Shakespeare "Overrated."

Mr. Justice Darling has admitted that he knows "a bit about racing." He certainly knows more about literature, however, and therein differs from one of his predecessors on the bench, Baron Martin. Mr. Adolphus Liddell, who acted as the baron's marshal in 1872, states that he "had a prodigious acquaintance with racing history, and knew the winners of all the chief events for many years back. "In history, literature and art he seemed to take no interest whatever, and if ever he had any education in these he had discarded it. Many stories were current illustrative of this peculiar condition of his mind, such as his remark that 'Shakespeare is an enormously overrated man." "--London Chronicle.

Building Record.

All building records were broken recently at Grasmere, S. I., where a United States base hospital is located. In five hours a force of 300 men erected a building 230 feet long and 36 feet wide. In the finished building: when the workmen laid down their tools, was a steam-heating plant, sewer connections, electric lights and a bathroom with tiled floor. The work started at 7 o'clock in the morning, with men digging post holes. When the whistle blew at noon the last workman in the building was putting on his coat, with the task completed.
