**Receives \$200 for Five Pullets.**

When the pen of five Single Comb White Leghorn pullets bred and owned by Chas. D. Bartholomew of Centre Hall, which he entered in the third North American competition, held at Florida, held up the English and all other American pens for the first seven weeks beginning November 1st, 1913, for heaviest egg production, it was considered a very great honor for this pen. At the time it was thought by some people that this fine record was only a temporary arrangement, but after fifty weeks this pen of White Leghorns has every week led all American bred Leghorns, is now leading American bred hens in all breeds and is surpassed by only five pens of English bred hens. This is a wonderful record and the production for these five pullets for the first year will reach very close to the 1100 egg mark. This makes an average output of nearly 220 eggs each. Until only a few years back the 200 egg hen was considered a marvel but here is a pen of five American bred pullets that has carried the figure well above the 200 mark. To say the least, this record has put Centre Hall on the chicken map, and it has created a demand for the Bartholomew strain of Single Comb White Leghorns that will be hard to supply, judging from inquiries pouring in from all parts. On October 22nd Mr. Bartholomew sold these five pullets, reserving all prizes, etc., for the fabulous sum of two hundred dollars and they will be delivered November 1st when the contest closes. This sale will mean another great boon for this strain. Surely the poultry business when properly managed is becoming profitable at such prices.
