Penna. Live Stock Banks High.
 Pennsylvania farms contain slightly over two per cent. of all the live stock in the United States according to statistics prepared by the State Department of Agriculture.
 The statistics show that Pennsylvania's two per cent. of live stock is valued at 2.8 per cent. of the entire valuation of \$6,002,784,000 placed upon the live stock in the United States and that the average price per head for horses, mules, milch cows, sheep and swine is higher in this State than the average price per head of the stock of the nation. For cattle other than milch cows the Pennsylvania average is \$29.00 per head against a national average of \$33.49 per head. This difference in price is due, in a large measure, to the fact that Pennsylvania is a buying rather than a producing State in feeder cattle. The average price of cattle, however, has shown an increase in recent years owing to the introduction of pure bred stock.

Pennsylvania has on its farms 2.8 per cent. of all the horses in the United States, and they are valued at 3.4 per cent. of the estimated value of the horses of the nation. One per cent. of the mules of the country are found in the State and are worth 1.1 per cent. of the entire valuation. With milch cows, Pennsylvania boasts of 4.3 per cent. of the entire number of the country and they are worth 4.5 per cent. of the total valuation. Sheep are worth 1.7 per cent. of the national value, although the percentage of number is but 1.6 per cent. There are in the State 1.7 per cent. of all the swine in the country and they have a value of 2.4 per cent. of the estimated value of the swine of the United States. With other cattle the percentage of the total number is 1.8 per cent. with a valuation of 1.4 per cent., showing the only live stock in which the State falls below the national average.

Pennsylvania horses have an average value of \$121.00 per head against \$101.60 for the United States; mules \$128.00 against \$113.87; milch cows \$55.50 against \$53.60; sheep \$5.40 against \$5.17 and swine \$11.80 against \$8.40.

NATURE'S ENDOWMENTS

Little Talks on Health and Hygiene by Samuel G. Dixon, M. D., L. L. D., Commissioner of Health.

Many people make the error of looking upon health as a crude possession that Nature bestows now and again in defiance of her own laws. True, from time to time we meet splendid specimens of manhood and womanhood that apparently resist unusual hardships in an environment which would not seem conducive to good health but in Nature nothing thrives in the long run which is not given proper conditions.

Every violation of the laws of Nature makes its impression on the vitality of man who loses his resistance at every blow until the injury is so great that it becomes manifest to our grosser senses.

The maintenance of health is today based upon both science and art. Fortunately it is within the reach of the vast majority of our people and the man or woman who realizes the value of self control has learned the first principle.

Appreciation of the things most worth while never comes from excessive indulgence. A rational life is fairly certain to be an important factor in health and happiness. Many a man or woman who Nature has endowed with but a medium physique has cultivated and maintained a degree of bodily health sufficient to insure them a rational and pleasurable life. On the other hand many a physical giant has so presumed upon Nature's endowment as to have wrecked that most precious gift—a good constitution.

For Treatment of Hog Cholera.

With the approach of the open spring weather farmers should be on guard against the appearance and spread of hog cholera in their herds. Suggestions for the prevention and treatment of hog cholera as outlined by the Pennsylvania State College School of Agriculture and Experiment Station include the following:
 1. Feed clean food and properly balanced rations. 2. Keep troughs clean and free from dirt and filth, and disinfect pens with a dip solution once a week. 3. Put all new hogs in quarantine for two weeks before putting them in with the clean herd; never peddle a boar around for service; never breed to a peddler boar, nor allow a boar to serve strange sows. 4. Watch out for birds and dogs as carriers of infection; never allow a neighbor to enter the hog pen if there is a strange disease among his hogs, and keep away from his pen also. 5. Keep a mixture of charcoal, salt and sulphur in a clean, dry place, where it will be accessible to hogs all the time. 6. In an outbreak notify a competent veterinarian or the Live Stock Sanitary Board, Harrisburg. In case of hog cholera remove healthy hogs from infected pens and vaccinate them. 8. Burn dead hogs and refuse, clean up pens and thoroughly disinfect premises.

The twenty-first annual meeting of "Group Six" of the Pennsylvania Bankers' Association will be held in Altoona, Saturday, John D. Meyer, cashier of the Second National Bank, Altoona, is secretary and treasurer of the association. The members of "Group Six" are Bedford, Blair, Cambria, Centre, Clearfield and Huntingdon counties. There are seventy-six banks in the district and the following are in Centre county: Farmers National Bank, Millheim Banking Co., Millheim; First National Bank, State College; Snow Shoe Bank, Snow Shoe; First National Bank, Howard; Centre County Banking Co., First National Bank, Bellefonte Trust Co., Bellefonte; First National Bank, Moshannon National Bank, Philipsburg.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.
 We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.
