There may be some merit in the enforcement of the speed limit ordinance provided it is not for "revenue only."

Put down your hammer. There are too many visible and knocking against things the knocker knows little. Hide your hammer.

Add one more achievement to the Woodrow Wilson administration; namely, the masterful handling of the threatened nation-wide railroad strike and the amicable settlement to all concerned.

Thomas A. Edison for Wilson.

Thomas A. Edison, inventor, life-long Republican, and a strong supporter of Theodore Roosevelt's candidacy for the Republican nomination, made announcement of his intention to vote and work for Woodrow Wilson. He dictated in part the following statement:

"Not since 1860 has any campaign made such a direct call on simon-pure Americanism. The times are too serious to talk or think in terms of Republicanism or Democracy. Real Americans must drop parties and get down to big fundamental principles. "More than any other President in my memory, Wilson has been faced by a succession of tremendous problems, any one of which decided the wrong way would have had disastrous consequences. Wilson's decisions so far have not got us into any serious trouble, nor are they likely to. "He has given us peace with honor. This talk about the United States being despised is nonsense. Neutrality is a mighty trying policy, but back of it are international law, the rights of humanity and the future of civilization."

Good Corn Crop Expected.

Prospects for an average corn crop in the State are indicated by the August reports of the crop correspondents of the Pennsylvania Department of Agriculture with danger from early frosts being the only obstacle which the farmer now has to fear to keep him from adding the corn crop to the successful yields of wheat, rye, oats and hay.

The weather during July was very favorable for corn and the condition in the State showed an improvement of ten per cent. over July 1. The condition of the cereal now appears to be 91 per cent. compared with an average and the yield at the present time is estimated at 51,189,200 bushels, compared with a yield of 54,762,000 bushels a year ago. The estimated production is expected to increase materially when the figures of harvest are obtainable and there is every reason to believe that the yield will reach last year's total.

The corn seems to be in the best condition in the south central part of the State where it is fully up to 100 per cent. In the northern tier counties where the corn is grown largely for ensilage, the condition is only about 81 per cent.

Conditions favorable to more than average yields are reported in Adams, Bedford, Berks, Carbon, Cumberland, Dauphin, Delaware, Franklin, Lancaster, Northampton, Perry, Philadelphia, Schuylkill, and York counties.

Corn is from ten days to two weeks back according to average condition and one of the things the farmer has to fear is early frosts which may do considerable damage and prevent a full crop.
