PROPER CREDIT FOR GRANDPA

Happy Father Wanted Generous Contribution Entered Under the Proper Heading.

When Mr. Otis returned from the office one afternoon, he was met at the door by his wife, who cried, excitedly: "Oh, Herbert, love, I received a love letter from father today."

BIRD SANCTUARY IN ORCHARD

Farmers and Fruit Growers Urged to Plant Trees to Provide Nesting Places for the Robin.

One hundred and seventy-six species of insects attack the apple tree, while apple-producing states spend as high as \$3,000,000 for spraying trees to keep down the codling moth.

The Liberty Bell Bird club of the Farm Journal says that the destructive insect invasion is not caused altogether by the killing of the birds themselves who would eat the insects, but largely because the farmer has cut down the trees and shrubbery, depriving his former little neighbors of their nesting places without providing others.

An Orchardist's Friend, the Robin.

growers to plant those trees and shrubs which will entice the foraging robin away from his favorite cherry tree, and yet maintains that he is entitled to a little of even this choice fruit in return for all the ravening fruit pests he devours.

FEW BENEFITS OF THINNING

Importance of Thinning as Means of Producing the Maximum Number of First Class Apples.

An experiment made recently by the Utah station calls attention to the importance of thinning of first-class apples. Eight-year-old Ben Davis trees, with the fruit thinned to a maximum distance of four inches apart gave a net increase per tree of \$1.15 as compared with unthinned fruit.

GENERAL FARM NOTES

Fruit and poultry raising go well together.

Every owner of a colt should look well to the care of the feet.

Selling the choicest of the wheat is a poor way to select seed grain.

Bees wintered out of doorns should be where the sun will shine on the hive.

Bad shoeing causes many horses to travel badly, but shoeing is not wholly to blame.

Late chickens sometimes do very well, but they require more care than early ones.

The poultry that is having the run of the orchard now is serving well their day and generation.

The foal that is being weaned should be watered twice each day.

Horses of all ages must be watered frequently and regularly if they are to do well.

Before the snow falls, it is a good plan to go through the orchard, and with a coarse rake, gather up all diseased or rotten apples or other fruit left on the ground, and destroy them.

In planting fruit trees for family use, select the varieties that appeal to the palate of the home folks, but for the markets select those varieties that keep best, and are in greatest demand.

FILLER FOR CONCRETE-WORK

Rough Stones of Almost Any Character, Found in Almost Any Section of Country Are Favored.

(By H. H. SHEPARD.) In any section of the country where rough stones of almost any character can be secured and hauled as cheaply as sand and gravel, it will pay to use them as fillers for concrete-work.

A neighbor of ours has built a barn foundation by using rough stones as fillers, with the result of saving fully one-half the cost of construction.

On our own farm rough flint stones all the way from the size of a walnut up to as large as a peck measure are to be had with only the trouble of picking them up.

These rough stones we are using in all of our concrete construction, except for surfacing. The space they take up saves sand, gravel and cement, with a resulting wall or floor as solid and firm as one of all finer material.

Using rough stones as filler in solid concrete construction is similar to laying brick or stone in mortar. The only difference is that forms are used, and that the stones are all hidden when the work is finished.

Sand and cement are all that is needed, although gravel, too, may be used in the wet mixture.

Make the forms as usual for any kind of concrete-work, and shovel in the wet mixture of sand, gravel and cement. On this soft mixture place a layer of the rough stones of all sizes and shapes.

They must be clean of soil, so that the cement mixture will stick to them. Cover the layer of stones with more of the wet cement mixture, and "spade" the sides to make smooth surfaces and to settle the mixture among the rocks.

Use a rather slushy concrete, so that it will more easily run among the rocks for filling vacant spaces and for firm binding. Continue the process layer after layer till the wall is finished.

GRADING AND SORTING EGGS

Every Year There is a Loss of Millions of Dollars in Product Because of Haphazard Methods.

(By M. HASTINGS.) Eggs are among the most difficult of food products to grade. This is because each egg must be considered separately, and because the actual substance of an egg cannot be examined without destroying the egg.

From external appearance, eggs can be selected for size, color, cleanliness of shell and freedom from cracks. This is the common method of grading in early spring when the eggs are uniformly of good quality.

While any kind of a light may be used, a 16-candlepower electric lamp is the most desirable. The light is enclosed in a box or tin cylinder, in which are made

Candling Eggs.

openings about the size of a half dollar. The room being darkened, the candler holds the egg to the light, large end upward, and gives it a quick turn in order to view all sides and to cause the contents to whirl within the shell.

HOW TO GROW HORSERADISH

Crop Is Cut in Fall, Small Roots Removed and Arranged into Sets Four to Six Inches Long.

Horseradish is commonly grown from sets, and not from seed. Some claim they have best success growing it as a second crop after the early cabbage, beets, etc.

The top end is cut square and the bottom slanting, so as to make no mistake in planting. These are tied in bundles and kept over winter in sand.

In the spring, after the cabbages are set out, a row of horseradish is set in between the cabbage rows. Small holes are made with a light crowbar or long stick and the sets dropped in and covered two or three inches deep, so that they do not come up until July first.

Any deep, rich soil, well drained, will answer for horseradish.

Selecting Breeding Stock.

In selecting breeding stock, the records of the ancestry are always important but the records of the ancestry nearest the individual that you are buying are naturally the most important.

