EGGS DURING WINTER MAKE ALCOHOL OF POTATCES One Reason Industry Has Not Ad-

vanced in United States is Be-SUPPLY OF GREEN FOOD IS ABcause of High Price of Tubers.

> (Prepared by the United States Department of Agriculture.)

That the manufacture of alcohol from potatoes has not yet become established in the United States is due to various reasons. The price of potatoes marketable for other purposes has been too high, and no sufficient In order to get a good supply of supply of culls and surplus potatoes eggs in the winter, conditions for the has been available. The average price hens must be made as nearly like for distilling potatoes in Germany for the five years 1906-1910 was 183 To do this, one thing absolutely neccents per bushel. It is probable that the farmers there would be less disessary is plenty of green food, for the hens to eat. There are various ways posed to grow the crop if it were not for its indirect benefits, including the feeding value of the mast left If there is a field of winter wheat, rye or alfalfa, where they can help after the distillation of the alcohol, themselves, the green-food probelm is according to the department of agrisolved, when there is no snow on the culture.

ground and the weather is warm The potato-drying industry in Germany is the last development in the During the cold and stormy weather utilization of surplus potatoes, and came about only through the absolute necessity of finding an outlet for the surplus production that could not be consumed by the starch and alcohol factories. The rapid increase in the number of potato-drying factories in Germany shows great promise for this young industry, and should merit the expanding, and for so early in the seacareful consideration of our people as to whether the time has not already arrived for the introduction of the whole surness those of this time this method into the United States. at least on an experimental basis. The problems to be met relate mainly to the present cost of the labor in pick- mostly to inspecting displays, gradual ing up and delivering to the factory the potatoes not marketable for table purposes. In many cases, however, it is necessary to remove these culls from the field to prevent the spread of potato diseases, and it would seem that the drier would pay for the labor involved. The dried product is adapted for many purposes. Not only cattle but horses have been fed the dried potatoes as a substitute for grain with 1011/4 f o b afloat. perfect satisfaction.

BROOD MARES FOR FARM USE

Percheron or Shire Will Generally Prove the Most Satisfactory-Profit Obtained In Colts.

In selecting a brood mare for farm purposes, the Percheron or Shire will generally prove the most satisfactory. They need not be too large because a heavy footed clumsy beast is to be avoided always.

A mare that weighs fourteen or fifteen hundred pounds is big enough clover-hay or alfalfa, cut into short for any use.

lengths, is a good green food. The She should have a clean, bcny head. hens will eat them dry, but relish a prominent, bright, intelligent eye, them much better if steamed. To good legs and large hoofs.

Her barrel should be roomy but symmetrical with broad hind quarters.

COMMERCIAL Weekly Review of Trade and Market Reports.

Dun's Review says:

"There are further evidences of reviving business activity with the expansion in industrial operations constituting one of the best features of the situation. Somewhat less complaint is now heard regarding labor conditions as the number of unemployed while apparently still large has been considerably reduced of late. This obviously enhances the purchasing power of the people and confidence in the future is gradually strengthening."

Bradstreet's says:

"Optimism continues to spread, and in some lines of industry, particularly fron and steel, actual improvement keeps encouraging pace with sentiment. Withal, there is sufficient irregularity, primarily traceable to unseasonable weather conditions, to act as a check rein on the general tendency toward betterment.

"In the forefront is the fact that trade with the larger distributors is son it may be deemed to be encouragingly good, while movements on last year. Buyers are in the leading markets, and while representatives of some lines have devoted the week improvements is the order of the day."

Weak Women!

Uric Acid Is Slow Poison

Excess uric acid left in the blood by weak kidneys, causes more diseas than any other poison.

Among its effects are backache, beadache, dizziness, irritability, nervousness drowsiness, "blues," rheumatic attacks and urinary disorders. Later effects are dropsy, gravel or heart disease.

If you would avoid uric acid troubles keep your kidneys healthy. To stimulate and strengthen weak kidneys, use Doan's Kidney Pills-the best recommended special kidney remedy.

The Man Without Folly.

William Dean Howells, apropos of the tercentenary of the birth of La Rochefoucauld, quoted at a dinner in Boston some of the famous Frenchman's maxims.

"La Rochefoucauld," said Mr. Howells, "wasn't the sorrowful misanthrope some people think, but a gay and gallant figure. His character was best protrayed, indeed, by one of his best maxims:

"'He who is without folly is not so wise as he thinks.' "

> SCHOOL TEACHERS. Also Have Things to Learn.

"For many years I had used coffee and refused to be convinced of its bad effect upon the human system," writes a veteran school teacher.

