenberg, of Altoona. Twenty-four grand-children and five great grand-children also survive.

William Fearon Robb, son of Mrs. Elizabeth Robb, of Bellefonte, died in a Braddock hospital, aged nineteen years. Interment was made in Bellefonte on Friday. Surviving him are the following brothers and sisters: Mrs. Harry Miller, of Juniata; Mrs. Carrie Graham, of Wilmerding; Arthur, of Braddock; Harry, of Pitcair; Mrs. Harry Muttolf, of Bellefonte; Fred, of Detroit, Mich., and Adaline and Joseph, at home.

William L. Fry, freight agent for the P. R. R., at Harrisburg, died of typhoid fever at his home at that place, aged sixty-one years. He was a son of Jonathan and Catherine Fry, and was born at Aaronsburg, September 19, 1851. His father for a number of years conducted the Pine Creek mills, in lower Penna Valley. He leaves to survive a widow and two children and his mother, who made her home with him.

William C. Wert, born at Houserville, in 1868, died in an Altoona hospital of tetanus. He was employed for many years as a freight conductor for the Penna., but ten years ago became a motorman on the Logan Valley road, and it was while in this service that he received severe injuries to one of his lower limbs, which a week later resulted in his death.

Mrs. Nora McClair, widow of the late Bernard McClair, died in Bellefonte on Wednesday morning of last week, at the age of ninety-three years, one month and twenty-five days. She was born in Ireland. Two sons survive, James A. F. Spangler, and Frank, of Bellefonte.

Linden Hall.

Lloyd Brown lost a valuable horse recently from lock jaw.

Mrs. Nancy McClintock, who had been ill, is very much better.

Mr. and Mrs. John Diehl and son Earl spent a few days with friends at Millmont and Millinburg.

Mr. and Mrs. John F. Zelgler arrived here last week and spent a few days with the latter's brother. They spent Sunday with friends in Boalsburg, returning to their home in Altoona on Monday. They were accompanied to their home by F. E. Wieland, a brother of Mrs. Zelgler.

When Earl Ross came to get his horse and buggy after the play in Boalsburg, neither could be found. On searching Sunday morning the outfit was located about noon on the Calvit Stein farm, in the woods. The horse was fast in a wire fence. Outside of a broken shaft little damage was done.

The freshman class, which entered Pennsylvania State College last September, numbers 657. This new material was prepared for college in 271 public schools and 72 preparatory schools. Of this number 518 were wholly prepared in the public high schools, the four leading ones being North-east manual training high school, Philadelphia, 18; Harrisburg Central, 16; State College, 14; York, 14.

"It is a pleasure to tell you that Chamberlain's Cough Remedy is the best cough medicine I have ever used," writes Mrs. Hugh Campbell, of Luvois, Ga. "I have used it with all my children and the results have been highly satisfactory." For sale by all dealers. adv.

Is Pennsylvania Lagging Behind?

(Continued from first page)

salary. The authorities of the college—and this includes the governor of the state—may feel proud that other colleges of agriculture have looked upon Penn State as a training ground for efficient and capable educators; this is most complimentary to the institution. But the further fact that the college could not hold these men speaks ill of the common sense of the agricultural interests of the state as represented in the legislature.

In the budget referred to it will be noted that there is no specific appropriation for the Experiment Station. Other states, including Illinois and New York, as the figures show, segregate the fund for the Experiment Station from the general appropriation for agricultural education. The new budget asks for no stated amount for the work of the Experiment Station. This is unwise and unfair to the Pennsylvania State Experiment Station. In the matter of fertilizer experiments this station has a record which few others in the country can show. For thirty-one years a series of fertilizer experiments has been conducted on twenty acres of ground, consisting of four tiers of thirty plots each in a rotation of corn, oats, wheat and hay (mixed timothy and clover). While at Illinois there are a few older plots, there is no general experiment on so large a scale to compare with that at the Pennsylvania Experiment Station. The methods of cultivation, seeding and harvesting have followed the methods of ordinary field crops under good cultural conditions. The operations have been performed with as great uniformity as possible, to the end that any variation of yield in the several plots might not be due to differing processes of cultivation, seeding or harvesting. The experiment was designed as a test for the crops named on a clay-loam soil of limestone origin with the following purposes in view:

1. Comparative effect of single fertilizer ingredients.
2. Comparative effect of complete and incomplete fertilizers.
3. Comparative effect of different forms of nitrogen.
4. Comparative effect of different quantities of nitrogen.
5. Commercial fertilizers in comparison with barnyard manure.
6. Effect of lime and plaster as compared with commercial fertilizers and barnyard manure.
7. Effect of lime, ground limestone and plaster.

The results, covering as they do a period of thirty-one years, have been of substantial benefit to the farmers of Pennsylvania. If nothing else had been accomplished the Pennsylvania State Agricultural Experiment Station would deserve liberal support from the state legislature.

