

THE CENTRE REPORTER.

James Wetzell of Sunbury was in town a few days last week.

The installation of a new electric light plant is in progress at the S. W. Gramley home.

Mrs. Austin Gaugh and two children of Philadelphia are spending a few weeks at the home of S. P. Springer.

The work of street commissioner Gramley has certainly improved the run-down condition of our streets and alleys which have been in bad shape for several years.

Evangelist Paul Brown, who spent Sunday here, preached Saturday evening and Sunday in the Evangelical church to his old friends who were glad to hear him again. There was a good attendance at each session.

The Millheim ball club with a crippled team, only a few regulars being in the line up, journeyed to Spring Mills Saturday afternoon to battle with the boys from that place. The mighty Cortman had no terrors for our boys, they hitting his shots at will, while Munser for Millheim had the enemy at his mercy at all times. C. Hartman, who played second base for the visiting team, showed some of his old time form and in pulling off some of his spectacular plays had the crowd dazed throughout the game. The score was, Millheim, 9; Spring Mills, 0.

Owing to the existence of black rust in two of the biggest wheat sections in the country—Minnesota and the two Dakotas—wheat is likely to go up to \$2.00 a bushel, according to reports issued by the United States Department of Agriculture.

One day the past week while Mr. Weaver who resides on a farm one-half mile north of this place was hauling manure his little son happened to get under the loaded wagon. The one wheel passed over his legs near his body. Dr. Frank was sent for and on examination he found no bones broken but the flesh badly bruised.

Rumor has it that William Zeigler, tenant on the D. D. Royer farm, has rented the James Frank property in our town. Mr. Zeigler will farm Mr. Frank's land which adjoins this town and at present occupied and cultivated by George Winters. We did not learn just where Mr. Winters will locate next spring.

GREEN APPLE SEASON.

Little Talks on Health & Hygiene by Samuel G. Dixon, M. D., LL. D., Commissioner of Health.

The combination of green apples and small boys usually makes work for the doctors about this season of the year.

The temptation of unripe fruit is not the only danger which wise parents must guard their youngsters at this time of the year. Owing to the extreme heat and the variety of diet it is not at all unusual for children to develop serious digestive disturbances.

These are among the first symptoms of infantile paralysis as well as numerous other diseases of childhood. The exact relation of this condition to the disease has not as yet been determined. The unnatural fermentation might help the germ of infantile paralysis to multiply. For this reason it is especially important that intelligent supervision should be exercised over the diet of children.

All food should be cooked. They should not be permitted to eat white bread in excessive amounts and sour bread should never be fed to children. Too many sweets are apt to upset the digestion at this season of the year.

With bottle fed infants care should be taken to keep the milk at a temperature of from forty to sixty degrees until it is prepared for feeding. The nipples of the nursing bottle should be sterilized before they are used and the water which babies, in common with all of us require in unusual amounts during the hot weather, should be sterilized by boiling.

By following these simple precautions it may be possible to spare children from digestive disturbances which may lead to serious complications, even prepare the way for infantile paralysis if the germ comes along.

LUCK & ZETTEL

Hay stacks in the open fields are a common sight on Penns Valley farms. The immense hay crop harvested this year has overflowed many barns. Here and there you will also find a farmer with barley stacked outdoors for the want of cover.

"The Philadelphia Record."

"The Philadelphia Record" has hundreds of regular readers who live far beyond the bounds of the wide territory which it particularly aims to serve. Not long ago the management of "The Record" addressed an inquiry to some of these distant readers asking them why they prefer "The Record" to other prominent newspapers published nearer to their homes. Here is a typical reply:

"Because I regard your admirable journal as a fit newspaper for all the members of the home and domestic circle. It is comprehensive in its scope, educational, non-sensational, judicious, fair, and what is most commendable, clear and intelligible to the average as well as to the most cultured mind. Moreover in its arrangement of news topics foreign, domestic, state and local, religious and social, every item or topic may be so easily located. I have often observed in handing a copy to a friend how quickly the attention of the reader becomes fixed, showing that "The Record" is not merely provincial or local in its scope, but satisfying to the wants of the general reader."

The qualities which give "The Philadelphia Record" precedence over other big city dailies in their own fields make it doubly attractive to readers in the territory to which its news columns devote special attention.
