Special Efforts Will Be Made to Handle Fruit Without Any Loss-May Find Help Shortage in Some Places-Staples to Allies.

In order that we may help win the war against autocracy, Americans must do everything possible to furnish sufficient food to help our fighting allies. We must eat more perishable and semiperishable food at home in wheat, may be sent abroad in great amounts. In a couple of weeks we will begin harvesting apples all over the country. This is a war crop. If will amount to two bushels for every man, woman and child in the United States. The motto this year is: "Eat

an apple and send a biscuit." War conditions also confront the apple growers, for there is a scarcity of pickers, and careful preparations must now be made to see that this crop is all safely harvested and put into storage. Now is the time to begin organizing picking crews in every apple growing section. A survey of the situation shows that the farmer men in the towns and cities round about at which he trades, and which have just as great an interest in this crop as the farmer himself. This is emergency organization work to be taken up immediately by chambers of commerce, boards of trade, state and county councils of defense, and business men generally.

The labor supply to harvest this crop exists right in the cities adjacent to the apple orchards in most cases, but the draft and demands of facers upon which the farmer usually new kinds of workers. People wha have never regarded themselves as apcrop for patriotic reasons.

The organization work should take the form of an immediate survey of labor resources to see where a picking force is to be recruited. Stores and factories can often release clerks and workmen for this service if notified in time. Families who would like a week or two of vacation in the country with light, healthy outdoor work at satisfactory wages, may also be induced to join the picking army. It has been suggested that the schools might be opened later this year so that boys and girls will not be necessary in all cases. One very good source of pickers can be found among the women's organizations of this country, which are all What the American Soldier Intends to keenly interested in helping in any practical patriotic work.
