STATE AGRICULTURAL NOTES.

Reports from Somerset county indicate that the maple sugar crop is just about fifty per cent. of an average production.

In Monroe county several farmers are reported to have quit farming because they were unable to get the necessary help.

Thousands of young fruit trees have been destroyed in Susquehanna county by the gray rabbits which are reported to be very numerous.

The early swarming of bees is taken as a good sign for a profitable and abundant honey production. Many reports indicated swarming early in May.

General improvement was noted throughout the state in the condition of the wheat and rye on June 1 and every indication points to a crop above the average.

Lawrence county farmers claim that a greater per centage of farmers spray in Wilmington township than in any other section of western Pennsylvania.

The Pennsylvania Department of Agriculture is urging farmers to label their goods and asking consumers to purchase only Pennsylvania farm products on their local markets.

Philadelphia reports young chicks very scarce and poor results from hatching eggs. This condition is general throughout the State where results of hatching are reported poor.

Corn planting in many sections of the State is later this year than it has ever been known before. The frequent rains have made it impossible for the farmers to get their ground in shape.

The red peach beetle has made its appearance in Clarion county and the orchard inspectors of the Pennsylvania Department of Agriculture are working to eradicate it and stop the spread.

The Federal "standard" barrel law becomes effective July 1. The law requires that barrels used in the sale of fruits and vegetables must contain 7,056 cubic inches or 105 quarts, which is approximately three bushels.

Farmers in those sections of the State where there are canneries are looking for a prosperous season and are planting many tomatoes and sowing sweet corn. Stocks of canned goods have been cleared up on account of the war in Europe and the canneries are expected to have a busy season.

County chairmen of Farmers' Institutes are preparing for their meetings for the Fall and Winter seasons and selecting the places and dates at which institutes are desired. The requests for these agricultural schools for the farmers of the State are becoming greater each year, as the practical talks by the State instructors have proven a wonderful boom to farming in the State.

BACK YARDS AND CHARACTER.

Little Talks on Health & Hygiene by Samuel G. Dixon, M. D., LL. D., Commissioner of Health.

Bert Hart once wrote a story in which he pointed out that for an insight into the occupant's true character one must look at the back and not at the front of a man's house. Here was knowledge of human nature. If we want to estimate character accurately we must have an all around view and not accept face values.

This brings us again to the question of back yards. Is your's as clean and well kept as you can make it or is it littered with trash, cans, kindling and other rubbish? Is the garbage and waste properly covered and free from flies? Is the stable and out-house a fly breeding center for the neighborhood? You have work ahead of you for your health's sake and for the sake of decency if any of these conditions exist.

It is a privilege to have a back yard, even a small one. There are thousands of dwellers in cities where land is sold by the square foot, who yearn for a little space to call their own. Those who are so fortunate as to have back yards should care for them and make use of them.

If there are children in the family the back yard should be their playground. A doll house, turning pole, a swing or a tent will provide almost unlimited entertainment and help to keep children off the streets.

If there are no children in the family, a shovel, a rake, a hoe and a moderate sized back yard garden should afford a reasonable amount of healthful exercise combined with pleasure and profit.

Reports from Lehigh county state that the Hessian fly has made its appearance in the wheat.

What We Hear About Our Ice Cream

"That's smooth cream."

"You sure must use REAL cream in making this ice cream."

"That's the best made cream I ever ate."

These and many other similar expressions are made each day by people who try our cream for the first time. The second statement above tells the story—REAL CREAM—that's it, good ice cream can only be made with rich creamy cream, and that's all we use.

Monday is a hard day. But not so hard that it should give you the blues. Neither should the end of the day find you nervous, done out, fit for nothing but bed.

It's not necessary—not if you'll replace your range with a **New Perfection Oil Cook Stove**. For it's the range that's responsible for the fuss and the fume and for the terrible heat of the kitchen.

With a coal range there's no way out of keeping a roaring fire going the whole day long and just to heat a few boilers of water. But with a **Perfection** wash day loses its terrors. The flame is kept going only as long as it is in actual use, your kitchen can't become unduly warm, and meals can be prepared just as usual.

Ask your dealer to explain the conveniences of a **Perfection**. Then have him tell you how little kerosene it uses and how cheap kerosene is.

Don't think all kerosenes are the same. They're not. No more than all sugars are identical. Of course, you know that cane sugar is better than beet sugar and you buy accordingly.

But what, perhaps, you don't realize is that **Atlantic Rayolight Oil** differs from other kerosenes in that it burns without smoke or smell, without charring wicks, but with an intense heat. It never varies. Each gallon of **Rayolight** is precisely the same. And don't forget that the use of **Rayolight** lengthens the life of any oil-burning device.

Ask for **Atlantic Rayolight Oil** by name—at all dealers who display this sign:
