Decrease in Potato Crop.

The expected large increase in the acreage planted to potatoes on Pennsylvania farms this season has not materialized according to figures gathered throughout the State by the Pennsylvania Department of Agriculture.

Instead of an increase there has been noted a decrease of about three per cent. or 8,000 acres.

The condition of potatoes on July 1 was about 90 per cent. of the average and this indicates a total production in the State of about 18,030,812 bushels this year as compared with 20,502,000 bushels a year ago.

Last year the average production per acre was 75 bushels, but this year, according to present conditions, this average will be reduced to about 68 bushels an acre.

These figures may be increased with the August reports when more detailed figures upon actual crops can be secured.

Owing to the high price obtained for potatoes last fall and winter it was expected that the acreage would be largely increased, but the wet weather and condition of the ground at planting time made conditions so unfavorable that the results expected were not obtained.

INFECTED PIECE OF NATURE.

Little Talks on Health & Hygiene by Samuel G. Dixon, M. D., LL. D., Commissioner of Health.

Our streams once undefiled by man ran from the mountains to the sea in all of Nature's purity. They ran through our valleys and meadows in all their pristine beauty and offered to all animate nature that which would innocently quench the thirst of man and beast and help them live.

To-day it is not so. Man relentlessly, regardless of his brother down stream, now throws his waste and that of domestic animals into the waters flowing nearest his home.

In that with which Nature has endowed much of our territory more richly than many other countries, we now find lurking poison has been hidden, in some cases only to be seen by the aid of the microscope.

Now is the season when we travel the country to be happy and lay up energy and strength for the toil of the coming winter. Alas! The want of intelligence and care makes us deaf to the teaching of preventive medicine and we quench our thirst at the stream we run across regardless of its purity, and often the sparkling tumbler of water is only to be compared with the draught of the deadly hemlock.

The parched lips have been molten and the thirst satisfied but the day of judgement too often comes bringing the development of typhoid fever which in years past we could only compare with some of the plagues that ravaged our ancient cities.

Those of us who collect, tabulate, and have ever before us the statistics that show the suffering and sorrow that still continue from typhoid fever, beg you to awaken to that which causes so much distress. By proper care it can be avoided.

Never drink out of an unknown surface stream. When traveling see that pure water is carried along as well as food, otherwise the harvest of sickness and death will follow and defeat the object of summer vacation.

Discuss Planting of Fruit Trees along State Highway.

The planting of fruit trees along the highway, from Philadelphia to the Ohio state line; women as good road booster, the securing of 20,000 members of the association in the 15 counties through which the highway passes these are some of the questions discussed by the governors of the William Penn Highway at the meeting held in Philadelphia on Tuesday.

Governor Martin G. Brumbaugh last year suggested that fruit trees be planted along the state's thoroughfares. The William Penn promoters not only agree with this idea, but they say that the crop should be harvested and the proceeds used in maintaining the road. The promoters say that with a double row of fruit trees 300 miles in length the monetary return would be immense.

Assurances of support for the Women's Federation of Highway promoters have been received from many towns and cities along the William Penn.

Plans were discussed Tuesday for a membership campaign which is to start August 1 in fifteen Pennsylvania counties, whereby it is hoped to increase the William Penn Highway membership 20,000.

Announcement was also made at the meeting that the State Highway Department has given the association permission to mark the William Penn from the Ohio state line to Philadelphia, while the Pennsylvania railroad has given the association the privilege of using its poles and culverts wherever needed.

State Sanatorium Enlarged.

The new wing of the Cresson State Tuberculosis Sanatorium has been opened for patients. This new addition which has been in the course of construction for the past eighteen months increases the capacity of the institution three hundred beds.

Commissioner of Health, Dr. Samuel G. Dixon, was not present and the admission of patients was not marked with any ceremony.

The new structure harmonizes architecturally with the main body of the Sanatorium buildings and completes the institution as it was originally planned by Dr. Dixon.

With the completion and opening of this addition, the capacity of the Cresson Sanatorium will be six hundred and eighty beds. With eleven hundred and fifty at the Mount Alto Sanatorium and five hundred at Hamburg this will make the total number of free beds in the State Sanatoria, available for indigent sufferers from tuberculosis, twenty three hundred and thirty.

Every one of these institutions is filled to its capacity and there is a waiting list of more than eight hundred tuberculous sufferers seeking admission.
