TREASURY HEAD SPEAKS TO YOU

Secretary Glass Corrects Erroneous Statement Regarding Necessity For Loan.

The following statement from Carter Glass, Secretary of the Treasury, will be of special interest to the readers of this paper, due to remarks we have all heard in regard to the necessity for another Liberty Loan.

"A rumor has reached the Treasury that a mistake has been made by the authorities, that from \$15,000,000,000 to \$17,000,000,000 has been returned to the Treasury as a result of the armistice and that therefore another Liberty Loan is unnecessary.

"The rumor is absolutely unfounded. I suppose it has its origin in a failure to understand the discussion of the proposed repeal by Congress of \$15,000,000,000 of appropriations and authorizations. This does not mean a return of money to the Treasury, but a cancellation of authority heretofore given by Congress to expend money in the future. Such reduction in future expenditures was anticipated by Secretary McAdoo and fully allowed for when on November 14th he wrote to Senator Simmons forecasting an expenditure of some \$15,000,000,000 for the fiscal year ending June 30, 1919, and suggesting a reduction in taxes for that year to \$6,000,000,000 and for the fiscal year ending June 30, 1920, to \$4,000,000,000.

"As a matter of fact, the whole proceeds of the Fourth Liberty Loan and of all previous loans had, at the time the armistice was signed, been expended or anticipated by Treasury certificates of indebtedness issued during the summer and early fall to finance the current requirements of the government and at that time outstanding and unpaid. It has been the practice of the Treasury since the beginning of the war to finance the current requirements of the government by the issue of Treasury certificates of indebtedness of short maturity at frequent intervals before each Liberty Loan and to refund these Treasury certificates from time to time by the sale of Liberty Bonds. This practice was followed in advance of each of the four Liberty Loans so that when any Liberty Loan was actually offered for subscription and the proceeds reached the Treasury only a very small part were available for the future requirements of the government, the greater part of the proceeds being required to retire the short time Treasury certificates of indebtedness issued in anticipation of the Loan.

"The \$2,300,000,000 net proceeds of the Fourth Liberty Loan were soon exhausted. To meet the current expenditures of the government since about the time of the armistice it has been necessary to borrow \$4,231,800,500 on Treasury certificates.

"The moment the armistice was signed America was approaching the peak of her effort in men and materials. American industry was approaching the peak of production. It is safe to say that without the unanticipated effort that was made not have been brought to so early a conclusion. The bills incurred during this period of great military and industrial effort must be paid. It takes weeks—some times months—for the bills so incurred to reach the Treasury in the form of actual demands for cash payments. A very large part of the expenditures made by the government during the period of the armistice day have been in payment of bills incurred prior to that day.

"Although the war is won, peace has not been signed. We must stand and pay our brave troops in France; we must share with the Allies the duty of bringing peace to the world now that victory is ours. Our soldiers must be paid until the exigencies of the military situation permit their return to private life. They must be fed and clothed and transported back to their homes. Every effort is being made in every department of the government to curtail expenditures with the utmost possible rapidity. But just as it was impossible for the United States to reach the peak of its war effort at the moment of the declaration of war, so it was impossible that the expenditures of the government should stop abruptly at the moment of the signing of the armistice. That would have meant abandoning the Allies at the moment of victory, abandoning our soldiers in Europe without pay, repudiating the bills incurred by the government for war materials and supplies, the destruction of the government's credit, the wreck of our industrial and financial fabric and social and economic chaos."

THE PEACE TABLE.

Here's the peace table all of us prayed for. But there's one whom a cover is laid for. Who will sit with more grace (Yes, in Uncle Sam's place) if assured that the "feed" can be paid for.

Clemenceau's Compromise.

Here is a bon-mot of Clemenceau which is making the rounds of Paris: The usual number of rifles used in a French firing party at the death of a traitor is twelve. Many persons went to Clemenceau trying to influence him not to impose the death penalty on Bolo. "Anyway, he was only half a traitor," said one influential man to the Tiger. "That being so, it is easily arranged," said Clemenceau. "We will give him only six rifles."

Catarhal Deafness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surface. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system. We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, 75c. F. J. CHENEY & CO., Toledo, O.
