The Philadelphia Record.

The average man has less than an hour to devote to newspaper reading on week days. The daily issue of "The Philadelphia Record" therefore gives him the news in concise and attractive form, so arranged that he can grasp the essentials of the day's history of the world without a moment's loss of time and find any particular item under its appropriate classification, just where he is accustomed to look for it. Sunday, however, is a day of leisure. The Sunday newspaper reader has time for mental recreation, and demands it. The Sunday issue of "The Philadelphia Record" gives it to him, copiously, and yet with the discrimination that marks the difference between first-class and indifferent Sunday reading.

"The Sunday Record" has just added to its already abundant informative and entertaining features a new eight-page story section which is bound to appeal strongly to popular interest.

Good fiction appeals to the whole family—and there are scores of other features in "The Sunday Record" that help to account for its eager reception in cultivated homes. The addition of its new story section makes "The Philadelphia Record" a complete Sunday newspaper.

STATE AGRICULTURAL NOTES.

Caterpillars are said to have destroyed a portion of the apple crop in Bucks county.

Farmers have had unusually hard luck with pigs this spring and many were lost at farrowing time.

There has been a marked increase in the acreage of tobacco planted in Lancaster county and a corresponding decrease in the oats acreage.

The increasing number of silos being built by farmers is said to have brought about a larger acreage of corn planting in many sections.

The first cutting of alfalfa is now going on in Pennsylvania and farmers are reporting a fine crop. The acreage is increasing steadily each year.

Twenty-seven counties report the condition of wheat up to or above the average and present indications are for a decided increased production over last year.

June reports indicate that the peach yield throughout the State will be about sixty per cent. of an average crop and about seventy per cent. in the peach belt.

Peach leaf curl is unusually prevalent in many sections of the State and fruit growers claim that the rains have severely interfered with the fertilization of the peach blossoms.

Farmers throughout the State report that the apple trees were more abundant with blossoms than for many years and indications point to almost an average crop which will be twenty per cent. more than last year.

Mr. Metzger and Russell Auman, both of Rebersburg, on Thursday held an aluminum demonstration at the Lutheran parsonage where about twenty women were assembled to learn the latest in cooking utensils.

On Friday afternoon Mr. and Mrs. H. E. Crouse were taken quite by surprise when two auto loads, comprising twelve people, arrived from Hollsopple, Somerset county. They were all relatives. Mrs. Crouse was equal to the occasion and in short time had prepared an excellent supper. J. H. Crouse took care of a number at his home for the night, and next day all returned home, feeling that they had indeed passed a most enjoyable day.

Turkey Crop Disappearing.

The turkey crop of Pennsylvania seems to be slowly disappearing. At the risk of being severely criticized W. Theo. Wittman, poultry adviser of the Pennsylvania Department of Agriculture, in a recent interview stated as his belief that the reason for this was that the farmers and growers generally were to blame, and that it was not due to black-head or any other old or new disease. Mr. Wittman points out the fact that the wild turkey, the direct and close-by progenitor of our domestic turkey, was and is a native of this state and that turkeys should do well, and would do well here if handled properly.

The notion that turkeys need housing and heavy feeding is the biggest mistake. Any that are so deteriorated as to need this, or cannot do without it, should die and the quicker the better. If the breeding stock is fat and fed heavily, or does not sleep outdoors and get most of its feed by ranging when laying, most of the little poults are sure to die. Nothing that can be

OUR UNEDUCATED GRADUATES.

Little Talks on Health & Hygiene by Samuel G. Dixon, M. D., LL. D., Commissioner of Health.

A great essential has been neglected in the education of the tens of thousands of young men and women who are graduating from the high schools and colleges of the country. They are presumed to have been fitted to meet the responsibilities and problems of life. In the majority of instances they have had mental but not physical education.

Some few have devoted themselves to a greater or less degree to competitive sports. This number is but a small fraction of those who pass through our schools. Our curriculums are often so planned that they make physical development difficult or impossible. To lay the foundation of health there should be proper physical training under the supervision of specially trained medical men beginning in the elementary school and going through the college course. A few years of training in youth and early manhood and womanhood would serve to instill habits of personal hygiene which would add inestimably to our future welfare, individually and as a Nation.

In every activity of life good health is a primary essential. No mental attainment can make up for a puny, ill-nourished, ill-developed body. Lack of well developed physique almost invariably proves a handicap to achievement. Our present system has failed to bring about a balanced education of mind and body. Individual efficiency and preparedness for the uncertainties of life depend upon this.

Today Sweden is leading the world in systematic education with a resulting high average of citizens individually prepared to take their part in the defense of their homes. Three thousand years ago the Greeks appreciated and practiced in the education of their youth this happy combination. It was this training that produced the scholars and heroes whose names live in the world's history.

What We Hear About Our Ice Cream

"That's smooth cream."
"You sure must use REAL cream in making this ice cream."
"That's the best made cream I ever ate."

These and many other similar expressions are made each day by people who try our cream for the first time. The second statement above tells the story—REAL CREAM—that's it, good ice cream can only be made with rich creamy cream, and that's all we use.

LESS WORK—More Done—Greater Leisure

You get up three meals a day, bake a cake or something of the sort. That, with the rest of your housework, eats up your day, gives you no leisure and leaves you completely fagged.

A Perfection is always ready to boil, fry, bake, roast—to do any kind of cooking without any preliminaries.

Now, it isn't the actual cooking that takes up so much time or that's so exhausting. No, it's looking after the kitchen range. Starting the fire, watching that this doesn't burn or that doesn't cook too slowly. And all the time you're standing over a roaring fire—a veritable drudge.

Have your dealer show you its fireless cooker, its separate oven and all its other refinements. And it burns kerosene, the cheapest of fuels—burns it slowly.

But with a New Perfection Oil Cook Stove you do less work, get more done and you have greater leisure.

But don't be satisfied with just any kind of kerosene. For just as butter differs from oleo, Atlantic Rayolight Oil excels ordinary kerosene. So
