

**GET THIS FOR COLDS**  
Prescription for Positive Results  
Don't Experiment.

"From your druggist get two ounces of Glycerine and half an ounce of Globe Pine Compound (Concentrated Pine). Take these two ingredients home and put them into a half pint of good whiskey. Shake well. Take one to two teaspoonsful after each meal and at bed time. Smaller doses to children according to age." This is said to be the quickest cough and cold cure known to the medical profession. Be sure to get only the genuine Globe Pine Compound (Concentrated Pine). Each half ounce bottle comes in a tin screw-top sealed case. If your druggist is out of stock he will quickly get it from his wholesale house. Don't fool with uncertain mixtures. It is risky. Local druggists say that for the past six years this has had a wonderful demand. Published by the Globe Pharmaceutical Laboratories of Chicago.

**Problem in Physics.**  
A native of T., on the coast of Scotland, when the contract for the building of the first three steamers fitted with electric lights at the local shipyard was completed, formed one of the social party gathered to entertain the electricians, says Ideas. In a burst of candor and comradeship, he was heard to say to one of the wiremen:

"Mon, Peter, efter workin' w' you on they boats, I believe I could put in the electric licht masel', but there's only one thing that bates me."  
"Aye, aye, Sandy, what is that?" Inquired his interested friend, willing to help him if it lay in his power.  
"Weel, mon," replied Sandy, "it's juist this: I dinna ken hoo yet get the lie tae rin along the wires."

**Shopper's Cramp.**  
Simeon Ford, a diner of hotel men in New York, discussed a new disease.

"There's a new disease called shopper's cramp," he said. "It appears early in December, becomes violently epidemic about the middle of the month and ends suddenly on the evening of the 24th."  
"Women feel shopper's cramp in the arms, the limbs, everywhere; but it attacks the husband only in one place—the pocket."

**Balanced.**  
Representative Pujo was talking in Washington about the currency.  
"It must balance," he said. "It must balance automatically and delicately. It must resemble the Christmas husband."

"Oh, John, dear," said this chap's wife, "I'm so sorry you've got all those heavy parcels to carry!"  
"Well, you see," John panted, reassuringly, "my pocket is very much lighter now."

**Our Discontent.**  
Brand Whitlock, the mayor of Toledo, was talking about discontent. "It is our discontent, our divine discontent," he said, "that will make a great nation of us."  
"I believe in discontent. I can sympathize even with the discontented old farmer, who said:

"Contented? When'll I be contented? Well, I'll be contented when I own all the land adjoinin' mine—and not befor, be gum!"

**Self-Appreciation.**  
"How do you know your speech made such a profound impression?" asked the doubting friend. "There wasn't very much cheering?"  
"That's just the point," replied Senator Sorghum. "I am one of the orators to whom my constituents would rather listen than hear themselves applaud."

**Stragglers Along.**  
"Is that a monthly rose?"  
"It looks more like a weakly one to me."

**Its Class.**  
"That was a raw deal."  
"What was?"  
"The plot they cooked up."

A ragtime philosopher says that lemons are only fit to hand to people.

**Substantial Breakfast Pleasure**  
in every package of

Owing to an epidemic of measles, Hillside public school, near Lionville, was closed.

At a meeting of the Doylestown School Board the resignation of Miss Mabel McCullough was accepted.

Miss Ethel Turner, a Chester High School student, was tendered a souvenir post-card shower in celebration of her fourteenth birthday.

The records in the court house at West Chester run back for 200 years, and in that period, to date, 23,629 wills have been probated and put on record.

Mr. and Mrs. William H. Lindley, of West Chester, have presented a silver pitcher to the Pioneer Corps in that town.

A clinic and dispensary for the free treatment of babies and younger children, as well as the instruction of mothers, will be opened in the Chester Hospital.

John F. Steidle, of East Mauch Chunk, a Jersey Central Railroad conductor, was instantly killed by stepping immediately in front of a passenger train.

Poking into underbrush with the butt end of his shotgun may prove fatal for fourteen-year-old Ralph Geist of Etnaus, while on a hunting trip for muskrats.

Charles D. Carr, of Kingston Methodist Sunday school, has a record of attending Sunday school every Sunday for the last twenty years without missing a Sunday.

The Horsham Friends' Association, which was the first of the denomination to take up woman suffrage work, was addressed at its meeting by Mrs. Paschal Coggins of Philadelphia.

