**New Designs for "Half," "Quarter" & "Dime."**

Dimes, quarters and half dollars of new designs will be minted after July 1, according to an announcement made by Secretary McAdoo last week. For the first time since 1891 a change will be effected in these pieces. Mr. McAdoo disclosed that the half dollar has fallen virtually into disuse. The new design was selected with the hope of restoring the coin to more general circulation, it was indicated. The half dollar and dime models were made by Adolph A. Weinman and the quarter dollar by Hermon A. MacNeil. Both are sculptors of note.

The face of the new half dollar bears a full length of Liberty, with a background of the American flag flying with the breeze. The goddess is striding toward the dawn of a new day, carrying laurel and oak branches, symbolic of civil and military glory. The reverse side shows an eagle perched high upon a mountain crag, wings unfolded. Growing from a rift in the rock is a sapling of mountain pine, symbolic of America.

The design of the 25-cent piece is intended to typify the awakening of the country to its own protection, Secretary McAdoo's announcement states. Liberty, a full length figure, is shown stepping toward the country's gateway, bearing upraised a shield from which the covering is being drawn. The right hand bears an olive branch of peace. About the head is the word "Liberty" and below the feet "1916." The reverse bears a figure of an eagle in full flight, wings extended, and the inscription "United States of America" and "E Pluribus Unum."

Both the half dollar and the quarter bear the sentence, "In God We Trust."

**Farmers Visit State College.**

Four hundred farmers and their families from Chester and Lancaster counties took advantage last Friday of the first one-day excursion of the season to inspect State College and inquire into its agricultural experiments. Wagons of every description met the visitors at the train and conveyed them to the college farms of 1200 acres.

**What We Hear About Our Ice Cream**

"That's smooth cream."

"You sure must use REAL cream in making this ice cream."

"That's the best made cream I ever ate."

These and many other similar expressions are made each day by people who try our cream for the first time. The second statement above tells the story—REAL CREAM—that's it, good ice cream can only be made with rich creamy cream, and that's all we use.

**ENJOY your MEALS**

Can't, if you're too done up to eat. And you're bound to tire, after a morning in the kitchen, over a coal range. For it's wearing, beyond a woman's strength, to carry wood and haul coal from bin to kitchen.

And you can't control the heat of a coal range. Most times you've far more heat than you need—a waste of fuel—that turns the kitchen into a nerve-racking furnace.

A New Perfection Oil Cook Stove offers you a way to end kitchen drudgery and at the same time to economize, for the Perfection burns kerosene, the cheapest fuel. Think—no coal, no wood, no shaking, no ashes, no fear of the fire going cold. Instead, heat when you want it and exactly as much as you want.

A New Perfection is inexpensive. Ask

your dealer to show you its fireless cooker, its separate oven, its combustion chimney, its long-lasting wick. Be sure, though, you use Atlantic Rayolight Oil in your Perfection. That's essential. For it is just as necessary to discriminate in buying kerosene as it is in selecting flour. It takes use to prove either. You don't have to buy a flour on trust; neither need you take a chance on kerosene.

For you can ask for Rayolight with the positive assurance that every gallon will be like every other gallon. A kerosene that will burn without smoke or smell, but that will yield a great and a cheap heat.

With all its advantages Rayolight costs no more than ordinary, unreliable kerosene. Buy it by name, where you see this sign:
