Boys Learning Farm Work at College Training Camp.

More than three hundred school boys from various sections of the state arrived at State College on Tuesday to enter a farm training camp conducted under the co-operative management of the Pennsylvania State College and the committee of public safety. They will be under the instruction of college agricultural experts until May 10. A second detachment will be here from May 14 to May 24.

After they have mastered the elementary principles necessary to make them of some immediate use at farm work the boys will be placed with farmers for the season. Practical training will involve individual work by each boy in the care and handling of horses hitched to different kinds of farm machinery, and the use of implements in the garden and truck patches. In the dairy barns, the boys will be taught to feed and milk cows, handle silage, clean stables and mix feed.

Boys will be instructed in preparing seed beds, the transplanting of plants and in making and applying spray materials. Every youngster will learn how to rake, shock, pitch, load and mow hay. Considerable attention will be given to the operation of gas engines and tractors by the older boys.

The boys will work from 5:30 in the morning until 6:00 in the evening. They have been quartered in the college armory.
