KILLED DOE WITH HORN. Centre county will undoubtedly furnish the prize story of the 1917 deer hunting season. A female deer, with a spike horn two inches in length, was shot and killed by a member of the Palmyra party, encamped at Verrick's, near Colyer, on Tucsday morning. When the party discovered the freak of nature the animal was at once taken to the office of District Attorney J. C. Furst, at Bellefonte. A close examination revealed that the doe had been still nourishing a fawn. The horn was plainly visible and located near the center of the head. Attorney Furst got in touch with Dr. Kalbfus, secretary of the State Game Commission, who, while admitting the uniqueness of the case, declared that the huntother cities have desires in the same er was not at fault and decided that the hide and carcass be turned over to him. The new Red Cross Christmas Seal is one of the most beautiful and artistic stamps that has ever been used in the fight against tuterculosis.

Persian Farmer.

In Persia one of the chief occupations is farming, but it is carried on in such a manner that it can hardly be called such. If the Persian would follow the example of our western farmer his country might be very fertile, but he pays little attention to irrigation and cultivates the soil in

the crudest way imaginable. This crudity comes from two causes-poor implements and natural indolence. The Persian plow is a crooked beam of wood with a bit of iron at the end. It is just such a plow, doubtless, as the ancestors of Abraham used in the plains of Mesopotamia. It stirs the soil to the depth of only an inch or two. Persian indolence is well illustrated by the fact that in hoeing one man holds the hoe while another pulls it up and
