Was Perfect Lady.

She was a well-known but undoubtedly jealous actress, and she was coming to her friend the details of her latest quarrel with a younger rival, who had not been slow in answering back. She wound up: "You can't imagine how impertinent she was! I assure you it was as much as I could do to keep my temper. If I hadn't been a perfect lady I'd have slapped her face."

There was an impressive pause. Then she added, "I slapped her face all the same."

WOMEN SUFFERERS MAY NEED SWAMP-ROOT

Thousands upon thousands of women have kidney and bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

PROFIT IN WOODLOTS

Big Increase in Income Can Be Made With Good Handling.

War Conditions Make It Important That Every Cord of Wood Be Utilized—Coal is Scarce and Prices Are High.

(By F. G. MILLER, Dean, Idaho School of Forestry.)

The United States census schedules of 1910 called for the value in detail of woodlot products sold from or used on farms in 1909. This schedule included firewood, fencing materials, logs, railroad ties, telegraph and telephone poles, materials, for barrels, bark, stove wood, or other forest products.

With proper handling the income from the farm woodlots can be tremendously increased, and no other class of forest land lends itself quite so readily to forest management as

the farm woodlot, since the necessary labor can for the most part be performed in the winter, or at other times when the farm work is slack.

War conditions make it especially important that the farm woodlot be utilized to the fullest at this time in particular as a source of fuel. Coal is high and scarce and even government intervention cannot insure an adequate supply throughout the winter on account of labor and transportation difficulties. Every cord of fuel wood that is used will relieve the tension by just that much, and every farmer who can do so will doubtless find it to be to his advantage to put in a good supply of cordwood for himself, and to sell to others wherever possible. Many farmers owning woodlots within hauling distance of towns and cities are now finding a profitable sale for cordwood in large quantities.

EFFICIENT SCALY LEG CURE

Insects Which Cause Trouble Can Be Killed by Application of Sulphur and Lard.

Poultry kept in dirty houses often is troubled with coarse scales on the legs. These are due to the presence of mites, which have burrowed beneath the scales. They are air-breathing insects, and the treatment consists in depriving them of air. This is done by applying a mixture of equal parts of sulphur and lard, two or three times. It is a simple remedy, but an efficient one. A free application of an ointment made by mixing a teaspoonful of coal oil with a teaspoonful of lard, will bring relief, and should in a short time work a cure.

WHY RAISE LIVE STOCK?

Because the by-products of live stock are from year to year advancing in price and promise to continue to in advance. Among them are wool and hides.

Because no permanent system of agriculture is likely to be adopted if the farmer does not base that on the growing of live stock, in part. It is the lack of a permanent system that has led to the exhaustion of our soil, both as to its plant food and as to its humus.

Because the raising of live stock enables the farmer to utilize his pastures, which, rightly handled, are among the most profitable acres on his farm.

GOOD MIXTURE FOR POULTRY

Blue Ointment and Vaseline or Lard Rubbed on Fowls Will Keep Away External Parasites.

OATS IN FATTENING RATION

Good Feed for Breed Sows and Growing Pigs, But Not So Useful in Finishing Hogs.

Ground oats will be found a good feed for brood sows and growing pigs but not so useful as corn for fattening hogs. When made a part of the fattening ration oats should not constitute more than one-third of it, and probably one-fourth would be better. The great hog fattener is corn, and nothing else on earth equals it for gains or quality of product. But corn is most effective in making gains when balanced by some tankage or oats or middlings, and here the oats may be useful in the fattening process.

Don't forget to dose the hens and chicks, after feathering, with an ointment made of equal parts of blue ointment and vaseline or lard carefully mixed together. Rub this thoroughly onto the skin under each wing and also a little below the vent of each bird, using a portion of the ointment the size of a small grain of wheat for each of the three places, and half as much for a half-grown chick. Repeat once in two or three months. This is a sure remedy for all kinds of external poultry parasites, except mites.

HELPFUL TRACTOR HINTS

Oil and grease on a tractor are cheaper than repairs plus time lost in obtaining them and getting started again.

Looking over all parts of the machine regularly is just as important as regular feeding and watering of horses.

The wrong kind of lubricating oil wastes power and fouls every working part. Get instructions from the builders as to kind and quantity of oil.

Sharp plows call for less power from the engine to do good work, hence less cost to operate and longer life for the tractor. Lengthening of hitches between engine and plow will often eliminate a large part of side draft, which is another way of reducing the cost of the work.

WINTER PLOWING OF VALUE

Importance of Opening Up Soil Not Generally Realized by Farmers and Gardeners.

The importance of opening up the soil of all land that was not put into fall crops in time for it to get the full benefit of disintegrating frosts and enriching snows is not so generally realized by farmers and home gardeners as it should be.

More particularly are these atmospheric effects of value on clay and other stiff soils, and in the vegetable garden and the orchard the turning over and loosening of the earth exposes the hibernating forms of many insects to the sharp eyes of birds, poultry and the smaller rodents, while those that are not eaten perish from the disturbance.

While it is altogether better that this working of the ground should be done in the fall, before the ground has frozen, it can also often be done during open spells from midwinter until March, with the subsequent freezes and snows to produce the good effects desired. Of course, this cannot be done unless the warm spells are of sufficient duration to have the ground thoroughly settled, else the job would be difficult and unsatisfactory.

bacteria that live on their roots. These bacteria in return for being given a home (nodules) on the plant roots and for food from the plant take nitrogen from the air and leave it in the soil for the plant's use.

There are millions of dollars' worth of this nitrogen over each acre; so the bacteria have an almost endless supply to draw on.

The way to tap this great wealth is to grow these plants that have these wonderful bacteria on their roots. These plants do not do well without the bacteria. When alfalfa, clover, peas, beans or any of the other of these legume plants are sown on a piece of land for the first time it is usually necessary to sow the bacteria as well as the plant seed.

In these days when plant food is so important the greatest possible use should be made of the legumes, the greatest food producers for man and beast.

THE NEW METHOD

(By L. W. Bower, M. D.)

Backache of any kind is often caused by kidney disorder, which means that the kidneys are not working properly. Poisonous matter and uric acid accumulate within the body in great abundance, overworking the sick kidneys; hence the congestion of blood causes backache in the same manner as a similar congestion in the head causes headache. You become nervous, despondent, sick, feverish, irritable, have spots appearing before the eyes, bags under the lids, and lack ambition to do things.

The latest and most effective means of overcoming this trouble, is to eat sparingly of meat, drink plenty of water between meals and take a single An-u-ric tablet before each meal for a while. Simply ask your favorite druggist for An-u-ric, double strength. If you have lumbago, rheumatism, gout, dropsy, begin immediately with this newest discovery of Dr. Pierce, who is Chief Medical Director of Invalids' Hotel and Surgical Institute in Buffalo, N. Y.