Mayor J. T. Dillon, of Titusville, was a visitor in Corry and was cordially welcomed. Mayor Dillon when a boy served an apprenticeship as a machinist with the Gibbs-Sterrett Manufacturing Company in Corry.

Chester's Common Council has conceded the illegality of the closing of Tighman street, from Delaware avenue to the Delaware river, and a defect in the ordinance will be eliminated under a new bill.

The Bucks County Commissioners have directed suit to be entered against the Trenton, Bristol & Philadelphia Street Railway Company for the recovery of \$1,000, one-half of the extra expense on the Crocydon bridge.

Clarence Lee, a boy 12 years old, who turned in a fire alarm from a street box in West Chester, when arrested and lodged temporarily in the House of Detention, said that he committed the act "in fun."

W. T. Kennedy, of Uniontown, has been appointed aide-de-camp on the staff of Thomas H. Cole, of Erie, Department Commander of the Pennsylvania G. A. R. Mr. Kennedy is president of the Fayette County Veterans' Association.

For stabbing a man in the back with a knife on the street in Phoenixville, George Petyo has been sentenced by Judge Hemphill, at West Chester, to pay a fine of \$100 and serve not more than seven years and not less than four years in the penitentiary.

H. P. Barnard has resigned as superintendent of the open-hearth department of the Bethlehem Steel Works, and has been succeeded by W. H. Bischoff, C. R. Ellicott succeeding Mr. Bischoff.

The tavern license for the Forest Inn, a noted hostelry near Stemlersville, Carbon County, and for many years conducted by F. F. Seiberling, was this week transferred to Harry Epstein, of Reading.

Daniel Toosic, an employe of the Crane Iron Company at Catasauqua, had a narrow escape from death when he was caught in a slide and buried under several tons of iron ore. Fellow-workmen managed to save him, although he was badly crushed.

A tiny owl perched on a tree in the public square at Wilkes-Barre caused consternation among the sparrows roosting there, 2,000 or more hurriedly leaving the tree to the intruder.

Valley township, Armstrong county, has a remarkable record for the year 1912. During the past 12 months not one person has died in that township. Some who have lived there have died in other places. It is doubtful whether a similar record in a district of several hundred people can be equaled in this State.

**HOTBED IS VERY IMPORTANT**

Best Location Is on South Side of Building for Protection—Provide Fall for Rains.

(By J. W. GRIFFIN.)  
The hotbed is a very important part of a well-kept garden. It lengthens the season in which we may supply our tables with fresh vegetables.

A bed that is 12 feet long and 6 feet wide will accommodate four regular-sized sashes, 3x6 feet. In this bed we have 48 squares of space, which is sufficient to grow the plants for a good-sized garden. A garden, three or four hotbeds and some cold-frames is a good start toward successful truck farming.

The best location for the hotbed is on the south side of the building, a high, tight board fence, or one protected by a heavy growth of evergreens for a windbreak.

The site should be a little higher than the surrounding surface so that good drainage may be secured. Make an excavation a little wider and a little longer than the bed is to be.

The inside dimensions for a bed 6 feet wide and 12 feet long will be 6 feet 4 inches wide, and 12 feet 4 inches long. The excavation should be about 2 feet deep. The opening should be boarded up with 2-inch stuff for keeping out the mice and moles. Where possible, the beds should face southeast, or directly east.

The back of the frame should be 16 inches, and the front about 8 inches high. This gives sufficient fall for water from rains or snows to drain off nicely, and the rays of sunshine will have better opportunity to get at the small seedlings.

The preparation of the manure is not such a particular job as is generally supposed, but the simple principle involved is not generally known.

The yeast fungus, when once introduced into a manure-heap suitable to its development, spreads rapidly, and soon has the whole mass in a state of heat.

Horse manure is the best, especially when the horse has been fed on rich foods, such as grain, bran and oilmeal. The bulk of the manure should be urine-soaked straw, that which has served as bedding in the stalls. Forest leaves, when mixed with straw, make a heat that is most powerful and lasting.

The manure should be hauled directly from the stalls to the beds, and piled in a conical heap, leaving it until fermentation has set up.

Before fermentation becomes too lively, which is ascertained by the escaping steam, the pile should be forked over into another part of the frame and left over until the escape of steam is again noticeable, then it should be tramped into the frame perfectly solid.

If the manure is very hot, the soil should be put on at once, but if not, the sash should be placed over the manure for a few days, until the manure is well heated, then the soil put on.

