The team of large mules of J. H. Horner took fright at a passing freight train while Mr. Horner was loading a car with hay, at the Centre Hall station on Tuesday, and ran off with the greater part of the load on the wagon. A total of almost two thousand chicks have already been shipped by parcel post by the Kerlin Grand View Poultry Farm, at Centre Hall. There are indications that the Government is looking after the interests of all government bond purchasers, and just now is making an effort to ascertain who profited by clipping coupons from bonds before they were delivered to the rightful owners. Wood Compared With Coal.

In heating value one standard cord of well-seasoned hickory, oak, beech, birch, hard maple, ash, elm, locust or cherry wood is approximately equal to 1 ton (2000 pounds) of anthracite or hard coal. However a cord and half of soft maple and 2 cords of cedar, poplar or basswood are required to give the same amount of heat.

One cord of mixed wood, well-seasoned, equals in heating value at least one ton of average-grade bituminous or soft coal.