In 1901 the attendance at the Pennsylvania State College was 433; in 1905, 749; in 1910, 1417; in 1911, 1803; and this year it has mounted to 2075. Such a live institution needs money, deserves money, and ought to have adequate financial support, provided Pennsylvania pretends to call itself a truly progressive state. The graduate's paper of "needs" closes with this appeal:

"The college cannot go on with a sum less than that asked. It must have the money; or it must close some of the schools; or it must turn away fully one-half the students who apply for admission next year."

If the alumni of Penn State want to do a real service, something that will redound to the prosperity of the institution, that will conduce to the convenience of the faculty and students and of the legislators who control the pursestrings of the state, let them build an interurban trolley connecting State College with the outer world.

REGISTER'S NOTICE.

The following accounts have been examined, passed and filed in the Register's office for the inspection of heirs and legacies, creditors and all others in anywise interested, and will be presented to the Orphans' Court of Centre County for confirmation on Wednesday, the 4th day of December, A. D. 1912.

1. The third and final account of William Trossler, testamentary guardian and trustee of Hattie Meyer, who survives Mary Audrey Meyer, deceased, minor grandchildren of Thomas Meyer, late of Benner township, deceased.
2. The first and partial account of J. C. F. Moir, administrator of M. A. Motz, late of Haines township, deceased.
3. The first and final account of I. T. Ward and J. M. Ward, executors of, etc., of Sarah J. Ward, late of Half Moon township, deceased.
4. The first and final account of Amanda M. Bailey, administratrix of, etc., of William H. Bailey, late of Penn township, deceased.
5. The first and final account of J. M. Cunningham, administrator of Mary Cunningham, late of Bellefonte borough, deceased.
6. The first and final account of C. T. Fryberger, administrator of, etc., of Helen S. Vanduser, deceased.
7. The first and final account of Richard Brooks, administrator of, etc., of James R. Brooks late of Spring township, deceased.
8. The first and final account of W. H. Muser, executor of, etc., of James Rick, late of Union township, deceased.
9. The first and final account of W. W. Jamison, administrator of, etc., of Sarah Grim, late of Gregg township, deceased.
10. The first and partial account of John K. Fryberger and Mary Jane Haworth, executor and executrix of George W. Haworth, late of Philipsburg borough, deceased.
11. The first and final account of John L. Holmes, executor of, etc., of Mary E. Sumner, man, late of State College borough, deceased.
12. The first and final account of Ezra H. Auman and Catherine Auman, administrator and administratrix of John S. Auman, late of Potter township, deceased, as died by Ezra H. Auman.
13. First and partial account of Dr. P. S. Fisher, executor, under the late will and testament of Mary E. Dunkle, late of Walker township, deceased.
14. First and final account of Sarah Ellen Gutzel, executrix under the will of Henry Gutzel, late of Spring township, deceased.

This is deer hunting season.

SHAKESPEARE'S WIFE.

And the Interlined Bequest in the Poet's Last Testament.

Obscure as are nearly all the points in Shakespeare's life, it is known that his wife's maiden name was Anne Hathaway and that her father was a substantial yeoman at a village near Stratford-on-Avon. Shakespeare was barely nineteen, while Anne was twenty-six years old, when they married. The marriage bond, one of the few papers connected with Shakespeare's life, is dated November, 1582. Little is known of their domestic life.

One circumstance that seems to tell against any strong affection on the part of Shakespeare is that he drew his will—or some one drew it for him—without mentioning the wife, and then a few words interlined gave the item, "I give unto my wife my second best bed, with the furniture." This interlined bequest has been taken by some as a proof that in making his will he had forgotten her, only to remember her by a slighting bequest.

On the other hand, it has been pointed out that Mrs. Shakespeare would by law have a third of her husband's possessions, and for that reason there would be less occasion to remember her with special gifts of affection.

She died on Aug. 6, 1623, and was buried two days later in Stratford church. At death she was sixty-seven years old. Shakespeare died at the age of fifty-two years.

LEARNED THE LESSON.

Then the Igorrotes Spread the Glad Greeting Broadcast.

Some experiences of the first days of schoolteaching in the Philippines are described by Alice M. Kelly in the Manila Times. She went among the Igorrotes in November, 1901, so that she can really be considered a veteran.

The natives were frightened at the sight of an American woman, and not even prized dainties like sardines could bring them to her. They spoke no English or Spanish, and she had not a word of Igorrote.

But she resolved to break this silence, and, catching one old man who could not run, she repeated over and over again, "Good morning, Mrs. Kelly," till at last, to escape, he repeated the words after her. Not long after she heard that Americans were being greeted, regardless of sex, with a cheery "Good morning, Mrs. Kelly." And, oddest of all, in a courtroom several Igorrotes solemnly walked up to the judges' bench and, bowing deeply, said, "Good morning, Mrs. Kelly," evidently well satisfied that they had done the correct thing.