"Ten years ago I- was obliged to give up my much-loved work in the public schools after years of continuous labor. I had developed a well defined case of chronic coffee poisoning.

"The troubles were constipation, flutterings of the heart, a thumping in the top of my head, and various parts of my body, twitching of my limbs, shaking of my head and, at times after exertion, a general "gone" feeling, with a toper's desire for very strong coffee. I was a nervous wreck for years.

"A short time ago friends came to visit us and they brought a package of Postum with them, and urged me to try it. I was prejudiced because some years back i had drunk a cup of weak, tasteless stuff called Postum which I did not like at all.

"This time, however, my friends made the Postum according to directions on the package, and it won me. Soon I found myself improving in a most decided fashion.

"The odor of boiling coffee no longer tempts me. I am so greatly benefited by Postum that if I continue to improve as I am now, I'll begin to think I have found the Fountain of Perpetual Youth. This is no fancy letter but stubborn facts which I am glad to make known."

Name given by Postum Co., Battle Creek, Mich. Write for a copy of "The Road to Wellville."

Postum now comes in two forms: Regular Postum-must be well bolled

Instant Postum-is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and, with cream and sugar, makes a delicious beverage instantly. Grocers sell both kinds. "There's a Reason" for Postum.

in a tub or bucket, pour as much boiling water over them as they will ab-

sorb, and cover tightly for thirty minutes before feeding. It may be fed either by itself or mixed with a mash. Sprouted oats are a good green food. To prepare them, soak the oats in warm water for 24 hours, then spread in shallow boxes and keep in a warm place. Keep them moist by sprinkling with warm water and they will soon begin to sprout.

enough so that the hens can be out.

summer as possible.

of supplying this.

When the sprouts are about two inches long, cut the oats out in chunks and feed to the hens. They will eat both the sprouts and the oats and are very fond of them.

Another way of furnishing green food is to feed vegetables. Turnips. beets and mangles should be cut in halves and fed raw

Cabbage heads should be hung up where the hens can pick them. Giving the hens regularly any one of these green foods will make a noticeable gain in the production of eggs.

FALSE ECONOMY IN FEEDING

Big Mistake Made in Cutting Down Amount of Grain Fed to Fattening Animals During Winter.

Farmers and feeders make a great mistake when they cut down on the amount of grain food that they feed their fattening animals during the winter. There may be some animals on the farm which can be carried along through the winter on moderate rations, but fattening stock and dairy of her besides. cows do not belong to that class.

The farm teams that are not being worked do not require a full ration of grain food during the winter but it is costly economy to "rough" them Clover Is Much Cheaper for Pigs Than during the winter on short rations. The horse that is allowed to run down

in flesh condition during the winter cannot do as efficient service during the spring's work as he could if he were fed well during the winter. No In feeding fattening stock and dairy runs.

cows, gain and profit come in proportion to the amount of food the animals put to good use. The fattening animals and dairy cows should have no setbacks; and the best feeders are the ones who know when to feed highpriced grains and are not afraid to feed full rations.

Care of Dry Cows.

Dry cows, coming fresh in the spring, need just as good feed and care as if in full milk, but the food hay, fodder and straw, with two to have access to good clover pasture. four quarts of wheat bran, given to each daily, will keep them in thrifty condition.

Caring for Stock. Convenience and economy in feeding will least expose the farmer to inclement weather in caring for his

Brood Mare and Colt.

Avoid a mare with any suggestion of 'cat hams."

A good disposition is essential, but does not mean that a brood mare must

be stupid or a bungler in harness. Better pay \$300 for a first class brood mare than \$100. The difference will be made up in the first two colts. provided the right kind of a sire is used

With a brood mare of this description a farmer can every year raise a colt that will sell from \$150 to \$300 and get good service in farm work out

GOOD PASTURES FOR SWINE

Grain and It Pays to Give Animals All They Will Eat.

(By W. F. PURDY.)

A trip through the country will reveal the fact that a good many of the man ever made money feeding live pig pastures on the farms are not stock just enough to keep them alive. pastures in fact, but simply small

This means that the pigs get a little grass or clover while it is at its best early in the spring and then go without the rest of the season.

. Now, if the pigs could be given a good big pasture where they would have more range and all the clover they would eat and some to spare the profit from them would be more.

Clover is very much cheaper feed for pigs than grain and it pays to give them all of it they will eat. Fattening hogs will make the same gain need not consist of much grain. Mixed on 25 per cent. less grain where they

Poultry Roup.

The most certain way of identifying poultry roup is a characteristic sickning odor.

Early Vegetables. Every farm should have a hotbed
