War Wipes Out Fraternity at Penna. State College.

Patriotism has so depleted the Acacia Fraternity, at the Pennsylvania State College, that the clubhouse doors have been closed for the duration of the war. Every one of the twenty-three members are at the front.

When the college re-opens on September 25, many other fraternity houses will be taken over by the military authorities and will be converted into barracks for students enlisted in the students' army training corps. With more than 1000 freshmen now registered for admittance, the State College authorities are confronted with a housing problem that taxes the capacity of the campus and the village.

A huge mess hall and two barracks are now under construction on the campus to shelter the 1600 soldiers sent here by the War Department for vocational instruction. Additional men for electrical training will be quartered there after October 7.

WILLIAM E. TOBIAS. DEMOCRATIC CANDIDATE FOR CONGRESS, TWENTY-FIRST DISTRICT.

The Democratic candidate for Congress from the Twenty-first District is well known by reputation to nearly every voter in the District, having been the nominee in 1914 and again in 1916. In each case he was defeated by a very narrow margin. He comes from a long line of American ancestry. His ancestors came from Switzerland and settled near Philadelphia in 1710; His grandfather settled in Centre county where Mr. Tobias was born. His father moved to Clearfield county where the subject of this sketch was born.

In all walks of life which he has thus far entered, W. E. Tobias has made good. Being a poor boy, the second oldest of a family of nine children, he worked himself through the township schools, then through Normal school thus fitting himself to teach. He did not stop when he had secured a certificate to teach but plugged away until he graduated from college. He never had a push or pull to help him along. He simply worked hard and thoroughly and all he is he achieved by his own efforts. Send him to Congress and he will make his mark there as a clean, diligent, painstaking, honest, able member.

Prof. Tobias is 100 per cent. patriotic and will stand with the president for the most vigorous prosecution of the War until Germany accedes to the conditions laid down by the Allies.

Prof. Tobias' work as principal and superintendent of schools has brought him into close touch with all classes of citizens and has kept him in touch with all their needs. It has qualified him in the highest degree to serve his constituents in the high office to which he aspires. A vote for him is a vote for better schools, cleaner morals, better laws and higher ideals.

Wants to be in Line.

Here the proper spirit is shown by a Reporter subscriber, and we trust that there may be more like him before we are compelled to use the axe on our subscription list. J. S. Derstine, of Freeport, Ill., writes: "You will find enclosed \$1.50 to pay my subscription up to July 1919. I saw the government's call for subscriptions to be paid in advance and I want to keep in line with everything that is wanted."

You Can't Eat Meat 100 Miles Away

Preparing meat is only a part of Swift & Company's usefulness.

The finest meat in the world wouldn't do you any good 100 hundred miles away from your table.

Swift & Company efficiency has made it possible to place complete lines of products in the smallest and most remote communities.

To be sure the work is done well Swift & Company, through its branch houses and car routes, brings the meat to the retail dealer for you.

Swift & Company lays out car routes covering towns—big, little, medium size—which are not served by a Swift branch house.

Salesmen find out in advance what is wanted by the dealers in every town.

They are followed by refrigerator cars loaded with retailers' orders, which are delivered at each town—fresh, clean, and sweet—once or twice each week.

Swift & Company operates a large number of car routes like this, from fourteen distributing plants.

This is a necessary and natural part of the packers' usefulness. It fits into the industry in an orderly, effective way. It makes better meat cheaper from one end of the land to the other.
