Paxtine

A Soluble Antiseptic Powder to be dissolved in water as needed For Douches

In the local treatment of woman's ills, such as leucorrhoea and inflammation, hot douches of Paxtine are very efficacious. No woman who has ever used medicated douches will fail to appreciate the clean and healthy condition Paxtine produces and the prompt relief from soreness and discomfort which follows its use. This is because Paxtine possesses superior cleansing, disinfecting and healing properties.

For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its purity and safety. Women who have been relieved say it is "worth its weight in gold." Ask your druggist. 50c. large box or by mail. Sample free. The Paxton Toilet Co., Boston, Mass.

PARKER'S HAIR BALSAM
A bottle preservation of youth. Restores color and luster to faded hair. 50c. and \$1.00 at all druggists.

DROPSY TREAT usually gives quick and short breath, often gives entire relief in 15 to 25 days. Trial treatment sent FREE.
DR. THOMAS E. GREEN, Successor to Dr. H. H. Green's Sons, Box 4, Chatsworth, Pa.

W. N. U., BALTIMORE, NO. 19-1915.

DISEASE OF POTATOES

Growers Should Be Constantly on Watch for Powdery Scab.

In Addition to Being Carried by Seed Tubers Trouble May Persist in Infected Soil for Some Time—Disinfection is Urged.

Although the attention of scientific men was first called to powdery scab in 1841, the disease had already been known to German farmers for several years. The first report of the disease in the United States was made in 1913, potatoes from widely separated sections of the country being found to be affected.

Investigation shows that, as yet, the disease has not made great headway in this country and potato growers everywhere should be continually on the watch for it, so the disease may be quickly stamped out. Severe attacks occur when potatoes are planted year after year on infected land.

It is claimed that healthy potatoes which have been in contact with diseased ones may carry powdery scab. This naturally leads to the supposition that it may be spread by means of sacks or other containers or by means of tools, such as planters, etc. Another possibility is that plows, harrows or other tools used for working infected land may carry with them the germs of the disease to contaminate portions of the farm now free from powdery scab. Perhaps the most important factor from the economic standpoint is that the disease, in addition to being carried by the seed tubers, may persist in infected soil for some time, thus making it worthless for potato culture. One writer claims that manure of a pig fed with potatoes affected with powdery scab carried the germs of the disease. Other writers have pointed out the fact that contaminated manure may be a means of spreading the infection.

No potatoes should be planted without first disinfecting them with formaldehyde or corrosive sublimate, for if by chance the healthy seed has become contaminated this would tend to eliminate danger from this source. By careful selection of only sound,

thoroughly healthy seed tubers, and then disinfecting it is possible to entirely eliminate blackleg, prevent the spread of ordinary scab, and also to overcome some of the losses from seed decay and so-called imperfect germination.

After the sound, healthy tubers have been disinfected great care should be taken not to contaminate them by allowing them to come in contact with sacks, barrels or planters, etc., which may carry the germs of the disease. Special attention should also be given to storage houses. After all dirt, potato culls and rubbish have been removed from the potato house, the interior walls and floors should be thoroughly sprayed with a solution of copper sulphate, five pounds to fifty gallons of water.

The amounts of disinfectants to use and the length of time for treating seed potatoes are as follows:

- (1) Formaldehyde, 40 per cent, one pint; water, 30 gallons; soak tubers in this solution for two hours.
- (2) Corrosive sublimate, four ounces; water, 30 gallons; soak tubers one and one-half hours in this solution.

The essentials of brood sow management may be briefly summarized:

1. Provide suitable food, but do not overfeed.
2. Emphasize the protein and ash constituents of the ration.
3. Keep the sow growing thriftily, but do not fatten.
4. Devise schemes to induce exercise.
5. Provide warm, dry, well bedded, well ventilated and sunlit quarters.
6. Avoid constipation by natural feeding methods, but resort to emergency remedies if necessary.
7. Kill off lice with crude oil, and drive out worms with santolin and calomel.
8. Practice gentleness at all times. Hog man cannot afford to neglect any of these cardinal points when the cost of production is so high.

MANAGEMENT OF BROOD SOW

Keep Animal Growing Thriftily, but Do Not Fatten—Other Cardinal Points to Observe.

Use the Cultivator.
Farmers who watched their crops parch and shrivel during last year's long drought, while neighbors who cultivated persistently made good yields, will no doubt be more inclined this year to the use of the cultivator, one of the most valuable of agricultural implements. Make up your mind now that you are going to keep your land constantly "stirred up" and not allow your plants to be handicapped by unsatisfied thirst.

SEVERAL USES FOR SPRAYER

Among Other Things It May Be Used for Spraying Hen House With Insecticides or Whitewash.