The bed should be watched, and as soon as the seeds of weeds which are in the soil begin to come up all over the bed, it is time to plant the garden seed.

Do not neglect the ventilation, as the bed will get very warm on sunny days, at which time the sash should be opened a little at the top, and be careful that no direct draft reaches the tender plants.

A covering of old carpet or matting is good to place over the sash during cold nights, and during the day, when there is much sunshine. The frames should be closed before nightfall, especially on cloudy afternoons, and they should have manure banked up around them during the cold spells.

As soon as the plants are two or three inches tall, they should be transplanted to the cold frames which are not unlike the hotbeds, except that they have no bottom heat, and are covered with muslin to keep off the chill and frost.

**Green Feeds Year Around.**  
There is nothing better than well cured clover grown or second growth clover hay, writes J. F. Schureman, United States department of agriculture. This should be cut up fine and steamed. Clover is not only highly nitrogenous, but rich in lime, a substance required by the hens for providing shells for the eggs.

Aside from the alfalfa there is no other food that can take the place of clover. By allowing a ration of scalded clover to hens they will keep in better laying condition and the production of eggs will be increased. Where clover hay cannot be secured, bran is a very good substitute, though not so rich in mineral matter.

Vegetable food should be supplied the year around, such as cabbage, potatoes, beets and turnips.

**Attention to Horseshoes.**  
Keep the horseshoes well tightened on the hoofs now, as this is the time of year they are most frequently lost by being loosened in the mud or snow or because of long usage. They are too high-priced to be lost, and, besides, a loose shoe injures the hoof and is a hindrance to the animal in travel.

**ECONOMY IN GROUND GRAIN**

Enables Animal to Take Food Into Stomach in State of Ready and Thorough Digestion.

(By R. G. WEATHERSTONE.)  
Where food is ground before being fed, we are sure that the animal takes the food into its body in a state which will admit of a ready and thorough digestion and assimilation, while whole-grain rations often are but slightly chewed, swallowed and pass through the animal in that unchanged form.

This means not only a great waste of food, but also that it furnishes very little nutrition for the upbuilding of bone and muscular tissue. A feed-grinder soon pays for itself, especially in the winter, by avoiding any waste

of grain and in promoting good health and rapid development among the live stock.

Companies using a large number of horses have found chopped and ground feeding both better and more economical. Corn, oats and other grains as rations for horses are used ground, and mixing the ground grain with moistened, chopped hay has proved to be a more economical stable regimen than feeding whole grain and uncut hay and roughage.

Chopped stover and all ground grain minimize the labor of mastication and assist easy assimilation of food nutrients. While it may not be always practical on the farm to provide chopped rations for horses, better results will be achieved by feeding grain rations, with but little hay at the noon meal and watering the animals before the midday meal. The use of a feed-grinder will pay big.

**PROPER CULTURE OF CLOVER**  
Best Results Have Been Obtained on Black, Sandy Loam—Killing Danger Is in Spring.

My best results in clover growing have been on a black, sandy loam. So far I have grown exclusively the medium or common red clover, says a writer in the New England Homestead. I usually sow from eight to twelve pounds per acre on a well-prepared seed bed. I prefer sowing with a nurse crop. Wheat and barley both have been tried for this purpose. I prefer barley, as it does not form such a dense shade for the young clover plants when they are starting. The crop of clover grows rapidly, and cutting begins about July 4 in this locality, and sometimes a little earlier in the fields where clover is without any other grasses, and sometimes a little later if timothy and clover are mixed.

Clover is not grown to any great extent in this locality. The past two seasons have not been the best to secure a stand. The real danger of clover-killing comes in the spring. When it freezes and thaws out, and the ground heaves the plants are torn loose and die. Whenever the snow collects it comes in fine shape in the spring. With the continued cultivation of this soil and with a large amount of manure worked into the soil will come better clover-raising in this part of the state.

