# FOODS TASTE BETTER COOKED -TOBACCO TASTES BETTER TOASTED

Since the day of the caveman, who liked his meat raw, civilization has learned a lot about the scientific treatment of the things we eat.

Naturally none of us would now prefer to have our meat raw, our potatoes as they come from the ground, our coffee unroasted.

And naturally follows the great discovery recently made by The American Tobacco Co.-that tobacco tastes better TUASTEL

This wonderful new idea-simple like all great invention .- was first used in producing the famous LUCKY STRIKE Cigarette-made of toasted Burley tobacco.

Burley has a mellow flavor, entirely different from the tobacco usually used for cigarettes. It is a pipe tobacco and LUCKY STRIKE Cigarettes taste like a pipe. Adv.

Impressed Hunters in the Florida Everglades So Much They

A couple of hunters on the border of the Florida Everglades were surprised to hear the wild snorts and whistles of a buck in fight, mingled with the plaintive bleats of a doe in distress-a combination of sounds that was unaccountable. The men crept cautiously up, and in five minutes reached the edge of an open glade.

In the center crouched a doe, wild with terror. By her side was a fawn only a few hours old, still too weak to follow its mother, while the old buck, with bristling hair, and antlers lowered, stood by, snorting in rage and defiance. His eyes, green with rage, followed some object moving in the palmetto scrub on the border of the glade.

Looking carefully, the hunters saw a young panther passing backward and forward in an effort to turn the flank of the defense and get at the fawn. A wiser beast would have abandoned the attack as soon as such a defender went on guard, but this panther was evidently in the full flush of his first strength, and without ex-

Forward and back he crawled, spit ting and snarling, only to find the buck always between him and the doe. At last he crouched for the spring. The buck, snorting grimly, braced all his muscles for the coming crash; he appreciated his danger, but dared the worst. The doe whimpered and closed her eyes, but did not desert her fawn. The panther rose in the air and came down within ten feet of the buck. Then the buck went into the air, and falling with his feet together on the struggling cat, seemed to stab him through and through. Immediately the buck rose again and landed a dozen feet away. Then he lowered his head

and plunged at the panther. There was a confusion of flying dirt and grass, and again the deer sprang away. There were now deep cuts on his head and neck, and his antiers were splashed with red.

The panther now tried to creep away, but again the buck leaped, stabbed with his feet together and sprang away. The cat now lay gasping, while the buck watched him with his hair hunters walked forward.

When the buck saw them he must have realized that he was completely Cheese-New York, whole milk, 24 in their power. His proud crest fell, and he lost all the swelling part of the

When the city of Norfolk, Va., was threatened with the complete destruction by fire of its thriving business section early in January, every available fire-fighting force at hand and from nearby towns was called into the battle. At the height of the fire the enlisted men of the United States navy on duty at the navy yard and in the harbor were called on to help not only in subduing the flames but controlling the crowds. To a man they gave a splendid account of themselves. Among these men was John Joseph McLoughlin, a chief boatswain's mate. Although he had worked all night, had narrow escapes and was drenched to the skin with ice-cold water, McLoughlin declined a relief when it was offered and remained on duty continuously until the danger was passed. For this conspicuous service he has been commended by Secretary of the Navy Daniels. McLoughlin enlisted in the navy in 1908 at New York. Had Enough Eggs. First Barber-I bet that fellow is a