Sometimes the investment in a certain article for use on the farm may not seem worth while because the service it can perform is limited to a brief period during the year. By the exercise of a little ingenuity, however, an outfit supposed to serve a given purpose can be turned to account in other ways.

Take a sprayer, for instance; it can be used in many ways besides the one for which it was made. Did you ever try spraying the chicken house with insecticides, or whitewash properly strained and thinned? I have found another use for the sprayer that has added much to the practical value of the outfit, says a writer in Successful Farming. Wall paper needs to be replaced from time to time and it is unsanitary to place a new paper on an old one. A sprayer is fine as a helper in removing the old paper. Fill the tank half full of hot water, then create enough air pressure to produce a fine misty spray. Apply this to the paper in two applications, the first one just enough to dampen the paper. If the water is applied freely at first it will run down too quickly from the surface of the dry paper. But if it is first dampened the second application will be quickly absorbed. The paper will then peel off easily and the saving in time and money ought to pay for an auto-sprayer and a good nozzle.

SOLVING THE MEAT PROBLEM

Cattle Must Be Considered With General Agricultural Interests—Keep All Breeding Cows.

If the government can take up the cattle business and make beef by statute, then the meat shortage is solved. If not, we must aid and depend upon the citizenship of the nation. The cattle must not be thought of as something apart from, but considered rather with the general agricultural interests of the country.

Stock farming should be encouraged everywhere. The calves and yearlings will be needed at the silos and on the farms and ranches.

There is no reason for antagonism between the stockman and the farmer, and when conditions admit of it, one should be both, says a writer in Denver Field and Farm. They need the same protective legislation for their premises, for the health of their stock, preservation of bird life and the destruction of predatory wild animals.

We would advise every man who can do so to hold his good breeding cows off the market, because there is good grass on the range, and roughness on the farms going to waste while millions of people in the United States will go without beef in the next ten years.

The cow in the hands of the man now able to hold her is the only source of relief in sight and she will return her owner a good profit.

DEVICE FOR TYING UP WOOL

Five Pieces of One-Inch Boards, Hinged Together, Will Be Found Quite Serviceable.

A device for tying up the fleeces after shearing may be made by taking five pieces of one-inch boards 12 or 14 inches square and hinging them together so when folded up they will make a square box, writes F. W. Eichmeyer in Missouri Valley Farmer.

Wool Tyer Spread Out.

flat on a table, and lay down two lengths of twine, crossing them in the center and drawing them down in the saw cuts made on the edges to hold them in place, allowing enough end to tie. Lay on the fleeces, pell side down, gather all scraps and roll the wool to center from all sides, then bring up the sides of box and hook them together. Tie your twine crossways, and you will have a compact bundle.

Soft-Meated Fowl.
The only way to secure a soft-meated bird is to keep them growing "from hatch to hatch."

W. L. DOUGLAS

MEN'S \$2.50 \$3 \$3.50 \$4.00 \$4.50 \$5 \$5.50 SHOES
WOMEN'S \$2.00 \$2.50 \$3.00 \$3.50 & \$4.00 SHOES
BOYS' \$1.75 \$2 \$2.50 \$3.00 MISSES' \$2.00 & \$2.50

YOU CAN SAVE MONEY BY WEARING W. L. DOUGLAS SHOES

W. L. Douglas shoes are made of the best domestic and imported leathers, on the latest models, carefully constructed by the most expert last and pattern makers in this country. No other make of equal price, can compete with W. L. Douglas shoes for style, workmanship and quality. As comfortable, easy walking shoes they are unsurpassed.

The \$3.00, \$3.50 and \$4.00 shoes will give as good service as other makes costing \$4.00 to \$5.00. The \$1.50, \$2.00 and \$2.50 shoes compare favorably with other makes costing \$2.00 to \$3.00. There are many men and women wear Douglas shoes and they will tell Douglas shoes cannot be excelled for the price.

CAUTION! When buying W. L. Douglas shoes look for the NAME AND PRICE stamped on the bottom. Shoes thus stamped are always worth the price paid for them. For 25 years W. L. Douglas has guaranteed their value and protected the wearer against high prices for inferior shoes by having his NAME AND PRICE stamped on the bottom before they leave the factory. Do not be persuaded to take some other make claimed to be just as good. You are paying your money and are entitled to the best. If your dealer cannot supply you, write for Illustrated Catalog showing how to order by mail.

W. L. Douglas, 210 Spark St., Brockton, Mass.

A Difference.
"Does Mrs. Holdup play bridge?"
"No; she works it."—Baltimore American.

