SPRING TONICS.

Little Talks on Health and Hygiene by Samuel G. Dixon, M. D., LL. D., Commissioner of Health. With the hunk of the wild geese flying northward the patent medicine and home remedy manufacturers seem inspired anew and there follows a wave of spring tonic advertisements. The tonic which the vast majority of individuals need at this period of the year is fresh air, exercise and a simpler diet. Owing to weather conditions many of our activities are restricted in the winter time. There is also a tendency to eat excessively of meat and fatty foods. As a result when the spring arrives with its warm days rosy of us are like a furnace that has been so choked with fuel that it doesn't draw well. You cannot buy relief from these conditions at a dollar a bottle. Medicine will not make up for over eating and under exercise. The high death rate which almost invariably prevails at this season of the year from pneumonia, tuberculosis and other respiratory diseases is largely due to the reduced physical resistance of individuals, which makes them particularly sensitive when the sudden changes of temperature occur which are common at this time of the year. Old people are susceptible as they are housed more closely during the winter time than young folks.

Let your spring tonic prescription read something as follows: 1. Eat meat but once a day and sparingly. 2. Those not under the doctor's care should take a glass of water before retiring for the night and one an hour before breakfast. 3. Get all the fresh air possible. 4. Sleep with your windows open. 5. See that your clothing is heavy enough to protect you against sudden changes of weather. 6. Walk in the open air five or six miles a day.

Will Drive Milk Route. The undersigned will hereafter serve all residents of Centre Hall borough, who are in need of it, a good quality of milk at six cents per quart. Wagon started on Monday morning and will continue daily hereafter. The milk is derived from a herd of young and well kept cows and perfect cleanliness is assured as all milk is run through separator and remixed before served to customers. Let us serve you.—D. F. SMITH, adv.p'd.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J.
