carcasses are destroyed.

Fresh meats thus indorsed go forward in regular shipments, but those which are to undergo curing, canning, or manufacture into sausages, lard, oleomargarine, etc., are subjected to inspections at each step. For these there is a final inspection just previous to their dispatch for Army use. Samples are regularly collected for chemical analysis in the Government laboratories.

When the meats arrive at the Army stations they are again inspected either by inspectors of the Bureau of Animal Industry or by veterinarian officers of the Army. They must also obtain the approval of the officers of the Quartermaster Corps receiving them. And they undergo their final test when the soldier's immediate organization commander looks them over before he permits them to be served his men.

A formal notice appears elsewhere in this issue.
