

IN MISERY FOR YEARS

Mrs. Courtney Tells How She Was Cured by Lydia E. Pinkham's Vegetable Compound.

Oskaloosa, Iowa.—"For years I was simply in misery from a weakness and awful pain—and nothing seemed to do me any good. A friend advised me to take Lydia E. Pinkham's Vegetable Compound. I did so and got relief right away. I can certainly recommend this valuable medicine to other women who suffer, for it has done such good work for me and I know it will help others if they will give it a fair trial."

Why will women drag along from day to day, year in and year out, suffering such misery as did Mrs. Courtney, when such letters as this are continually being published. Every woman who suffers from displacements, irregularities, inflammation, ulceration, backache, nervousness, or who is passing through the change of life should give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial.

For special advice write Lydia E. Pinkham Medicine Co., Lynn, Mass.—The result of its long experience is at your service.

For Simple Stock and Poultry Troubles, such as constipation, indigestion, liver troubles, loss of appetite and colds.

A concentrated and tonic for hogs, cattle, sheep, etc. Iver medicine for chickens, horses, which has been in successful use for over 35 years.

Get a can of Bee Dee from your Merchant. Mix a little Bee Dee regularly with your stock and poultry feed. It pays!

The Student.—Scanning this piece of music makes me feel like an aviator. Friend—How's that? Pianist—I'm trying to conquer the air.—London Tit-Bits.

A sorrow cannot always live.

Weak and Miserable?

Does the least exertion tire you out? Feel "blue" and worried and have daily backache, lameness, headache, dizziness and kidney irregularities? Sick kidneys are often to blame for this unhappy state. You must act quickly to prevent more serious trouble. Use Doan's Kidney Pills, the remedy recommended everywhere by grateful users.

A Virginia Case

Mrs. J. E. Parsons, 531 Poole St., Norfolk, Va., says: "I was taken with kidney trouble and suffered with pain through my back. My feet and limbs swelled and I was told I would never be able to walk again. Nothing seemed to stop the swellings or pain. One of my people advised me to take Doan's Kidney Pills and I did. They made a complete cure and I haven't had any trouble since."

EXPLOSION OF FOUR MAGAZINES

Heavy Damage Wrought at Aberdeen Proving Grounds

SCORE OF WORKMEN MAIMED

Giant Structure Housing Much TNT Menaced By Smouldering Debris—Military Post in Panic.

Aberdeen, Md.—Four frame structure magazines containing approximately 700 shells of 240-millimeter calibre, including high explosive trench warfare and aerial shells, were blown asunder at the Ordnance Proving Grounds, near Aberdeen. A score of workmen and soldiers were cut off from escape, and of the 29 injured, 15 may die, or are permanently maimed.

It will require several days to tabulate the casualties, owing to the fact that a number of bodies of laborers are believed to lie in the wreckage. The total damage to the property will, perhaps, exceed \$85,000. Experimental work with molten trinitrotoluol, or T N T, in one of the four magazines is said to have caused a concussion, which, in turn, set off the trench warfare material in the magazine. Other reports were to the effect that sparks from a barrack's chimney, 600 yards to the southwest, started a blaze in the explosive-laden structure.

Within five minutes a raging fire spread in all directions and was blown by the terrific northeast wind to the next magazine. Fortunately, the first blast occurred at 12:20 P. M., when most of the workmen and soldiers were at mess. After the first detonation a general retreat from the danger zone resulted and, perhaps, saved many lives. At intervals of five minutes the other four magazines of the group, with one exception, were hurled through the air, leaving their sites debris-strewn and scarred craters.

A wild panic followed the series of explosions. The reservation quarters, 2,900 civilian laborers and half as many troops. Among the former great excitement prevailed and they ran in groups from the ground, coatless, hatless and crying out in terror. Most of soldiers reached safety by prostrating themselves on the ground and in their barracks, about 500 yards distant.

Every barrack building was damaged by the explosions. Window panes were shattered and the machine shop, a pressed-plate glass building near the magazines, collapsed with the concussion. This building had been vacated for the noon hour. The electrical plant was also partly wrecked. In the barracks tables, bunks and other furnishings were broken and a number of rafters gave way. Shrapnel and broken shell forms flew in all directions, but particularly to the southeast one large fragment boring itself through the doors and walls of the house of the commanding officer, Colonel A. W. Phillips.

Immediately following the initial blast, Colonel Phillips, who was in the administration building, hurried to a point in proximity of the scene and issued orders prohibiting approach to the wreckage. Until the final blast, the group of badly injured men lay amid the mass of burning wood and red-hot twisted steel, helpless; some were unconscious and others were calling feebly and piteously for assistance. It was not until the danger was minimized that the first-aid units went out, ministered to the laborers and soldiers alike and dispatched them to the emergency wards of the reservation hospital. No time was wasted searching for bodies, and it is not yet known whether there were any fatalities, though it is pointed out that there must be at least 10 laborers who have not been accounted for.

PAPER PRICES TO STAND.

Because Trade Commission Hasn't Funds Reported in Austria.

Washington.—The Federal Trade Commission denied the application of newspaper publishing interests for a reopening of its investigation of newspaper costs and prices.

While holding that it might have the right to reopen the matter, the commission announced that it was without funds to conduct an inquiry into costs, and that it could not incur the necessary expenditures without authority from Congress.

COMMUNISTS PLAN COUP.

Movement To Gain Control Of Government Reported In Austria.

Paris.—The Communist elements in Austria are planning a movement to gain control of the Government, the correspondent of the Matin at The Hague says he learns from Vienna. The movement if launched would be simultaneous in Vienna, Linz and Graz.