Important to Mothers
Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Charles H. Fletcher* In Use For Over 30 Years. Children Cry for Fletcher's Castoria

Unreasonable.
"Your board bill is two months in arrears, Mr. Hallroom. Can you give me something on account?"
"Good heavens, woman! Do you suppose I'd stay here if I had money enough to pay for my board?"

CUTICURA COMPLEXIONS

Are Usually Fresh and Clear, Soft and Velvety. Try One.

The Soap to cleanse and purify, the Ointment to soothe and heal. Thus these supercreamy emollients promote and maintain the natural purity and beauty of the skin, scalp, hair and hands under conditions which if neglected might disfigure them.

Sample each free by mail with Book. Address postcard, Cuticura, Dept. XY, Boston. Sold everywhere.—Adv.

His Question.
"Seven men out of every ten are confounded bores!" emphatically declared Alexander Akiniside, the dyspeptic dissertationist.

"Why except the other three?" snarled J. Fuller Gloom, the widely known and cordially detested misanthrope.—Judge.

Getting All Sewed Up.
It was several days after arriving home from the front that the soldier with the two broken ribs was sitting up and smoking a cigar when the doctor came in.

"Well, how are you feeling now?" asked the latter.

"I've had a stitch in my side all day," replied the wounded soldier.

"That's all right," said the doctor. "It shows that the bones are knitting."

Always in the Making.
In one of George Macdonald's books occurs this fragment of conversation:

"I wonder why God made me," said Mrs. Faber, bitterly. "I'm sure I don't know what was the use of making me."

"Perhaps not much yet," replied Dorothy; "but then he hasn't done with you yet. He is making you now, and you don't like it."

It would give us more patience with ourselves if we always remembered this. We would not get so discouraged with our infirmities, imperfections and failures if we always kept in mind the fact that we are not yet made, that we are only in process of being made, that God is not yet through making us. —Rev. J. R. Miller, D.D.

As Seeing the Invisible.
No great purpose has ever been achieved by any individual until his spirit has first gone out into some wilderness solitude and there discovered its native strength, its absolute invincibility when it relies upon no help but that of God. This is the experience of all the greatest among men. They go apart from their fellows for awhile, like Moses, into the land of Midian, or like our Lord himself into the wilderness, or like St. Paul into the Arabian desert, and there, in solitary communion with God, from that highest of all companionships, they drink in strength to fit them for the work of our lives.

Alone with God, they see visions which fill their souls, visions which never fade afterward even in the light of common day, but which serve as beacon lights to guide them, through storm and darkness, till the purpose of their lives is fulfilled.—Edwin H. Eland.

Just for You!

Post Toasties are made for the purpose of affording you all the enjoyment and satisfaction that the four sides, top and bottom of the big package can hold.

Only the inner sweetmeat of the choicest Indian corn is used. These selected bits of corn are cooked, seasoned just right, rolled and toasted till they are big, crackly, golden-brown crisps—

Post Toasties

Then into the big, familiar, yellow carton, go the Toasties—fresh-sealed!

The wax wrapper keeps out moisture, dust and taint, and you get these flakes just as they leave the factory ovens—fresh, crisp and delicious, ready to serve direct from the package.

Post Toasties are so superior to the ordinary brands of "corn flakes" that you will be well repaid for making the distinction in name.

There's a package for you at your grocer's—ask for

Post Toasties

—the Superior Corn Flakes

If you could visit the W. L. Douglas factory at Brockton, Mass., and see how carefully the shoes are made, and the high grade leathers used, you would then understand why they look and fit better, hold their shape and wear longer than other makes for the price.

W. L. Douglas shoes are sold through 90 stores in the large cities and shoe dealers everywhere.

BEWARE OF SUBSTITUTES

RETURNED RIGHT ANSWER

Night Watchman in Department of Justice Scored a Hit "on His Own Judgment."

Not long ago a brand new watchman was appointed as a night guard in the department of justice. He assumed his duties, filled with the importance of his responsibilities. In instructing him an official said:

"Now, if anything unexpected happens during the night just use your own judgment in dealing with the matter."

That night, as the watchman sat at the door, there came a wire from some official in California asking the department whether there was any law against such a thing.

Now this was the time, so thought the watchman, to "act on your own judgment." He gave the boy a reply which read: "I don't know of any," and the telegram was sent.

A high official learned of the matter and placed it before the attorney general. That officer smiled at the answer given and remarked: "Well, he's right about it—I don't know any law against it, either."—Washington Star.

Baseball.
"The team is playing pretty good ball these days."
"Yes, they've practically got over the effects of their spring training trip now."

A tresome man's favorite subjects are home, mother, heaven, liberty, justice and patriotism.
