## Scientists of Opinion That Dispersion and Separation of Races Was Not Rapid Process.

Though it is conceivable that mankind may have spread from a common center over the entire earth in a few thousand years. Prof. Arthur Keith, in a Birmingham university lecture, has pointed out that the discoveries of the last 50 years clearly indicate that the dispersion and separation into widely separated races has not been a rapid process.

The inhabitants of the lower Nile valley, though immigrants have arrived among them, show clearly persistence of the old types for 8,000 years. The permanence of human types has been also shown in America, and a human skeleton of Yansing, Kan., found at a depth of 23 feet in a glacial deposit, probably dates back 12,000 years.

The men of England of 5,000 years ago had the modern stature, with the form of head and strength of muscle of many men of today. Professor Keith declared that his audiences had representatives of the men of the Derbyshire cave, in America the red Indian preserves the form of men who lived before the last glacial invasion, and the predynastic Egyptian survives in tribes on the Red sea.

#### Geometrical Staircase.

What is believed to be the first geometrical staircase ever built of concrete forms a part of the "Caracol" tower in a museum building that has just been completed in Los Angeles. The building with its tower is in the quaint ancient Spanish style of architecture and is constructed entirely of poured concrete. The tower is 125 feet high. In the center is the geometrical stairway, consisting of 160 steps; circling around an open space only 24 inches in diameter and mounting to a height of 120 feet. Unlike most geometrical staircases, including the one in St. Paul's cathedral in London, this staircase occupies only a small part of the tower, space being left for rooms of fairly large size on each of the seven floors .- Popular Mechanics Magazine.

Nine families are homeless as the result of a fire in the suburbs of Mt. Carmei, which, destroyed two double blocks and gutted another, causing a loss of \$15,000. The fire originated in basement occupied by Peter Buscavige, and in a short time, the entire building was in flames which spread to the residences of Anthony Lobus and Edward Wilson, A house, occupied by Theodore Halcavich and Paul Rubick, next fell a prey to the flames, as did the hotel of Stephen Homlack.

Employes of the Diamond mine of the Lackawanna Company, at Scranton, into which thirteen miners were hurled 300 feet to death from a lift in which they were descending to work. declared that the mine carriage had been defective for some time, and that the floor fell out because of this defective condition. They minced no words in laying the accident to the negligence of company employes whose duty it was to keep the lift in repair.

At the annual reorganization meeting of the Phoenixville School Board, it was decided after a bitter contest that dancing would be permitted in the auditorium of the new high school at proper school functions until ten o'clock. This determination was reached only after one of the most exciting sessions of the board, which also resulted in the resignation of John S. Winchester as secretary of the board.

THE FOLLY OF DISCONTENT

#### Vain Longing and Aspirations, as This Little Fable Shows, Are Things of Moment.

A fashionable woman, coming from the opera, in the rosy nest of a limousine, passed a group of laborers at midnight. Machines, like terrible animals, were burrowing into the earth. Steam was hissing, as if from the mouths of a million serpents. Rocks flew in every direction. Torchlights danced. There was the thunder of labor. The night shift was in full swing.

-And the woman, glancing from the window at a certain workman, for an instant thought:

"How I wish I had that brawny laborer's strength and joy of life! How I envy him his power, his physical perfection, the wonder of his manhood, his freedom from the shackles that bind me. He is his own master, while I am a slave-the slave of a man I despise!"

At that moment the laborer paused long enough by the deep chasm where his engine rocked, to glance into the motor as it sped by him. And he thought:

"Oh, to be like her! To know leissure and wealth and rest! To be free from drudgery and toil, to come and go as I pleased! To throw off the chains of debt and worry, and have the days and nights stretch ahead of me like a field of flowers!"

But in another instant the motor was gone. The torchlights flared brighter than ever. And each had forgotten the other .-- Judge.

coiner, of whom there were but few. might be able to turn out by hand fifty or sixty coins a day, a result totally inadequate to cope with the vast quantity of treasure, chieffy silver. that shortly began to arrive from America. To multiply coiners was to multiply forgers, and thus the coining machine became a necessity of state.

A laminating mill and screw coining press was invented in Italy, 1547; Spain, 1548; France, 1553; England, 1561, reign of Elizabeth. After several trials and abandonments the mill and press were established permanently under Charles II, whose golden guineas, struck in 1662, were the first regular issues of machine coins made north of the channel.

## A Doubtful Frame of Mind.

A Poisonous Drug Still Freely Used.

Many people are brought up to be lieve that coffee is a necessity of life. and the strong hold that the drug, caffeine, in coffee bas on the system makes it hard to loosen its grip even when one realizes its injurious effects.

A lady writes: "I had used coffee for years; it seemed one of the necessities of life. A few months ago my health, which had been slowly failing, became more impaired, and I knew that unless relief came from some source I would soon be a physical wreck.

"I was weak and nervous, had sick headaches, no ambition, and felt tired of life. My husband was also losing his health. He was troubled so much with indigestion that at times he could eat only a few mouthfuls. "Finally we saw Postum advertised

and bought a package. I followed diadded cream, which turned it to the loveliest rich-looking and tasting drink I ever saw served at any table, and we have used Postum ever since.

"I gained five pounds in weight in as many weeks, and now feel well and strong in every respect. My headaches have gone, and I am a new woman. My husband's indigestion has left him, and he can now eat anything."

Name given by Postum Cc., Battle Creek, Mich. Read "The Road to Wellville," in pkgs.

Postum comes in two forms: Regular Postum-must be well boiled. 15c and 25c packages.

Instant Postum-is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and, with cream

and sigar, makes a delicious beverage instantly. 30c and 50c tins. The cost per cup of both kinds is

about the same. "There's a Reason" for Postum.
