

THOSE RHEUMATIC TWINGES

Much of the rheumatic pain that comes in damp, changing weather is the work of uric acid crystals. Needles couldn't cut, tear or hurt any worse when the affected muscle joint is used. If such attacks are marked with headache, backache, dizziness and disturbances of the urine, it's time to help the weakened kidneys. Doan's Kidney Pills quickly help sick kidneys.

When misfortune overtakes a hustler it has to go some. Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 5c a bottle.

For SUMMER HEADACHES Hicks' CAPUDINE is the best remedy—no matter what causes them—whether from the heat, sitting in draughts, feverish condition, etc. 5c and 50c per bottle at medicine stores. Adv.

Their Drawback. "No chicken fights are fair." "Of course not, since they necessarily have a fowl element."

Poison Oak or Ivy Poisoning is quickly relieved by bathing the affected parts in a solution of two teaspoonfuls of Tyree's Antiseptic Powder to a pint of water. 25c. at all druggists or sample sent free by J. S. Tyree, Washington, D. C.—Adv.

Economy. F. Irving Fletcher, the advertising expert, gave at a Woolworth building dinner in New York a good definition of economy. "Economy," Mr. Fletcher said, "is a way of spending money without getting any fun out of it."

Our Relations. "There's a bright side, if we look for it, to every black catastrophe," said Andrew Carnegie, at a reception at his superb Fifth-avenue house, with its overlook over Central park. "I know a millionaire who complained of his loneliness. "My wealth," he said, "brings me no happiness, for I have neither kith nor kin. "To pauperize," said I, "or to crow over?"

"That Human Trumpet Call. When Enrico Caruso was in Atlanta a few days ago he sang to the prisoners in the federal penitentiary three songs, including his "Sob Song" from "Pagliacci." After hearing Caruso, Julian Hawthorne, now convict No. 4435, wrote a poem, a few lines of which run thus: "Then, in the hush of the great blank hall, God wrought a wondrous miracle, For a voice like a glorious trumpet call, Arose as a soul from the deeps of hell, And our souls rose with it on wondrous wings, Rose from their prison of iron and clay, Forgot the grime and the shame of things! We were men once again in a sunlit day, Sin and grief and punishment—all were lost in that human trumpet call."

In Summer—When the body needs but little food, that little should be appetizing and nourishing. Then about the best and most convenient thing one can have handy is a package of Post Toasties. This food is fully cooked—crisp, delicious and ready to serve direct from the package. Post Toasties with fresh strawberries and cream are hard to beat. "The Memory Lingers" Sold by Grocers. Postum Cereal Company, Limited, Battle Creek, Mich., U. S. A.

ENCOURAGE THE BOYS

Connecting Link Formed Between Parent and Teacher.

Among Other Things Corn Club Has for Its Aim Education of Head, Heart and Hands and Improvement of Health.

Some of the objects of boys' corn clubs are as follows: (1) To encourage more intensive farming by using the best known methods of soil building, selection of seed, seed testing, cultivation of corn, etc. (2) To offer a medium through which vocational guidance, inspiration, information, and careful direction can be given to the average boy now in rural life. (3) To adapt the boy to his agricultural environments and make him

A Wisconsin Club Winner and His Prize Bushel of Seed Corn.

capable of self-expression within these environments. (4) To teach the value of intellectual guidance, careful observation, cultural comparison and investigation, and the need of a broader education for the farming population. (5) To teach the boy the proper adaptation of plant life to local climate and soil conditions. (6) To assist the teacher and the public school to find an easy approach, educationally, to all the interests of rural and village life. (a) The club acre should be the laboratory for the club member and the demonstration plot for the farmer. (b) The club work becomes the connecting link between parent and teacher, farm and school, and last but not least, it forms a co-operative atmosphere in which rural boys may be developed to the highest ideals of rural life. While the chief purpose of corn-club work is crop production, as outlined by the bureau of plant industry, it does not follow that all the other character-building and habit-forming agencies are left out of the education. It is clearly the purpose of the organization to reach the boy and endeavor through instruction and direction in contests and friendly rivalry to encourage a training which is "four square": viz, the education of the head, heart, and hands, and the improvement of the health of the entire membership.

SOME HINTS ON CHINCH BUG

Experience of Illinois Agricultural Experiment Station May Be of Interest to Farmers.

