

WAS MISERABLE COULDN'T STAND

Testifies She Was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Lackawanna, N. Y.—"After my first child was born I felt very miserable and could not stand on my feet. My sister-in-law wished me to try Lydia E. Pinkham's Vegetable Compound and my nerves became firm, appetite good, step elastic, and I lost that weak, tired feeling. That was six years ago and I have had three fine healthy children since. For female troubles I always take Lydia E. Pinkham's Vegetable Compound and it works like a charm. I do all my own work."—Mrs. A. F. KREAMER, 1674 Electric Avenue, Lackawanna, N. Y.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

Women who suffer from those distressing ills peculiar to their sex should be convinced of the ability of Lydia E. Pinkham's Vegetable Compound to restore their health by the many genuine and truthful testimonials we are constantly publishing in the newspapers.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

How Did She? "You can't tell me that woman believed your story about being a gentleman in reduced circumstances," said one weary hobo. "Yes, she did. She told me so." "How did she come to give you a knife to eat your pie with then?"

Feel All Used Up?

Does your back ache constantly? Do you have sharp twinges when stooping or lifting? Do you feel all used up as if you could just go no further? Kidney weakness brings great discomfort. What with backache, headache, dizziness and urinary disturbances it is no wonder one feels all used up. Doan's Kidney Pills have cured thousands of just such cases. It's the best recommended special kidney remedy.

A Virginia Case
"Every time I tell a story," Mrs. R. H. Dawson, 409 N. West St., Alexandria, Va., writes: "My back was so stiff and lame, it was almost impossible for me to straighten after stooping. Sharp pains darted through my hips and mornings I could hardly get out of bed. The kidney secretions passed irregularly and I had little ambition. Doan's Kidney Pills put my kidneys in good shape and corrected the other trouble."

PAIN AND INFLAMMATION DISAPPEAR WHEN YAGER'S LINIMENT IS APPLIED

The Best Known Remedy For RHEUMATISM NEURALGIA SPRAINS BRUISES PAINS IN BACK WOUNDS, &c.

The Finest External Remedy For Man and Animal SOME TESTIMONY:
JAS. E. BAUM, Witty Hawk, N. C. writes: "I suffered with a most severe pain in my side, rubbed well with Yager's Liniment and the relief was instant. Also had a lump on my leg which caused a good deal of pain and trouble, after rubbing a few times with the liniment it entirely disappeared. My mother had suffered for some time with a pain in the breast. She used Yager's and after several applications it disappeared entirely. Many of my neighbors use it and claim there is nothing like it for relieving pain."

Sold by dealers in Large 25c. bottle Prepared by GILBERT DRUGS & CO., Inc., Baltimore, Md.

To cure constiveness the medicine must be more than a purgative; it must contain tonic, alterative and cathartic properties.

Tutt's Pills

possesses these qualities, and speedily restore to the bowels their natural peristaltic motion, so essential to regularity.

W. N. U., BALTIMORE, NO. 40-1915.

CARING FOR THE RAM

Head of Average Farm Flock Receives Little Attention.

Should Be Given Every Opportunity to Keep Strong and Healthy Before Breeding Season Begins—Give Abundance of Water.

Usually, the ram which heads the average farm flock receives very little care from the time he is turned out to pasture in the spring until the advent of the breeding season in the fall. Then, about the only thing which is done is to turn him in with the ewes and allow mating to occur at random. Perhaps this is the sort of care and management which results in many barren ewes and weak lambs.

The mating season is naturally one of severe strain on the ram and he should be given every possible opportunity to keep strong and healthy. This means that he ought to have the proper kind of care, even before the breeding season begins. Of course, if the pasture is plentiful, there is not any need of feeding anything else during the early part of the grazing season. However, as the hot weather comes and the grass becomes less abundant and less succulent, it may be advisable to feed other roughage or perhaps a little grain.

Especially during the month just preceding the mating season should the ram get the best of feed and care, for experience has shown that the ram

First Prize Winner Hampshire Ram.

which is gaining in condition at the opening of the breeding season will get more and stronger lambs than the ram which is in poor flesh. Oats is one of the best grains for use at this time.

In addition to providing plenty of pasture, and a small amount of grain during the late summer, the ram should have an abundance of water. The usual practice in pasturing the ram during the summer months is to place him in a small paddock or an orchard, where there is no natural water supply. Under such conditions it is necessary to supply water by artificial means. And when the water is supplied a little salt may be given once each week.

USES FOR MANURE SPREADER

Time and Labor Saved by Distributing Fertilizer—Vehicle Can Be Used as a Common Wagon.

