Process Is Simple and Plants Grow

Very Rapidly When They Are

Kept Well Supplied.

Pumpkins, squashes and melons can

be made to grow very rapidly by feed-

ing them on sirup, and this feeding

process is quite simple. A concen-

trated sirup is prepared by dissolving

sugar in water in several jars or

crocks. The water may be heated to

make the sugar dissolve more rap-

idly, but the sirups must not be al-

A fruit that has well formed, but is

still young and small, must be chosen

Two crocks of sirup are placed beside

it, pressed into the earth so that they

shall not be upset. Some pieces of

cotton string or small lampwicks are

cut long enough to reach from the

squash to the bottom of the crocks.

With a penknife two slits are cut into

the thickest part of the stalk of the

squash, and the ends of the wicks are

inserted. The holes must not connect

with each other or go through the

stalk. The other ends of the wicks

are dropped into the sirup. Then you

have only to wait and watch the

CENTRE MILLS

A sneak thief recently stole 25 in a while and to see that there is GOLDFISH THRIVE IN OPEN

Grow to Length of From Ten to Fourteen Inches When Allowed to Live in Natural State.

Most of us are so accustomed to seeing goldfish swimming around, apparently contented, in a glass bowl that we somehow have the idea that they would be utterly lost if they were to be placed in a pond or lake. But as a matter of fact, writes George F. Paul in St. Nicholas, goldfish are just like other fish in that they enjoy freedom. When they are allowed to live in the natural state, they often grow to a length of from ten to fourteen inches. .

What is, perhaps, the largest goldfish hatchery in the United States is near Thornburg, in Keokuk county, Ia. Here several acres are covered with ponds in which the goldfish acquire the desired sheen and brilliancy. There are, in all, 17 of these ponds, so that the fish of different varieties and sizes can be kept separate.

Oatmeal is the great staple in the feeding of these finny beauties. Every day more than a hundred pounds of it are cooked and fed to them. Whenever they want a little vegetable food,

they nibble at the abundant mosses. Pure water is one of the prime necessitfes. This has been abundantly provided. Windmills are kept busy pumping fresh water up from deep wells. The frogs also do their share in keeping the ponds free from impurities. Should the water become impure, the goldfish would not acquire such brilliant coloring.

BE WARY OF STRANGE FOODS

Rhubarb Leaves, for Example, Are Poisonous to at Least Some People, Warn Medical Authorities.

The Journal of the American Medical association issues a warning against some of the plants that have been suggested as easily found and inexpensive substitutes for high-priced Rhubarb leaves, for example, ing it are few. are polsonous to at least some persons. The many species of edible fungi should be eaten only by those who are perfectly certain of their ability to dis-

tinguish them from the poisonous kinds that resemble them so closely. And in these, as in the quite harmless seaweeds, there is so little real nourishment that it seems scarcely worth while to take chances with them. The edible part of rhubarb (the leafstalks), for example, is 95 per cent water, and one would have to eat a full

pound of it to get 100 calories. Green vegetables are valuable because of their bulk, and not for the negligible quantity of protein they contain. They also supply certain saits and vitamines, which are essential to

Cattle Used as Money.

Anything that is used in trade as a medium of exchange or a measure of value, recognized alike by both parties to a transaction, is money. It may be wampum, skins of animals, shells, metal or paper, but if by government authority or by common consent it is recognized as a medium of exchange or a measure of value it is money. Lock Haven, died Thursday morning Even live animals have served the purpose and uses of money. Among some ancient tribes oxen and sheep served as a medium of exchange, ten sheep being reckoned equivalent to since January 1, suffering with diabeone ox. The Latin word for money is pecunia, and it is derived from the word pecus, cattle, showing that pecunia, money, meant property in cattle. Among some South Sea islanders whales' teeth serve as money, and among the early English colonists in America tobacco served the same purpose and was a legal tender in payment of debts at a fixed rate a pound. Experience has proved that gold and silver possess the necessary attributes. of money to an exceptional degree and they are now the basis of the monetary system of all civilized governments. The Constitution of the United States gives congress the exclusive power to coin money and the power is jealously guarded and carefully exer-

> When Timid Becomes Feroclous. The telephone was undoubtedly invented in order to place small, timid men on equality with their more aggressive fellows. It is the great leveler. Many a meek, crushed individual, incapable of asserting himself at close quarters, gives, when talking into a receiver, so close an imitation of a roaring lion of the jungle that experts are deceived. No man by taking thought can add cubits to his stature. but he can do it in a couple of minutes by talking in the telephone. The smallest member of the Boganny troupe of acrobats feels as tall as Jess Willard after he has hurled a few home truths into the receiver and hung up in time to foil the scorching come-back .- Telephone Topics.

Body Crumbled to Pieces. A boy aged seven died at Zurich of old age. His case was exceptionally unique, for he was the youngest member of a family who had won local repute as athletes. The eldest brother

was a first-class boxer, whilst the

younger had won many prizes on the sports-ground. Doctors from all parts of Europe flocked to Zurich to try and diagnose its cause and effect a successful cure, but in vain. A few days before this unfortunate child's death his teeth actually crumbled to pieces and his flesh began to

rot. His eyes were found to be the

size of a shoe button and his bones as
