Editor of the Reporter:

The year 1912 has passed which necessitates a change of figures on the Reporter's label, and for that change I herewith inclose you a money order.

Our winter so far has been mild. The temperature for December 1912, averaged at the noon hour, 35 degrees above zero, and the grand average for the year was 51.5 above zero.

Yours truly, HENRY DASHER.

ALTER ELECTED SPEAKER.

Five Ballots Required—Gerberich President Protom of Senate.

The upper and lower house of the state legislature elected their officers without the usual party caucus, and as a result George E. Alter, of Allegheny, who styles himself a Progressive Republican, was elected speaker of the house on the fifth ballot.

The speakership contest developed few surprises on the floor. The Alter strength at the outset was somewhat dissipated by the nomination of several candidates to divide the Progressives, who had been counted on to swell his vote close to a majority at the outset.

Philadelphia's Independents at first delayed the Alter movement, and then hastened it, Frank Gray being the first to break the ice in that direction on the third ballot.

Dr. Daniel P. Gerberich, of Lebanon, was elected president protom of the senate on the second ballot.

On the first ballot, when Gerberich fell short of the necessary twenty-six votes for election, the division was Gerberich, 24; Francis S. McIlhenny, of Philadelphia, Independent Republican, 12; Edwin M. Herbst, of Berks, Democrat, 13.

LOCALS

The postoffice department writes it "U. S. Parcel Post," so we will have to follow and omit the plural form of parcel.

When there is an inch of snow the crossings are cleaned, but two inches of mud fall to attract much attention from those whose duty it is to perform such work.

George Earhart, of Old Fort, one of the auditors of Potter township, was a caller at this office, one day this week, to transact business pertaining to his position as auditor.

The parcel post division of the mail department is being liberally patronized locally. The packages mailed contained a great variety of goods—from umbrellas to beans.

If the Clearfield Syndicate comes into possession of the Bellefonte Electric light plant, it is thought the chances for a trolley line between Bellefonte and State College will be enhanced.

Optical Illusions.

Professor Stirling explained a variety of optical illusions, including the after effects of seen movements and entasis or convexity in curvature.

In dealing with colored shadows Professor Stirling demonstrated the great difficulties that occasionally beset the designers of dress materials.

Concerning the superstitions that are rife in Nigeria, Africa, a traveler says: "The bird which flies in at your open door in the sunlight, the bat which circles round you at night, the small bush beasts which cross your path while hunting, all may be familiars of witch or wizard or even the latter themselves disguised to do you hurt.

The hunter of the old school, who lives among the foothills of the Alleghenies, was teased into making a wager of \$10 that his antiquated gun would shoot a bullet through a railroad cross-tie.

The bet was to be decided in the lumber yard back of the depot. The old hunter arrived at that place in advance of the others.

They Don't Remain Soft Very Long After the Sheddling. The supply of soft crabs for market is obtained by catching hard crabs and keeping them until they shed their shells.

For this purpose large rectangular floats, made of laths and planking, are employed, and three or four times every day the stock on hand is carefully inspected, all the soft crabs being picked out and packed without delay.

SOFT SHELL CRABS.

They Don't Remain Soft Very Long After the Sheddling. The supply of soft crabs for market is obtained by catching hard crabs and keeping them until they shed their shells.

For this purpose large rectangular floats, made of laths and planking, are employed, and three or four times every day the stock on hand is carefully inspected, all the soft crabs being picked out and packed without delay.

When the packing is done carefully the occupants may be kept alive from sixty to seventy hours after leaving the water.

Crabs have been shipped all the way from the Chesapeake to Canada, arriving at their destination in good condition. In summer, of course, ice is used.

But where soft crabs are concerned it is necessary that they shall reach the market quickly, because their new shells harden with great rapidity.

At the end of twelve hours the shells are like parchment, and in three or four days the crab is as hard as ever—hence unfit for use in the form most highly approved by epicures.—New York Herald.

Laundry goes out next Wednesday.

A calendar put out by the American Book Company gives a diagram showing that as much money is spent in the United States for sporting goods as is spent for school books.

A Lucky Home Run.

"The funniest home run that ever my peepers were laid on," said an old time player during a fanning bee, "happened in Chicago some years ago. The Athletics were playing the Sox, and it was on the old grounds. One of our fellows, I can't just recall his name now, whaled one in the air out where Danny Green held forth.

Now, the score board was there, with a platform in front of it. The ball hit the platform, and, by gosh, it stuck up there. Danny waited for the ball to come down, while the hitter was sneaking around the bases. After he waited about a few seconds and the ball didn't come down to earth Danny sneaked up the ladder that ran up the platform and started to get the ball.

Immensity of the Swiss Glaciers. The glaciers united to form the great Gornier glacier above Zermatt have a width of ten miles. Soon after they have joined the width is reduced to two miles and farther on to one mile.

The Bread of Mexico. Tortilla is the universal substitute for bread in Mexico. It is a flat cake made of coarse cornmeal and baked on a hot sheet of iron or a slab of stone.

The Two Ways. A hunter of the old school, who lives among the foothills of the Alleghenies, was teased into making a wager of \$10 that his antiquated gun would shoot a bullet through a railroad cross-tie.

Deadly Snakes. The deadliest of snakes is said to be the mamba, an African cobra. It flies at everybody and everything; it goes out of its way to quarrel; it will even come down from a tree to solicit an interview.

August and July. "August," the name of the month, is accented on the first syllable. "August," the adjective, is accented on the second syllable.