The first step toward doing good is the inclination to do it.

COAL TAR CREOSOTE TREATMENT MAKES FENCE POSTS MORE DURABLE IN GROUND

Post-Treating Outfit in Which Threshing Engine is Used to Supply Steam for Heating Hot Bath—The Posts Are Set Vertically in the Hot Treatment and Then Are Laid Horizontally in the Large Tank Which Contains the Cold Creosote—Note the Beveled Tops of the Posts.

(Prepared by the United States Department of Agriculture.)

The fence-post problem is easily solved on the farm by means of a simple method of treating wood with coal tar creosote. Sap pine, red oak, maple, beech, sycamore, black gum, sweet gum and other abundant or inferior woods by this means are made durable in the ground for 10 to 20 years of service.

It is essential that the timber be peeled and thoroughly seasoned before attempting to treat it. Small flakes of inner bark left on the wood check or prevent proper absorption at those places. Peeling is done most easily during the spring months, but is carried on at other seasons of the year. A spade is about the best common implement for use when the bark slips easily, otherwise an ax or draw-knife should be used.

Because they have a uniform absorbing surface of sapwood, round sticks are more satisfactory than split timber. With treated timber it is not necessary to use the large-sized line posts commonly cut and used in the past. By using a post from three to four inches in top diameter and long enough to allow only a few inches above the top wire, the cost is reduced for creosote and for labor in handling, the post lasts practically as long as larger sizes, and it affords ample strength for the fence line. These facts have been fully established by means of experiments and demonstrations carried on for more than ten years by the forest service, United States department of agriculture, in co-operation with a number of state agricultural colleges in different parts of the country.

Preservative Should Penetrate.

In treating the posts it is important to get a deep penetration of the preservative of from one to two inches in the butt of the post for a height of one foot above the ground level when the post is set in place. This is obtained by boiling the butt in creosote heated to about 210 degrees F. for one to two hours, depending upon the porosity of the wood, followed immediately by a bath in "cold" (80 degrees to 100 degrees F.) creosote for about the same period of time. The wood cells, expanded and deprived of some of the air by being heated, during the cooling treatment gradually absorb the desired amount of the creosote. The tops obviously require only a shallow treatment to last as long as the butts. Where only a single open drum or tank is used, top treatment may be accomplished by means of thoroughly painting the tops with a brush, or pouring hot creosote over the tops.

A very satisfactory outfit for treating posts consists of an upright cylindrical tank for the hot treatment and a horizontal rectangular tank or vat for the cold bath. For applying the hot creosote to the butts one of the larger-sized gasoline or oil drums, about 27 inches in diameter, is very satisfactory for small operations, but for larger or co-operative treatment a cylindrical steel tank 3 feet in diameter by 4 feet in height should be used. In either case there will be needed a horizontal steel tank about 3 feet across by 3 feet in height and 8 feet in length, or large enough to accommodate the corner posts.

Treating Posts With Creosote.

SAGE TEA DARKENS HAIR TO ANY SHADE

Don't stay Gray! Here's an Old-time Recipe that Anybody can Apply.

The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to grandmother's time. She used it to keep her hair beautifully dark, glossy and attractive. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect.

But brewing at home is messy and out-of-date. Nowadays, by asking at any drug store for a bottle of "Wyeth's Sage and Sulphur Compound," you will get this famous old preparation, improved by the addition of other ingredients, which can be depended upon to restore natural color and beauty to the hair.

A well-known downtown druggist says it darkens the hair so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through your hair, taking one strand at a time. By morning the gray hair disappears, and after another application or two, it becomes beautifully dark and glossy.—Adv.

A Fixed Listener.

She—Look at that sour-faced old maid who has been sitting in one place trying to find out what the couples coming near her are saying. Isn't she a regular sport-spoiling wallflower?

He—I would call her rather a rubber plant.

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots. Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.—Adv.

The Contrast.

"My dear, the coal and flour are all out."

"Can't help it, Maria; I'm all in."

Watch Cuticura Improve Your Skin.

On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful sometimes what Cuticura will do for poor complexions, dandruff, itching and red rough hands.—Adv.

The milk of human kindness would be a good deal richer if it weren't skimmed so often.

When Baby is Teething GROVE'S BABY BOWEL MEDICINE will correct the stomach and bowel troubles. Perfectly harmless. See directions on the bottle.

Only the fool depends on what may possibly happen.

In The Spring-Time.

Any fool knows enough to carry an umbrella when it rains, but the wise man is he who carries one when it is only cloudy. Any man will send for a doctor when he gets bedfast, but the wiser one is he who adopts proper measures before his ills become serious.

During a hard winter or the following spring one feels rundown, tired out, weak and nervous. Probably you have suffered from colds or influenza which has left you thin, weak and pale. This is the time to put your system in order. It is time for house-cleaning.

A good, old-fashioned alterative and temperance tonic is one made of wild roots and barks without the use of alcohol, and called Dr. Pierce's Golden Medical Discovery, in tablet or liquid form. This is nature's tonic, which restores the tone of the stomach, activity of the liver and steadiness to the nerves, strengthening the whole system.

Richmond, Va.—"I just was like a worn-out piece of machinery from overwork and long hours, and was sore from my toes up. I suffered with shortness of breath and a very numb feeling in my chest. I went to see a doctor but without relief. My mother asked if I would try 'Golden Medical Discovery.' After taking one bottle I felt so much improved that I took the second. That was two months ago and I have not felt ill since."—F. C. Fischer, 2302 E. Marshall St.