The Markets

NEW YORK.—Wheat—Spot irregular; No. 2 red, 117 1/4c; No. 2 hard, 117 1/4c; No. 1 Northern Duluth, 118 1/4c; No. 1 Northern Manitoba, 123 1/4c nominal; c 1 f Buffalo.

Corn—Spot firm; No. 2 yellow, 84c c 1 f to arrive; Argentine, 78 nominal, delivered.

Butter—Creamery, extras, 34 1/2c; creamery, 35c; firsts, 29 1/2c@33 1/2c; seconds, 25 1/2c@28 1/2c; packing stock, current make, No. 2, 20 1/2c@21c.

Eggs—Fresh gathered, extra fine, 36c@38c; extra firsts, 33c@35c; firsts, 30c@32c; seconds, 26c@29c; state, Pennsylvania and nearby hennery, white, 52c@55c; do, hennery brown, 48c@42c; do, gathered browns and mixed colors, 30c@38c.

Dressed Poultry—Western roasting chickens, 14@17c; fresh fowls, 12@17c; frozen turkeys, 17@22c. Live poultry—Western chickens, 13@13 1/2c; fowls, 13@15c; turkeys, 18@20c.

PHILADELPHIA.—Wheat—Car lots, in export elevator, No. 2 red, spot and November, \$1.13 1/2@1.16 1/2; No. 1 Northern Duluth, \$1.26 1/2@1.29 1/2; No. 2 red, Western, \$1.18 1/2@1.21 1/2.

Corn—Car lots, No. 2 yellow, 84c@84 1/2c; steamer, yellow, 83 1/2c@84c.

Oats—No. 2 white, 54c@54 1/2c; standard white, 53c@53 1/2c; No. 3 white, 52c@52 1/2c.

KANSAS CITY, MO.—Hogs—Bulk, \$7.40@7.75; heavy, \$7.45@7.50; packers and butchers, \$7.50@7.85; light, \$7.35@7.70; pigs, \$6.50@7.25.

Cattle—Prime, fed steers, \$9.75@11; dressed beef steers, \$7.75@9.50; Southern steers, \$5.25@7.25; cows, \$4.75@7.50; heifers, \$4.50@9.25; stockers and feeders, \$6.80; bulls, \$5.25@7; calves, \$6.50@10.50.

That Weak Back

accompanied by pain here or there—extreme nervousness—sleeplessness—may be faint spells—or spasms—all are signals of distress for a woman. She may be growing from girlhood into womanhood—passing from womanhood to motherhood—or later suffering from that change into middle life which leaves so many wrecks of women. At any or all of these periods of a woman's life she should take a tonic and nerve prescribed for just such cases by a physician of vast experience in the diseases of women.

DR. PIERCE'S Favorite Prescription

has successfully treated more cases in past forty years than any other known remedy. It can now be had in sugar-coated, tablet form as well as in the liquid. Sold by medicine dealers or trial box by mail on receipt of 50 cents in stamps.

Dr. Pierce's Pleasant Pellets regulate stomach, liver and bowels—sugar-coated, tiny granules

NEW YORK 300 YEARS AGO

From Forest Land It Has Grown to a City of Six Million Inhabitants.

As years come and go in the twirling of this world about the sun, it was but as yesterday when Adrian Block's rude log huts were the first habitations of white men on Manhattan island, says the New York Mail.

A city of nearly six million people, with real estate values footing up to nearly \$10,000,000,000, has been wrought in the three intervening centuries.

The winter refuge of the crew of the Tiger has become the world center. Captain Block hewed timbers from the virgin forest and built a new ship, which he called the Restless.

The restless energy of New York is the greatest factor in the world progress that is focused here in this young giant among the world's metropolises.

War and Life Insurance. "I inquired of a man high up in the affairs of a big life insurance company whether the killing of so many soldiers will bring heavy losses upon American life insurance companies.

Where Beauty Helps. She—We women have to stand a lot. He—Not in the street car if you're pretty.

A Mistake. Wife—James, you are going out without your muffler. Autoist—I cut it out.

The Difference. "Gossip has no business methods." "What do you mean?" "People retail it by wholesale."

DOCTOR KNEW Had Tried It Himself.

The doctor who has tried Postum knows that it is an easy, certain, and pleasant way out of the coffee habit and all of the ails following and he prescribes it for his patients as did a physician of Prospertown, N. J.

One of his patients says: "During the summer just past I suffered terribly with a heavy feeling at the pit of my stomach and dizzy feelings in my head and then a blindness would come over my eyes so I would have to sit down. I would get so nervous I could hardly control my feelings.

"Finally I spoke to our family physician about it and he asked if I drank much coffee and mother told him that I did. He told me to immediately stop drinking coffee and drink Postum in its place, as he and his family had used Postum and found it a powerful re-builder and delicious food-drink.

"I hesitated for a time, disliking the idea of having to give up my coffee, but finally I got a package and found it to be all the doctor said.

"Since drinking Postum in place of coffee my dizziness, blindness and nervousness are all gone, my bowels are regular and I am well and strong. That is a short statement of what Postum has done for me."

Name given by Postum Co., Battle Creek, Mich. Read "The Road to Wellville," in pkgs.

Postum comes in two forms: Regular Postum—must be well boiled. 15c and 25c packages. Instant Postum—is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and, with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

The cost per cup of both kinds is about the same.

There's a Reason for Postum. —sold by Grocers.

Important to Mothers Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of J. C. Fletcher In Use For Over 30 Years. Children Cry for Fletcher's Castoria.