**HORTICULTURAL NOTES**  
Fill up those vacant spaces in the orchard with some good fruit trees. It is never too late to start in the fruit business, enough at least for the home supply.  
Good, young apple trees come high, but the poor ones are dearer than any other kind.  
There will be a very heavy demand for trees next spring, and late orders will certainly be unfilled.  
Five feet apart is about the right distance for the currant and gooseberry bushes. Do not crowd.  
If you want a fine, early yellow peach, put two or three Triumph trees in your next nursery order.  
Wood ashes are valuable to spread around fruit trees for small fruits and vegetables; they should not be wasted.  
The root louse often causes apple scab, and ashes or lime around the trunk will stop the ravages of the root louse.  
Expert orchardists recommend seeding the orchard to crimson clover—or rye to be plowed down the following spring.  
While apples do not rank high as pig feed it is best to give them to the pigs rather than to let them rot under the trees.  
The peach makes a good stock for some variety of plum. It has a larger and stronger root system than most plum varieties.  
The climate and conditions that are best for the apple are best for the human family. Both thrive best in the temperate zone.  
In heeling in trees remember to cover the tops as well as the roots. Rabbits can bark heeled-in trees as easily as those planted in the orchard.

**Doubly Glad is the Man Who Smokes**

*Liggett & Myers*  
**Duke's Mixture**

Glad to smoke this pure old Virginia and North Carolina bright leaf—with its natural tobacco taste. Aged and stemmed and then granulated. Tucks quickly in the pipe—rolls easily into a cigarette.

With each sack a book of cigarette papers FREE.

And smokers are glad to get the free present coupons enclosed in each 5c sack. These coupons are good for a great variety of pleasing articles—cameras, talking machines, balls, skates, safety razors, china, furniture, toilet articles, etc. Many things that will delight old or young.

As a special offer, during January and February only, we will send our new illustrated catalog of these presents FREE. Just send us your name and address on a postal. In every sack of Liggett & Myers Duke's Mixture is one and a half ounces of splendid tobacco and a free present coupon.

Coupons from Duke's Mixture may be assorted with tags from HORSE SHOE, J.T. TINSLEY'S NATURAL LEAF, GRANGER TWIST, and coupons from FOUR ROSES, 10-10 Double Coupon, PICK PLUG CUT, FIED, MONT CIGARETTES, CLIX CIGARETTES, and other tags or coupons issued by us.

Premium Dept.  
*Liggett & Myers Tobacco Co.*  
St. Louis, Mo.

**Pleasing Sounds.**  
"What is more delightful than the careless prattle of a child?" asked the fond father.  
"Have you ever heard the rattle of a train for which you had been waiting nine hours at a lonely little station 750 miles from home?" replied the traveling man.

**Unusual.**  
"A candiemaker combines extremes."  
"How so?"  
His business is both cereous and light."

**The Distinction.**  
"I'd marry a man not of words, but of deeds."  
"So would I, if they were title deeds."

**TO DRIVE OUT MALARIA**  
AND BUILD UP THE SYSTEM  
Take the Old Standard GRIFFIN TASTELESS CHILL TONIC. You know what you are taking from the best, sitting in draughts, feverish condition, etc. 50c, 75c and 1.00 per bottle at medicine stores. Adv.

**Black Record.**  
"There goes a man of dark deeds."  
"Bless us! What does he do?"  
"Puts in coal."

**FOR SUMMER HEADACHES**  
Hicks' CAPSIDINE is the best remedy—no matter what causes them—whether from the heat, sitting in draughts, feverish condition, etc. 50c, 75c and 1.00 per bottle at medicine stores. Adv.

Don't become so busy giving advice that you have no time to mind your own business.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle, 40c.

It takes all the fun out of doing a thing if you get paid for doing it.

**FOR WOMEN ONLY**

**Do You Feel This Way?**

Backache or Headache  
Dragging Down Sensations  
Nervous—Drains—  
Tenderness Low Down.

It is because of some derangement or disease distinctly feminine. Write Dr. R. V. Pierce's Faculty at Invalids' Hotel, Buffalo, N.Y.  
Consultation is free and advice is strictly in confidence.

**Dr. Pierce's Favorite Prescription**

restores the health and spirits and removes those painful symptoms mentioned above. It has been sold by druggists for over 40 years, in fluid form, at \$1.00 per bottle, giving general satisfaction. It can now be had in tablet form, as modified by R. V. Pierce, M.D.

Sold by Medicine Dealers or trial box by mail on receipt of 50c in stamps.

**PISO'S REMEDY**  
Best Cough Syrup. Tastes Good. Use in time. Sold by Druggists.  
**FOR COUGHS AND COLDS**

**THOMPSON'S EYE WATER**  
Quickly relieves weak, inflamed eyes. Should ever be at hand. 50c. Booklet Free.  
**JOHN L. THOMPSON SONS & CO., TRUJ., N.Y.**