Using the manure spreader for distributing fertilizer is another of those cases of saving time and labor over the old method of hand scattering. A spreader can be as quickly and easily loaded as a common wagon while the time required to unload is about one-fourth that of unloading by hand. Besides, the driver has a chance to rest while unloading the spreader, consequently he can load the spreader again quicker and easier than where he tires himself in unloading by hand. This saving in time and work enables one to do from two to three times more hauling, which of course reduces the cost accordingly.

But the greatest profit in connection with the work of the spreader is that of economy in the use of the manure. When distributed by the spreader it will cover two or three times as much land as when scattered by hand, for all lumps and hard pieces will be torn into fine particles and distributed evenly over the ground.

PROPER FEED FOR THE COLT

Fresh Pasture Grass is Excellent—Supplement With Oil Meal, Bran, Corn, Oats and Alfalfa.

Some farmers believe that a colt will make up as a horse the growth that it does not make as a colt. As a matter of fact a colt or any other young animal that is not kept growing is very likely never to become as large and strong as it would have been had it thrived while young. The colt should receive the proper kind of feed and be fed liberally. The feed should be nutritious and palatable. Among the best colt feeds is fresh pasture grass. This should be supplemented with oil meal, corn, oats, bran and alfalfa or clover hay.

Where it is possible to do so the colts should be kept in the stable away from flies during the day, given all the alfalfa or clover hay they will eat and one pound of the following grain mixture to each 100 pounds of colts: Six pounds of oats or corn, three pounds of bran and one pound of oil meal.—Ohio Bulletin.

Place to Pick Seed. Out in the field is the place to pick out your seed potatoes. Get them from the hills that have the finest potatoes and the fewest little ones.

TREATING HOGS WITH SERUM

Produces Immunity of Sufficient Duration to Allow Ample Time for Cleaning Up the Yards.

(By J. B. GINGERY, Missouri Experiment Station.)

The veterinary department of the Missouri agricultural experiment station has been recommending and using the serum alone treatment. The question is often heard, "Why the serum alone treatment?" The serum alone treatment properly administered has for its object the control and eventually the absolute eradication of hog cholera. It makes it possible in a large measure to do away with vaccination with its attending cost and trouble. The serum alone treatment is a safe method to use and is simple. It can be handled with good results by the careful inexperienced man. There are none of the bad after results such as sometimes follow other treatments.

Serum alone can neither start new outbreaks of cholera nor bring the infection on your noninfected farm. When administered under proper conditions it produces an immunity of sufficient duration to allow ample time for cleaning up and disinfecting the yards and in this way destroying the infection before the hogs outgrow the immunity. Under ordinary conditions this is of far greater importance than simply protecting hogs from the cholera for a varying period of time and not making any attempt to avoid harboring the germs. The germs, whether in the litter about the pen or in the virus of the double treatment, will cause the disease to develop. If cholera is to be controlled it is necessary to destroy the germs. The use of the serum alone is to protect the hogs until the germs can be destroyed by cleaning up, burning and disinfecting.

PROTECT STOCK FROM FLIES

Fine Spray of Kerosene Oil is Effective in Keeping Insects Off Animals—Other Remedies.

Sometimes a fine spray of pure kerosene is very effective in knocking off flies. This spray should not be heavy enough to penetrate the hair, or it will blister the skin. Another spray is made by the use of ordinary coal tar dip or creosote two parts, mineral oil four parts, water ten parts. This is usually put on with a brush or a sponge.

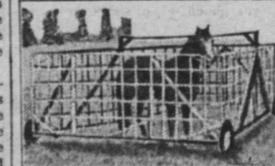

Of the mixtures classed as "repellents," the following is supposed to be very good: One gallon fish or whale oil; one pint coal oil; two ounces crude carbolic acid. A little melted resin is supposed to make these mixtures stick to the hair a little better. Another remedy suggested is ten parts lard or axle grease to one part of pine tar. Such mixtures are usually disagreeable to apply, and the bad odor is generally a greater nuisance than the presence of the flies.

The principal advantage of light sprays is that they drive the flies away during milking time. These have to be applied every day and do not keep the flies off very long. The repellent mixtures are usually applied twice a week, and will keep flies off from two to four days.

PASTURE FENCE ON WHEELS

Interesting Solution Offered by Illinois Farmer to Problem of Caring for Spirited Horse.

A portable pasture fence, made out of the framework of set pieces of fireworks, is the interesting solution offered by an Illinois farmer to the problem of caring for a spirited horse which runs itself out in a large mead-

Excellent for Nervous Horse.

ow. The little pasture is 16 by 20 feet and the fence is mounted on wheels. One man can move it easily. The horse seems quite contented, and when one piece is grazed sufficiently, the fence is moved to a fresh piece.—Popular Mechanics.

BALANCED RATION FOR EGGS

Satisfactory Feed is Made of Corn, Wheat, Oats, Alfalfa, Beef Scraps and Linedseed Meal.

