DEATHS

From Monday's Philipsburg Journal. It becomes our sad duty to chronicle the death of our esteemed townsman, Benjamin Franklin Morgan, the well known contractor and builder, which occurred at 4 o'clock on Sunday morning at his home on East Presqueisle street, following a stroke of paralysis suffered by him about midnight of Thursday, September 11th.

Tae deceased, the fifth son of a family of thirteen children, was born at Honey Brook. Chester county, Pa., on August 13, 1836, making his age severty-seven years, one month and one it to resist drouth when clover, timcharges regarding my personal rela- day. His parents were Eli and Sarah othy, blue grass and other forage McCall Morgan, long since deceased.

When a young man Mr. Morgan eame to Centre county, where he has lived ever since and most of this time residing in Philipsburg. He was quite prominent as a contractor and builder. and while he did much work on the State College buildings some years ago which demonstrated his ability in this connection, with his home people St Paul's Episcopal church, just recently completed, will stand as a beautiful mor ument to bis mechanical skill.

On May 13, 1889, he was married to Miss Clarissa Jane Faulkner, a daughter of the late William Allen Faulkner, deceased, who survives, together with one sister, Mrs. A. M. Herr, of Los Los Angeles, Cal.

Mr. Morgan served his country faithfully in the civil war, being a member of Company C, 136th Penn'a Volunteers, receiving an honorable discharge. He was also a staunch Democrat, an enterprising citizen, a kind husband and father, ever courtecus and genial, and had an unusually large circle of friends who most profoundly mourn his death.

The funeral will take place tomorrow afternoon at 2:30, and it is very fitting that the services are to be held in St. Paul's church, of which he was held at the home of Mrs. Thomas the builder, with Revs. F. T. Eastment and R. P. Miller in charge. Interment will be made in the Philipsburg cemetery.

EXCELS EVERY OTHER CROP

The Introduction of Alfalfa as a General Farm Crop In the United States Will Revolutionize Agriculture-Mieans More Live Stock, Better Soil and Larger Returns From the Crops That Follow.

Alfalfa Should be Grown on Every Farm

- 1. It is a profitable crop. 2. Increases farm values.
- 3. Excels every other crop In yield per acre In feeding value As a drouth resister As a soil enricher.
- 4. No harder to grow than clover. 5. Make a beginning—start now grow some alfalfa.

Repeated experiments made by the agricultural colleges, and the results obtained by the actual growers of alfalfa in the semi-arid sections of the west, throughout the corn belt states, and in the south and east, are conclusive evidence of the great value of

There are few farmers whose profits would not be increased greatly by raising alfalfa. Every farmer should aim to produce, as far as possible, his foodstuffs upon his own farm.

During the last few years, the area devoted to alfalfa has greatly increased in the region west of the Missouri river, and it is certain that there will be an equally rapid increase throughout the eastern and southern parts of the Urdted States.

Many of the attempts in the past to grow alfalfa in the humid regions have failed, but with our present knowledge of the requirements of the crop there will be little, if any, more trouble in securing a stand.

Alfalfa will soon be grown abundantly and profitably upon every farm. It is no more difficult to grow than clover and gives double the yield. The deep rooting habit of alfalfa enables grasses die for want of moisture. Alfalfa roots grow deep into the soilfar beyond the roots of other plants. Its drouth resisting power is of no

greater importance than its great value as a soil enricher. The long roots bring phosphorus, potash and other plant foods from below and store them in the upper soil for the use of other plants. Experiments show greatly increased yields of other crops grown upon alfalfa sod.

one son, L. Raymond Morgan, and so economical for the production of county friends visit them during the beef, pork, mutton, butter and eggs, as corn and alfalfa. Neither will give the best results alone. We need alfalfa because it balances up the corn ration and saves the large waste of starch which always takes place where corn is fed alone. We need alfalfa because we can by means of it grow on our ewn farms the protein more profitably than we can buy it in feed stuffs. We need alfalfa because it feeds the soil and enables us to grow larger crops of corn and oats. We need alfalfa because it produces on an average double the feed value per acre of clover or any other forage

Advisable to Inocula #e.

In regions where alfalfs, has not been grown it is found to be necessary to inoculate the ground by sowing three or four bags of soil secured from a field where alfalfa or sweet clover has been grown for number of years; or where it is more convenient, artificial culture, such as "nitragin," "farmogerm," etc., may be applied. Where alfalfa has not been grown bafore it may make the difference between suc- attending a medical college. cess and failure.

Make a Beginning-Start Now. Every farmer should try at least small piece of alfalfa and if he does not succeed at first, try again and keep on trying until he does succeed. It is worth the while. If the work is thoroughly dome and .at the proper time, you will most cartainly succeed in securing a good stand; if the work is half done and out of season, you will just as certainly fail. D. W. Zerby Elected Over William F Smith for State Committee man by s Vote of Two to One.

The only contest in the county at the primary election on Tuesday was for Sttae Committeeman, the candidates being W. D.