The school which Mrs. Kelly founded has become the Bas school.

Finding New Friends.

Suppose a new friendship enters into your life. If the man or woman is worth anything to you they ought to be worth a great deal. They ought to make you more complex, more sympathetic with the great mankind. One knows—he is a poor person who does not—how delightful the first rush of feeling is, when as yet we only hope we have found another friend, another soul which can touch ours. Old things become new. It is like dew upon a thirsty meadow. Fresh faculties are developed. A fresh eagerness seizes upon the old. We look forward to exploring a new soul as men who have found a new continent—Frances E. Willard.

Handling a Rifle.

The rifle for rapid firing should have shotgun weight, shotgun balance, shot gun trigger pull, shotgun fit and the sights must be such as can be caught instantly without effort in alignment. The hands grasp the piece firmly, not with the rifleman's loose grip, but the left arm pushes forward while the right draws back, and the trigger is pulled by transferring the drawing back force to the trigger finger and not by any conscious crooking of that finger. The moment the bead covers the mark the bullet must be under way, be the aim good or bad.—Outing.

His Best Friend.

Many great writers besides Cicero and Emerson have written on friendship, but it may be doubted whether any essayist had a more definite idea than a small boy who was recently asked what he meant by "best friend." "My best friend," he replied, "is a person who knows me and yet likes me."—Collier's.

Both Punished.

"Pop!" "Yes, my son." "In olden times a woman who was a common scold was punished, wasn't she?" "Yes, my son. So was the man she married."—Yonkers Statesman.

Great Success.

Clara—Isn't it perfectly lovely—this higher education of women? Dora—Why? Clara—The paper says 80 per cent of the Vassar college graduates get married.—New York Weekly.

A Real Gentleman.

"One gentlemanly thing about a dentist," remarked the man on the car, "is that he never rubs it in by saying, 'This hurts me more than it does you.'"—Toledo Blade.

Premature Joy.

"Well, well, well! I'm certainly glad I met you!" "I'm sorry, old man, but I gave my last dollar to my wife just before I left home."—Houston Post.

Centre Reporter, \$1 per year.

The greater portion of the corn crop in Penna and Brush Valleys is bucked and in the cribs. Much of the fodder remains in the fields, but within ten days most of the fields will have been cleaned up.

Don't waste your money buying strengthening plasters. Chamberlain's Liniment is cheaper and better. Dampen a piece of flannel with it and bind it over the affected parts and it will relieve the pain and soreness. For sale by all dealers. adv.

Wall Plaster

A limited quantity of wall plaster, first quality in every respect, and admitting of the addition of two parts sand, is offered for sale by

C. D. BARTHOLOMEW and S. W. SMITH, Centre Hall

The Genuine DOMESTIC

Shipped Prepaid. Satisfaction Guaranteed. Direct From Factory. On Approval. The kind your grandmother used. Over 100 years ago now in use. Two machines in one—both lockstitch and chain stitch. Latest model—all newest improvements. 15 Days' Free Trial. No deposit, nothing down—no obligation. You need not pay a cent until you have tried your machine 15 days. Your choice of terms. Cash after trial or easy payments as low as \$1.00 per week. Sew 25 years monthly. 25-Year Guarantee. Sewed by our \$1,000,000 corporation, given with every machine. The most liberal sewing machine guarantee ever offered. WRITE NOW for Domestic Book and full particulars of this great offer. A special will bring in 25¢ by return mail. DOMESTIC SEWING MACHINE CO., Dept. 8200, CHICAGO

Sucrene Dairy Feed

The Most Nourishing Feed for Cows

The Biggest Producer of Milk

The Most Economical to Feed

A thousand scientists are experimenting every day with a thousand different phases of the Feed-for-Milk problem. There is just one judge to whom they refer their elaborate theories and by her decision the theories stand or fall—THEY PUT IT UP TO THE COW.

That's what has been done in developing "Sucrene" Dairy Feed at every stage of its evolution—every time an improvement was made in the formula, that was done.

"Sucrene" is not a theoretically balanced ration—to most feeders that means only digestible protein, fat and carbohydrates in proper proportions, but that's only the beginning. It takes more than that just to build the animal—it takes phosphorus for brain and bone and nerve—it takes lime to make a frame work that will carry a strong and efficient body, and it takes both lime and phosphorus to make milk.

But a scientifically balanced, highly digestible ration isn't enough—it's got to be appetizing, and that's what the "Sucrene," the sugar part of Sucrene Dairy Feed does—it makes the cow enjoy eating and she digests her food all the better because she has a good taste in her mouth.

A trial will convince you that Sucrene Dairy

Feed is a profit maker for your herd.