The experience of the Illinois agricultural experiment station with chinch bugs discovered in the spring of 1912, may prove of great value to farmers who may be troubled by the pest this year. Last spring the Illinois station found that the chinch bugs survived the winter in excellent condition and on April 25 were scattering on the wing to lay their eggs. The escape of the bugs on foot, out of fields of small grain at harvest time, is thought to be best prevented by surrounding each field with a line of thick, viscid, road oil, with post holes beside it some 36 feet apart. Such a line can be made and kept effective long enough to catch virtually all the bugs if a field at a minimum expense of 35 cents a mile per day. Coal tar may be used for the purpose where road oil can be obtained, but it must be much more frequently renewed to keep it effective. A well-made dusty furrow, with post holes in the bottom, may serve a temporary purpose in very dry weather, but is made useless by rain. Chinch bugs may be killed on corn, without injury to the plant, by a tobacco preparation (black-leaf 40) greatly diluted with weak soapuds.

Thriving Industry.

The poultry industry of the United States is today the most thriving industry we have. While the other live stock industries show a decline of from 5 per cent, to 35 per cent, the poultry industry shows a healthy gain of 27 per cent. It has been growing steadily for many years, until today it is the greatest live stock industry in the world and the people and the government recognize it as the billion-dollar industry. While pork can sometimes be made at a profit when corn is supplemented with nothing but a concentrated feed, still it is not wise to use concentrated supplements alone.

ATTENTION NEEDED BY EWES

Ample Supply of Dry Fodder Is One of First Essentials—Give Attention to Lameness.

(By W. R. GILBERT.) It is well to see that the ewe flock has an ample supply of dry fodder. Nothing is better for them than good, well got hay. Ewes should never, under any circumstances, be allowed to have roots alone nor should they be fed on roots and grain, or grain and cake.

Those who feed this and omit the hay are spending money in waste. A judicious combination of all these would form the ideal food and give the best results alike to the dam and its offspring. The lamb must not be neglected. Provision must always be made too that a dry lairage can be secured with good shelter from the wet and wind and a separate pen be provided in which specially prepared food suitable to the palate of the young lamb should be placed, care being taken that only a small quantity at a time should be placed in the trough and that any left over should be removed before a fresh lot is given.

In the flocks where there is any sign of lameness in the ewes attention should be at once given. No matter how slight, the ailment should be immediately removed from the flock and not allowed to run with them again until a cure has been effected. Lameness among the ewes means lameness among the lambs and there is probably no greater source of loss among young lambs than this.

Trade reports continue to exhibit fairly sharp lines of demarcation in that current distribution still surpasses future business and that surplus crop growing sections manifest more progressiveness than Eastern territory. In other words, trade in the West reflects optimism born of favorable prospects as regards wealth to come from the soil, which outlook is not clouded to any great extent by such matters as coming tariff changes, while in the East repression as regards future requirements is plainly in evidence, uncertainties concerning tariff reductions being the deterring factors.

TESTING CORN IN INCUBATOR

Any Tinner Should Make Galvanized Iron Tray for About \$1—Found Practical and Useful.

The illustration given herewith shows the plan of my water corn tester that I have found very satisfactory, writes Amos Mendenhall of Salem, Neb., in the Farmers' Mail and Breeze. The sides of the rack are made of six-inch fencing and wires crossing both ways divide the front into three-inch squares. No vertical wires are used in the back, as these are not needed. The tray is made of galvanized iron. The hole shown at Z is used to drain the tray of water, being plugged when the tray is in use.

Plan for a 100-Ear Tester.

X shows one of the loose cross-sections which are also of galvanized iron. Y is the cup used in the tray. Any tinner can make the tray complete for about \$1. The tray can be used to good advantage in an incubator and its size and that of the rack will depend upon the size of the incubator. After placing the kernels from an ear into a cup, put the ear in the corresponding square in the rack. When through, fill the tray about half full of lukewarm water and place it in the incubator. Use very little heat for the first 24 hours, then draw off the water and set the regulator to keep the heat at about 70 degrees, apply moisture as needed. In about three days you will know which ears will grow. There is no theory about the use of a corn tester like this. I have found it very practical and useful.

LIVE STOCK NOTES

A pig gives the best returns from dairy products while young. As the lambs grow and require more milk, increase the grain with judgment. The best time to cut the tails, as well as castrate, is when the lamb is a week old. Oil meal is greatly relished by lambs and helps greatly in the fine finish obtained in feeding. If a colt has not style enough to naturally hold his head high, high mangers will not make him do it. A horse's usefulness is measured by its strength and rapidity of movement rather than by size or weight. Be sure the cows have plenty of pure water to drink, aside from the slop they have. Slop is not drink. The tillage, the crops and the income from the farm are all more or less dependent upon the economical management of the work teams. The horse that is all the time being tapped with the whip never knows what his master means of it, and comes to think he means just nothing.

COMMERCIAL

Weekly Review of Trade and Market Reports.

