Fred Lose, the local baseball pitcher, left for Fort Wayne, Indiana, on Monday where he has accepted a position as pitcher for the Fort Wayne shop team. It certainly leaves the home boys in bad shape.

**Wagoner Buys Snyder Co. News.**  
The Snyder County News, Barton and Gouger editors, was sold on Friday to George W. Wagoner, editor of the Middleburg Post, who will merge the paper with his own. The News was closely patterned after the Post and lacked individuality.

Asher Stahl came down from Altoona to spend the Fourth with his parents in this place.

Much worry and annoyance might be avoided if patrons of the parcel post division of Uncle Sam's great mailing scheme would have their packages insured. The rate is very low—three cents for a package of \$5.00 or less in value; five cents for \$25.00; ten cents for \$50.00; and twenty-five for \$100.00.

Messrs. J. E. Rishel and J. B. Spangler, Potter townships auditors, were callers at this office on Monday of last week to place the public school financial statement of Potter township district in the hands of the printer. A glance at the statement shows that the finances are in good condition, there being a cash balance of \$1253.50 in the treasury. An item of expense which stands out rather prominently is that for transportation of pupils. It cost just \$795.50 to transport pupils to the Centre Hill and Potters Mills schools last winter, made necessary by the loss of two school properties in the district.

**STATE AGRICULTURAL NOTES.**  
The plum crop, like peaches, is a partial failure, only about 60 per cent. of a normal yield being expected in the state.  
The wet weather has had its effect in reducing the acreage of potatoes over what was expected and the condition of the plants is not up to the average at this time.  
The corn is unusually backward and there has been a decided falling off in the acreage planted. Cutworms have given the farmers much trouble in the corn fields.  
Bulletin boards at the entrances of farms are becoming popular with the ever-growing number of automobiles. They advertise farm products for sale and attract many autoists to a direct and first hand market.  
Erie, Indiana and Potter counties report the condition of hay as twelve per cent. above the average while Bradford, Butler, Jefferson, Mercer, Tioga and Venango counties report the condition ten per cent. above the average.  
Dairy experts declare that there has been an improvement of almost fifty per cent. in the condition of the dairying cattle of the state during the past ten years and that farmers are beginning to realize the great advantage of pure bred or grade cattle.  
Encouraging reports have reached the Pennsylvania Department of Agriculture concerning the condition of the oats. While the acreage is not as large as last year the warm days of the latter part of June brought a big improvement in the fields sown to oats.

INFANTILE PARALYSIS.

Health commissioner Dixon Gives Advice on Disease Which is Exacting Heavy Toll of Infants at Present.  
Infantile Paralysis is a disease that affects the nervous system. It often causes death, and again, the acute stage frequently subsides and leaves paralysis of one or more of the limbs that heretofore has often lasted through life.  
Today we do not know what causes the disease, therefore preventive measures must be broad. You must keep the children away from insect life, such as flies, mosquitoes, fleas, bed bugs, ticks, ants, lice, etc. You should see that all rats and mice around the building are killed. Pet cats and dogs should be washed with a two per cent carbolic acid solution to destroy insect life. Everything should be kept clean about the home, including the children's bodies and clothing.  
Children should be fed well but not indulged in large quantities of water, ice cream or other frozen dishes on a full stomach, as that will often cause acute indigestion and render them susceptible to other diseases. In other words, the digestion should be guarded carefully.  
Children should have plenty of sleep. They should not associate with other children that are sick. Their homes should be well ventilated but screened from flies, etc., and any flies that happen to enter the building should be killed. All foodstuffs should be protected from flies, dust, etc. Fruit and vegetables eaten raw should be thoroughly washed in clean water.  
Children's mouths should be rinsed out and their throats gargled with Debell's solution after each meal. If the children are too young to rinse or gargle, wash the mouth with a piece of fabric, muslin or linen, that has been dipped in Debell's solution.  
Children should be kept out of crowded places and be denied the frequent access to crowded halls of entertainment during our present threat with epidemic.  
The youngsters should not be permitted to sit on the damp ground nor have their bodies thoroughly chilled, day or night. They should not bathe in cold water until their circulation is interfered with and they become chilly and blue.
