Slightly Adulterated.

Mandre de Fouquieres, the celebrated Parisian cotillon leader, talked to group of reporters before his departure for France, about the American woman.

"It is a mistake to suppose that the question of money plays an important part in American marriages," said M. de Fouquieres. "The love match is not rare. Indeed, it is much more common here than with us." Smiling, the Frenchman added:

"I believe there are few American girls who would answer as the candid New York debutante did when asked if she was marrying for pure love.

"'Pure love?' said the debutante. with a roquish smile. "Well, not altogether. Pure love, adulterated with a little money."

Special Hospitals Needed. The National Association for the Study and Prevention of Tuberculosis estimates that there are over a million consumptives in the United States, of whom probably at least onethird are unable to provide for themselves the necessary treatment at home. Most of these cases are a menace to the health of their families and associates, and should be in special hospitals. At the present time however, even if every case were known it would not be possible to provide accommodations for more than one in eight or ten. The removal of these

Every Songster That Lives on Insect Life Is Worth Its Weight in Gold -Should Be Encouraged in the Gardens.

Few persons actually realize the great good accomplished by many of the more common varieties of insect destroying birds. C .- Adv. ful birds have been so destroyed as to be almost exterminated, and the increase of destructive insects that frequent the field, orchard and garden is appalling. Something will have to be done soon or mankind will be confronted with a very difficult problem.

The natural means of exterminating these pests are by far the best. The birds are the natural enemies of the life that destroys and injuries the various crops. Why not assist the willing birds in this work? We can easily do so if we but stop and consider for a moment. COCA COLA HABIT, A GHOST.

We have all heard of ghosts, but none of us have ever seen one. It's the same way with coca cola "flends;" you can hear about them but you might search for them until doom's day and you would never find one. Physicians who have treated hundreds of thousands of drug-habit cases, including opium, morphine, cocaine, alcohol, etc., say that they have never seen a case where the use of Coca-Cola has so fastened itself upon the individual as to constitute a habit in the true sense of the word: Although millions of glasses of Coca-Cola are drunk every year, no Coca-Cola fiends have ever made themselves visible at the doors of the sanitariums for the treatment of drug habits.

The Coca-Cola habit is analogous to the beefsteak habit and to the strawberry habit and the ice cream habit. People drink Coca-Cola first because they see it advertised and thereafter because it tastes good and refreshes their minds and bodies. They drink it when they can get it and contentedly do without it when they can't get it. If you had ever witnessed the ravings of a real drug flend when deprived of his drug, if you had ever observed the agony he suffers, you would never again be so unfair as to mention Coca-Cola in the same breath with the "habit-forming" drugs .-- Adv.