The following ration is fairly well balanced for egg production: One hundred and fifty pounds each of cracked corn and cracked wheat, 20 pounds each of wheat bran, middings, cornmeal ground oats and gluten meal, 30 pounds beef scraps, five pounds each of alfalfa meal and old process linseed-oil meal.

For hens having free range of the farm, a very simple ration is made of equal parts cracked corn and cracked wheat, and a dish of beef scraps to which they can help themselves.

Good Land Wasted. Get after the old briars and weeds along the line fence. Why not use the old mower that has been superseded by a new one. It would be interesting to know just what proportion of good land in this country is allowed to go to waste along line fences.

Too Noisy. "You have to get a new night watchman, boss."
"Why, what's the matter, Bill, I thought you liked the job?"
"Oh, I did at first, but this street's got so noisy I can't sleep at wink at night now."

A Small Percentage. City Man—How many servants do you keep?
Suburbano—About one out of twelve.

One Danger. Optimist—The world owes me a living.
Pessimist—Look out that it doesn't declare a moratorium.—Judge.

Optimist—What do you consider the greatest thing that ever happened? Pessimist—It hasn't.—Puck.

The brakemen often follow instructions too closely. Some men should be permitted to forget their "back-ages."

CHECK NEEDED TOUCHING UP

Bank Cashier Handled the Subject Diplomatically, but Sensitive Mr. Brushly Was Annoyed.

"This check of yours," said the large-hearted cashier to Brushly, the impressionist painter, "is drawn exceedingly well, and in composition seems to be pretty nearly perfect; but it lacks background, Mr. Brushly. But for that it would be a work of art. Your foreground is charming, but just a trifle too—well, shall we say too fanciful?"

"I don't know what you are driving at," growled Brushly. "I suppose you know what you mean, however. What kind of a background would you suggest?"

"Cash!" said the cashier. "A work of art like this, calling for the payment of \$50, is not wholly convincing with a sketchy little overdraft of \$2.99 on deposit to provide the necessary contrasts in light and shade and to give the thing what we might call balance."

Whereupon Brushly, like the self-respecting man he was, snapped his fingers under the impudent fellow's nose and transferred his overdraft to the trust company across the street.—Judge.

Lord Kitchener, it is said, is very pleased with the result of the present temperance move.

"We are all temperate now," said his lordship recently.

"To get drunk is an unheard-of thing among gentlemen. If a gentleman ever gets drunk nowadays he has, you may be sure, a remarkable excuse to offer." To illustrate his point Lord Kitchener told this story:

A major, after a fancy dress ball at St. Paul, came home drunk and his shocked wife said to him:

"Aren't you ashamed to return from the ball in that condition?"

"Don't blame me, my dear," said the major; "you must remember that the character I assumed was that of a sponge."

Hardly Complimentary. A New England housewife one afternoon received a call from a hobo to whom that morning she had given some doughnuts.

The knight of the road doffed his ragged headpiece and with great civility addressed her thus:

"Madam, this morning you gave me three doughnuts. Would it be asking too much to request a fourth?"

"I'll be glad to give you another," said the woman, as she prepared to wrap one in a newspaper. "So you like my doughnuts, do you?"

"Isn't that, madam," explained the hobo. "You see, some friends of mine down in the meadow wish to have a game of quoits."

No Cause for Alarm. A young preacher who was staying at a clergy house was in the habit of retiring to his room for an hour or more each day to practice pulpit oratory. At such times he filled the house with sounds of fervor and pathos and emptied it of almost everything else.

A well-known bishop happened to be visiting a friend in this house one day when the budding orator was holding forth.

"Gracious me!" exclaimed the bishop, starting up in assumed terror, "pray what might that be?"

"Sit down, bishop," his friend replied. "That's only young D.—practicing what he preaches."

Picked a Real American Name. A somewhat unpatriotic little son of Italy, twelve years old, came to his teacher in the public school and asked if he could not have his name changed.

"Why do you wish to change your name?" the teacher asked.

"I want to be an American. I live in America now."
"What American name would you like to have?"
"I have it here," he said, handing the teacher a dirty scrap of paper on which was written "Patrick Dennis McCarty."

The General says: When you find this label on a roll of Asphalt Roofing it is guaranteed by its maker who knows how well it is made. Your own local dealer will tell you all about the responsibility that stands behind our guarantee on

Certain-teed Roofing

The guarantee of 5, 10 or 15 years for 1, 2 or 3 ply Certain-teed is backed by the largest Roofing and Building Paper Mills in the world. This roofing has given excellent service on all classes of buildings for years and years. It costs less and gives a better service than metal roofing, wood shingles, and many other types of roofing.
