Monday is a hard day. But not so hard that it should give you the blues. Neither should the end of the day find you nervous, done out, fit for nothing but bed.

It's not necessary-not if you'll replace your range with a New Perfection Oil Cook Stove. For it's the range that's responsible for the fuss and the fume and for the terrible heat of the kitchen.

With a coal range there's no way out

of keeping a roaring fire going the whole heat a few boilers of water. But with a Perfection wash day loses its terrors. The flame is kept going only as long as it is in actual use, your kitchen can't become unduly warm, and meals can be prepared just as usual.

REFINING CO.

New day long and just to PERFECTION

Ask your dealer to explain the conveniences of a Perfection. Then have him tell you how little kerosene it uses and how cheap kerosene is.

Don't think all kerosenes are the same. They're not. No more than all sugars are identical. Of course, you know that cane sugar is better than beet sugar and you buy accordingly. But what, perhaps, you don't realize is that Atlantic Rayolight Oil differs from other kerosenes in that it burns

without smoke or smell, without charring wicks, but with an intense heat. It never varies. Each gallon of Rayolight is precisely the same. And don't forget that the use of Rayolight lengthens the life of any oilburning device.

Ask for Atlantic Rayolight Oil by name—at all dealers who display this sign:
