**PROVEN SWAMP-ROOT** AIDS WEAK KIDNEYS

The symptoms of kidney and bladder troubles are often very distressing and leave the system in a run-down condition. The kidneys seem to suffer most, as almost every victim complains of lame back and urinary troubles witch should not be neglected, as these danger signals often lead to more dangerous kidney troubles.

Dr. Kilmer's Swamp-Root which, so many people say, soon heals and strength-ens the kidneys, is a splendid kidney, fiver and bladder medicine, and, being an herbal compound, has a gentle heak ing effect on the kidneys, which is al-most immediately noticed in most cases by those who use if.

A trial will convince anyone who may be in need of it. Better get a bottle from your nearest drug store, and start treat-

ment at once. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y. for a sample bottle. When writing be sure and mention this paper.--Adv.

**CURB "U" BOATS** "Sea Jitneys" Suggested for Attack on German Bases.

Canadian Naval Airplane Fighter, Home to Recover From Shrapnel Wounds Expresses an Opinion.

Theorizing about war conditions has grown quite as tiresome, no doubt, to the people who read newspapers as it has to most of the people who write for them. Yet,' now and then, you meet a man who theorizes from the

facts of experience and knowledge and who points something out that gives food for thought. Such a case, it seemed to several of us, when a quiet little chap, son of a Canadian millionaire, told us his view of the war in its present stage, a New York correspondent of the Cincinnati Times-Star spondent of the Cincinnati Times-Star writes. His brother was killed at the Marne and he himself is home to re-cover from shrapnel wounds received when he was flying a naval airplane some thousands of feet above a town on the Belgian coast.

"The outstanding fact, just now," he said, "is that the German U-boats are doing pretty nearly as much as they were expected to do and that we have no effective defense against them. The Germans are almost justified in believing that they are on the way toward starving England into submission. If we don't find a new and successful way to combat the U-boats the situation in England will soon be very critical. Of course, I fancy a way will be found. But it must be something entirely new in warfare. For my part, I am convinced that success can be obtained only by the apparently desperate undertaking of assaults by sea upon the U-boat bases. I say 'apparently desperate.' By any known or tried method such assaults would be simply useless and suicidal.

"The German harbors are mined, netted from end to end and fortified

with tremendous shore batteries of heavy and aircraft guns. How can the bases be attacked? Well, of course, that will be settled by some one else than I, but I have heard a theoretical plan of attack proposed by one of our naval men which made a great impression on me. He said we must build thousands of small submarines-something like the 'sea jitneys' which manufacturers have talked about-and go into the German harbors with swarms of them, at the risk of losing ninetynine out of every hundred boats and land fighting.

"This officer's proposal is for some thing like an undersea duplication of this plan of attack. Most of the little this plan of attack. Most of the little boats would be lost, no doubt, but most of them would succeed in doing ma-terial damage with one or two torpe-does. Nets would be blown away, mines of the System. Catarrhal Deafness is output the state is of the System. Catarrhal Deafness is exploded, guard ships sunk and such other disorganization of the harbor defenses accomplished as to give the big ships a chance to complete the work. Yes, it's true that a man would hardly need to worry about his return trip if he went in on one of these little boats. It would be work for volunteers. But the volunteers would be plentiful enough. That I am sure of. "If such attacks promised to win the fight against the U-boats, men would be willing to go. It would be enough for them to know that they were striking the sea murderers at their home, and that some of them

## Prices of Monkeys Soaring.

Who would think that the European war would have anything to do with the price of monkeys? Well, it does, and a great deal, too, says the Popular Science Monthly. The price of monkeys has gone up with food, paper, shoes, etc., to the despair of the pathologist and to the sorrow of the hurdy-gurdy man. The causes for the sudden corner in monkeys is the closing of the world's principal wild animal market at Hamburg. Germany, and the lack of shipping facilities. Not long ago the pathologists of the national public health dervice at Washington wanted a dozen South American monkeys for experimental purposes. They appealed to every wild animal dealer in this country, to the zoos, and to the sailors in port, and finally purchased six at \$18 each.

might possibly get back."

German schooling has proved antagonistic to co-operation, although demanding unity of action through mass obedience. It has failed to foster real co-operation, for co-operation is a method by which persons of their own volition and by no compulsion may work together harmoniously, writes Winthrop Talbot in the Century Magazine. Only when training and schooling are the common privilege of all is that state of civic development possible which permits society to become cooperative in its action. In other words, a socialized society becomes more and more possible only as all individual members acquire each the widest vision, and thus the power to co-operate harmoniously.

The Crow.

I have seen no bird walk the ground with just the same air the crow does. It is not exactly pride; there is no strut or swagger in it, though perhaps just a little condescension; it is the contented and self-possessed gait of a lord over his domains. All these acres are mine, he says, and all these crops; men plow and sow for me, and I stay here or go there, and find life sweet and good wherever I am. The hawk looks awkward and out of place on the ground; the game birds hurry and skulk, but the crow is at home and treads the earth as if there were none to molest or make him afraid .-- John Burroughs.
