Farmer Defines "Purebred" and "Thoroughbred"

All classes of people, and especially the enterprising farmers, are beginning to realize the importance of improved live stock of all kinds, from poultry to the best and largest breed of horse, and although much interested, most folks make a mistake in applying the proper term to describe their particular kind and breed of stock to which they refer. According to the State Live Stock Sanitary Board all livestock should be classified as purebred, grad, or nondescript; the purebred, to designate registered or subject to registry; the grade to mean only part full or purebred, and the nondescript are of such a mixed up nature that even reasonable good judges can scarcely trace their peculiar makeup to any distinct breed; hence we should say we have purebred poultry of whatever particular kind it may be, purebred sheep, purebred swine, purebred cattle, and also purebred horses of the several distinct breeds, and in one case only may we say thoroughbred horses and this is when we speak of the English running race horse used under saddle.

Many folks, even among the better educated class, say that they have thoroughbred poultry, pigs, dogs, cattle, and like, which is not the case. They no doubt have purebred stock of the various kinds, but the chances are that not one in a thousand has a thoroughbred English running race horse, and when in our various conversations in reference to good stock we are not speaking of such we should not go to that shelf of our vocabulary to get the word "thoroughbred" as often used out of place even by teachers, auctioneers, printers, and stockmen, but in referring to good live stock of any kind we should be very particular and use the word "purebred" and then specify which special kind you have reference to.

The running horse of England has been bred true to type for many hundred years and this is why the word "thoroughbred" applies to this special breed of light horses only; hence the word "thoroughbred" is used many thousand times too often and improperly.

Farmers throughout the State are taking a new interest in sheep raising and there has been a general increase in herds.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

GOVERNMENT DEMANDS FLOUR SUPPLY REPORTS

All Householdors Must Report Flour Supply at Once—Card Printed in Newspapers Must be Used.

All householders in Pennsylvania have been ordered by the United States Food Administration to report the quantity of flour in their possession on a flour supply card issued by the Federal Food Administrator for this County and printed below in this paper. The card will not be issued in other form than that found printed in the newspapers so that if you are affected by the order you must cut out the clipping and mail it to the Federal Food Administrator for your County.

The following statement was issued by Mr. Heinz, Federal Food Administrator for Pennsylvania, in commenting on the above rule:

"The flour supply card issued by the Food Administration is the first step in a campaign to learn how much wheat flour is stored away in the homes. Householdors are given the opportunity to report on the flour supply card the number in their households, the amount of wheat flour on hand (including whole wheat and Graham flour) and the amount they consider their thirty days' requirement. Those who fail to report will run the risk of prosecution and the penalty for hoarding—\$5000 fine and two years' imprisonment or both. If any persons fail to report, the Food Administration can promise them no leniency, if found guilty of hoarding."

"By directing the public to state their flour holdings on the flour supply card the Food Administration is taking the step necessary to prevent a possible flour famine. Hoarders hasten famine. If next May, June or July we find ourselves without wheat flour, it will be because thousands of tons are stored away in cellars by un patriotic householders who banish any consideration of the soldiers in their greed to have their own desire satisfied. The flour supply card is a government action which will meet with the approval of all those who have taken the time to study food conditions broad and who know therefore that food is probably the foremost factor in winning the war."

OFFICIAL HOUSEHOLDER'S FLOUR REPORT WRITE CAREFULLY.

No householder is permitted to purchase over 49 pounds of wheat flour nor to have more than 30 days' supply. Every householder must report immediately (on this form) to their County Food Administrator. Make report of all wheat flour on hand whether it is excess or not and urge on your neighbors the importance and necessity of making this report promptly.

Number in household.....adults.....children under 12.
Wheat flour on hand (all flour containing any wheat).....lbs.
Thirty days' requirements (when used with substitutes according to 59-59 regulation).....lbs.

I agree to hold my excess subject to the order of the United States Food Administration.

Name.....
Postoffice.....
Street and No. or R. F. D.....

Maximum penalty for hoarding is \$5,000.00 fine and two years' imprisonment. These blanks will not be distributed. You must fill in your own blank and mail or deliver it to your County Food Administrator. An immediate report will avoid possibility of search and prosecution.

Federal Food Administrator for Pennsylvania.
