In the stable were fourteen head of cattle, and when Mr. Cummings entered the stable all were lying prostrate from the effects of the lightning. THE LUSE HYDRANT SOLD.

The Hartzler & Zook Company, at Bellefonte, the New Owners Who Will Manufacture It on a Large Scale.

What should have made and could have made Centre Hall famous was recently sold to the Hartzler & Zook Company, at Bellefonte, manufacturers of agricultural implements. Reference is made to the sale of the patent right of the Luse hydrant by Mrs. Martha Luse, executrix, to the firm named. The Luse hydrant is the product of D. F. Luse, who spent many years in perfecting it. It is today a most substantial, simple, convenient hydrant, second in all respects to none. It has many superior points to other hydrants. From the point of durability, the easy manner in which it may be removed from the main pipe, it has no equal. Some of the Luse hydrants have been in continuous and satisfactory service for a period of thirty years.

As above intimated the Reporter's chief regret is that local capital did not have the opportunity to put this commodity to the market on a large scale, and thus build up an industry that has long been dwarfed on account of the lack of capital and business capacity.

The Hartzler & Zook Company, at Bellefonte, who now own the exclusive right to manufacture the Luse IXL hydrant are prepared to manufacture on a large scale. Their plant is thoroughly equipped with modern machinery, guaranteeing that the hydrants built by them will be improved by being constructed with greater care and experience.

The Bellefonte firm manufactures farm machinery extensively, among which are grain drills, feed mills, wood saws, lime drills, stock troughs, and gasoline engines. Their payroll roll is large and their various products are shipped to all points of the compass. They will consequently almost instantly be ready to fill orders for the Luse IXL hydrant to their trade and greatly extend the territory in which the hydrant is a familiar figure in the hardware store, on the farm, and in the town home.

The manufacturers request that dealers who have been selling this hydrant write them for prices, etc.
