ELECTROCUTED ON ELECTRIC LIGHT POLE AT STATE COLLEGE.

Randall H. Shuey Meets Horrible Death by Electrocutation.—His skull Fractured in Fall to Ground.

Randall H. Shuey, an employee of the State-Centre Electric Company for the past six years, was electrocuted Friday noon while about to make some repairs on one of the company's poles in the borough of State College. Mr. Shuey had ascended the pole to the point where the iron braces are located. A broken wire coming in contact with the braces had charged them so that when the man took hold of them he was severely shocked, but it was an instant later that he received a more severe shock which resulted fatally to him. In letting go of the braces he was thrown backward, his neck coming in contact with the high tension wire which was evidently torn by the storm. The high voltage of the wire killed him at once, but even though this would not have resulted fatal, his fall to the ground which followed would have killed him, for upon examination it was found that his skull had sustained a compound fracture.

The unfortunate man was aged twenty-eight years on the day of his burial (Monday), which took place at Boalsburg. He leaves a wife and two small children. His father, John Shuey, of Houserville, also survives, as do two brothers and two sisters, namely, Dale, of Lemont; Paul, of Belleville; Mrs. Ferron Struble, of State College, and Mrs. George Dunkleberger, of Lemont.

Mr. Shuey was a resident of Boalsburg until last December when he removed to State College. He was a good workman and his death is a severe blow to his family and numerous friends.

THE STUDY OF THE GREAT WAR.

(Continued from first page)

of books and magazine articles for more general reading is given at the close of each chapter.

Many of the quotations of evidence are from sources not easily accessible to the general reader. The following illustrate the German plans of world dominion and reliance upon brute force:

"God has called us to civilize the world; we are the missionaries of human progress"—(Kaiser William II.)

"The German race is called to bind the earth under its control"—(Ludwig Woltemann 1913.)

"Our next war will be fought for the highest interests of our country and of mankind. 'World Power or downfall' will be our rallying cry".—(General Bernhard, 1911.)

"It is only by relying on our good German sword that we can hope to conquer that piece in the sun which rightly belongs to us."—(German Crown Prince, 1913.)

"With the help of Turkey, India and China may be conquered. Having conquered these, Germany should civilize and Germanize the world, and the German language would become the world language."—(Theodore Springman, 1915.)

With these statements of aims may be compared the recent utterances of the Kaiser given in chapter ten:

"If the enemy does not want peace, then we must bring peace to the world by battering in with the iron fist and shining sword the doors of those who will not have peace."—(Dec. 22, 1917.)

"We desire to live in friendship with neighboring peoples, but the victory of German arms must first be recognized." (Feb. 11, 1918.)

"The prize of victory must not fall us. Not soft peace, but one corresponding with Germany's interests."—(March 29, 1918.)

In making accessible this mass of systematically and critically arranged material the Committee on Public Information has performed a service not merely to schools and colleges, and clubs, for which the study is primarily intended, but also to every person who seeks to know the facts about the war.

How to Cut down your Fuel Expenses

THINK how much coal you burn in a range when you're *not* cooking. That's all wasted—money thrown away. And Uncle Sam wants every housewife who can, to save coal. Here is a good way for you to do *your* part. Use an oil cook stove instead of the fuel-wasting coal range. Then the only time you use fuel is when you *are* cooking. And that fuel, kerosene, is much more economical than coal.

NEW PERFECTION OIL COOK-STOVES

not only give most satisfactory results—they save steps in house work and do all the cooking just as well (usually better) than a coal range.

Think how easy it is to strike a match and have an intense heat in less than a minute. No coal or wood to carry. No getting down on hands and knees to rake and poke at the fire. Your New Perfection is always ready when you are.

But after you do get your New Perfection be careful what kind of kerosene you use. There is only one kind that will always give most satisfactory results. It is called Atlantic Rayolight Oil to distinguish it from the other kinds. Ask for it by name. Atlantic Rayolight Oil is so highly refined that it burns without smoke, smell or sputter. Gives a more intense heat, too.

Select your New Perfection Oil Cook stove now. There's a dealer near you.