Dun's says: "While business sentiment, especially in the East, displays a marked degree of conservatism, the actual volume of industrial and mercantile activity shows little or no diminution. Retail distribution has been retarded in many sections by cold and inclement weather, but the fact that wholesale houses report a broader demand for cotton goods, footwear and most staple lines is evidence that this check is regarded as only temporary. Aside from the low temperature the crop situation in most sections continues favorable, although complaints of damage led to some reduction in the wheat estimates for the Southwest."

Bradstreet's says: "Trade reports continue to exhibit fairly sharp lines of demarcation in that current distribution still surpasses future business and that surplus crop growing sections manifest more progressiveness than Eastern territory. In other words, trade in the West reflects optimism born of favorable prospects as regards wealth to come from the soil, which outlook is not clouded to any great extent by such matters as coming tariff changes, while in the East repression as regards future requirements is plainly in evidence, uncertainties concerning tariff reductions being the deterring factors."

Wholesale Markets

NEW YORK.—Wheat—Spot steady; No. 2 red nominal; No. 1 Northern Duluth, 102 1/4 c f. o. b. afloat. Corn—Spot steady; export, 66c nominal f. o. b. afloat. For That Picnic—to ensure complete success take along a case of Coca-Cola. The satisfying beverage—in field or forest; at home or in town. As pure and wholesome as it is temptingly good. Delicious—Refreshing Thirst-Quenching. Send for Free Booklet. At Soda Fountains or Carbonated in bottles. THE COCA-COLA COMPANY, Atlanta, Ga.

"IS YOUR BABY RESTLESS?" See the anxious mother bending over the sleepless babe! What tender solicitude! Her heart aches for him. Wise mothers use Dr. FAHRNEY'S TEETHING SYRUP. Which babies like because it cures them. Prevents Cholera Infantum, cures Colic in ten minutes. Keep a bottle at hand. 25 cents at druggists. Trial bottle free if you mention this paper. Made only by DR. D. FAHRNEY & SON, HAGERSTOWN, Md.

MADE RETURN A QUICK ONE Bill's Absence Cut Decidedly Short When Visitor's Object Was Made Known. The Harduppe brothers, Sam and Bill, were frankly "up against it." They owed the tailor, the landlady, the tobacconist and sundry others and they spent most of their time dodging their creditors' emissaries. Came a ring at the front doorbell, and Sam answered. "I must see your brother," an agitated man insisted. "I must see him today without fail." Thinking it one of his brother's creditors, Sam replied: "Why, I'm sorry, but Bill left town yesterday." The man's face fell. "That's too bad," he said, "for I wanted to pay him \$50 that I owe him, and I'm going west tonight." "Oh," said Sam, his face lighting, "that's easy; Bill came back this morning."

Pimples blackheads and oily skin may be quickly overcome by the frequent use of Glenn's Sulphur Soap. Sold by Druggists. Hill's Hair and Whisker Dye, Black or Brown, 50c.

NIELSEN'S PATENT FOLDING WARDROBE Will keep your clothes and wearing apparel always in proper shape and ready to wear, at home or while traveling, camping, etc. DUST PROOF SANITARY NEAT Weight 3 1/2 lbs. Price \$2.50. Express prepaid. If your dealer can't supply you write at once. Sold with a money-back guaranty. THE DANA MFG. CO. LEESBURG VIRGINIA

ECZEMA SPREAD OVER BODY R. F. D. No. 1, Lewisburg, Ky.—"Fifteen years ago I was badly affected with eczema upon my scalp first, then it spread all over my body and continued to grow worse for four years. It began with a dry rash. After forming thick scales or scabs the irritation forced me to scratch the scabs off and the hair would come out with them. Upon my face and body the sores would get inflamed and they disfigured my face. It was worse where my clothes irritated them. The eruption was a yellowish watery kind, sometimes bloody. In warm weather it was so bad I was not able to work on account of the raw irritating sores on my head and body. After trying various medicines without relief I tried Cuticura Soap and Ointment. After using four cakes of Cuticura Soap and four boxes of Cuticura Ointment and one bottle of the Resolvent I was entirely sound and well and have been for eleven years." (Signed) W. H. Williams, Mar. 19, 1912. Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston." Adv.

Talking Shop. Enthusiastic interest in one's occupation is always an advantage, but, on the other hand, it is not well for a woman in business to talk of her work at all times and places. Naturally, the thing that we do constantly is our most absorbing interest, but we must remember that other people have other things to talk about.

FAR BETTER THAN QUININE. Edith Babek, cures malaria, where quinine fails, and it can be taken with impunity by old and young. "Having suffered from Malarial Fever for several months, getting no relief from quinine and being completely broken down in health, Edith Babek effected a permanent cure."—William F. Marr. Edith Babek, 50 cents, all druggists or Kiocewski & Co., Washington, D.C. Adv. Old-Fashioned Birds. "I like to wander in the park." "The birds do sing sweetly." "Yes; and they never sing ragtime."
