# YOU COOK YOUR FOOD—WHY NOT YOUR TOBACCO?

70U know what broiling L does to steak, baking to a potato-and toasting to bread.

In each case flavor is brought out by cooking-by "toasting."

So you can imagine how toasting improves the flavor of the Burley tobacco used in

Went Down With the Ship.

Attention has been officially called Agnes, aged three, had got some butto the signal bravery of Robert Aus- ter on her hand, and to get it off she burne, a navy radio electrician of the put her hand around her mother's 23@25. first class, who went down when the waist and wiped her hand on her United States army transport Antilles mother's apron. Her mother said: "Is was sunk. When the ship was struck this an embrace?" "No," Agnes re-Ausburne and a fellow electrician nam- plied. "It's butter." ed MacMahon were asleep in the radio room. Ausburne, realizing the seriousness of the situation, told his fellow worker to get on his life preserver. As he left to take his emergency station at the radio key he shouted to his companion, "Good-bye, Mac." This was the last seen of him. Going to the radio room MacMahon found it locked. and realizing that the ship was fast sinking attempted to get Ausburne out, but without success.

It is sometimes difficult to convince the world that you have brains unless you have money.

The man who sees nothing in life but toiling and existing has reached

the brain force of the chipmunk.

Its Particular Style. "What kind of a coach did you get for your examinations?"

"An old college hack,"

## Win the War by Preparing the Land Sowing the Seed and Producing Bigger Crops

Work in Joint Effort the Soil of the United States and Canada CO-OPERATIVE FARMING IN MAN POWER NECESSARY TO WIN THE BATTLE FOR LIBERTY

The Food Controllers of the United States and Canada are asking for nearby, 60c; Western, 60; West Virgreater food production. Scarcely 100,000,000 bushels of wheat are avail- ginfa, 60; Southern, 59. Cold storage able to be sent to the allies overseas before the crop harvest. Upon the eggs unchanged, with choice candled efforts of the United States and Canada rests the burden of supply.

Every Available Tillable Acre Must Contribute; Every Available Farmer and Farm Hand Must Assist Western Canada has an enormous acreage to be seeded, but man power rough, 29@30; old hens, 4 lbs. and

is short, and an appeal to the United States allies is for more mon for seed-

Canada's Wheat Production Last Year was 225,000,000 Bushels; the Demand From Canada Alone for 1918 is 400,000,000 Bushels

To secure this she must have assistance. She has the land but needs the men. The Government of the United States wants every man who can effectively help, to do farm work this year. It wants the land in the United States developed first of course; but it also wants to help Canada. Whenever we find a son we can spare to Canada's fields after ours are supplied, we want to direct him there.

Apply to our Employment Service, and we will tell you where you can best serve the combined interest.

Western Canada's help will be required not later than April 5th. Wages to competent help, \$50.00 a month and up, board and lodging.

Those who respond to this appeal will get a warm welcome, good wages, good board and find comfortable homes. They will get a rate of one cent a mile from Canadian boundary points to destination and return.

For particulars as to routes and places where employment may be had apply to: U. S. EMPLOYMENT SERVICE, DEPARTMENT OF LABOR

A Western Canada Crop Estimated at \$12,000, Makes \$19,000.

Messrs. Harris, formerly of Audubon, Iowa, wrote the "Audubon Advocate," expressing their satisfaction of things in Western Canada. They located at Makepeace, Alberta. They say there are those who make good, and those who fail. The former are those that land agents refer to when advertising their land. "But," continues the letter, "A great many of the farmers in this vicinity pay for their land with their first crop. A man near here bought a section of land in the year 1915 for \$23 per acre. He broke 300 acres of the land during the summer of 1915. In the fall of 1916 he threshed 16,000 bushels of wheat, which paid for his land, all expenses and had a balance of \$4,000. In the fall of 1917 he threshed nearly as much off the other half of the section. At the present time he would not take \$50 per acre for his land.

"We have had five crops in Alberta. The two dry years (1914-1917) our wheat made 20 and 30 bushels to the acre respectively. In 1916 we raised 50 bushels of wheat to the acre on summer fallow. The best results are obtained by plowing or breaking in the summer, working it down in the fall so that it will retain the moisture. Thus farming one-half your ground each year.

"Persons owning land here and still living in the States should, if they don't feel themselves able to come up here and finance themselves until they could get their first crop, get some of their land broken and worked down in the fall before they come. The next spring they could come and put In the crop, fence and put up their buildings. This way they have to walt only one summer for their first

"It is not advisable for a person to come here in the spring, break out land and put it in crop the first year, because the moisture is not in the ground and a failure is almost certain unless it is an exceptionally wet

"One of the boys from that locality, Mr. Peder M. Jensen came to Alberta last spring. He bought a 30-60 Rumely Oil-Pull engine on the 8th day of June, 1917. After that date he broke 1,100 acres of prairie sod for which he received an average of \$5.00 per

"Mr. Hansen from your community, prospective land buyers from that positions, he was arrested. neighborhood. At that time he insection we were farming. We told him that it would probably make in attaching a tin can to a dog's tail. the neighborhood of \$12,000. This same crop when sold brought nearly \$19,000. The most of it being sold when prices were low for the year."-Advertisement.
