

The Greatest Name in Good-Land

The largest-selling gum in the world naturally has to have a package worthy of its contents.

So look for WRIGLEY'S in the sealed package that keeps all of its goodness in. That's why The Flavor Lasts!

Grow Wheat in Western Canada

One Crop Often Pays for the Land

Western Canada offers the greatest advantages to home seekers. Large profits are assured. You can buy on easy payment terms.

Fertile Land at \$15 to \$30 per Acre—land similar to that which through many years has averaged from 20 to 45 bushels of wheat to the acre. Hundreds of cases are on record where in Western Canada a single crop has paid the cost of land and production. The Governments of the Dominion and Provinces of Manitoba, Saskatchewan and Alberta want the farmer to prosper, and extend every possible encouragement and help to Grain Growing and Stock Raising.

Though Western Canada offers land at such low figures, the high prices of grain, cattle, sheep and hogs will remain.

Loans for the purchase of stock may be had at low interest; there are good shipping facilities; best of markets; free schools; churches; splendid climate; low taxation (come on improvements).

For particulars as to location of lands for sale, maps, illustrated literature, reduced railway rates, etc., apply to Dept. of Immigration, Ottawa, Can., or F. A. Harrison, 210 North Third St., Harrisburg, Pa. Canadian Government Agent

CLUB WORK WILL START BOY ON ROAD TO SUCCESS IN PRODUCTION OF BEST POULTRY

A Meeting of a Typical Poultry Club.

(Prepared by the United States Department of Agriculture.)

That organized agricultural club work among boys and girls is something more than a contest which ends with the season, but a continuous, constructive piece of work which eventually leads the club members into the business of farming and home making is illustrated by the accomplishments of a poultry club member in Vermont.

Work of Vermont Boy.

In 1912 John Alexander joined the Vermont Poultry club in spite of the opposition of members of his own family, and, in a number of instances, discouraging words from friends and neighbors who did not understand what club work meant to the American boy. He started with only a few settings of eggs, but two years later he was well on the road to success, for he had become the champion in his county in club work, having produced the best grade of birds and the most profit from his investment. In 1914 he exhibited some of his birds at the

county fair, the poultry show and the state fair, and succeeded in winning a number of ribbons and first prizes. The following year he became the champion poultry club member of his state and was sent to New York city to the National Education association to tell how he did his work and what he thought of it. The following year he again won the state championship.

Reputation Spread.

By this time his reputation in the poultry industry had spread to other states and he was selling settings of eggs throughout New England direct to consumers, and had built up a trade in the sale of birds for breeding purposes.

One year later, in 1917, he started out with a business of his own, using his own business cards, his own business stationery, and expanding his poultry plant two-fold. He became manager not only of his own poultry plant, which he developed rapidly, but found time to take a position as superintendent of the poultry farm at one of the state institutions.

WAY TO KEEP COUNTY ORGANIZATION ALIVE

Too Many Activities Are Liable to Result in Failure.

Some of Projects to Be Undertaken Include Road Improvement, Agricultural Fairs, Improved Breeds of Stock, Etc.

(Prepared by the United States Department of Agriculture.)

One important thing to be borne in mind is that no organization will continue to exist that does not have some definite plan of work and some definite purpose to accomplish. It should be remembered, however, that too many activities may result in failure. A few well-defined policies or purposes successfully carried to conclusion will mean permanency and success for these organizations. Those responsible for the county organization should lay their plans well into the future, and keep interest in the various local clubs active. Road improvement, county agricultural fairs, rural telephone systems, improved or consolidated schools, vocational education, standardized cotton and corn for the county, improved breeds of live stock especially adapted to local conditions, co-operative marketing, public entertainments, and social welfare are some of the projects being undertaken by county organizations. It is not believed to be advisable for a county to undertake more than two or three of these at a time, at least not the first season.

Whatever is undertaken should be done well before new projects are launched. Get the movement well under way and it will be carried forward by its own momentum. The hard work will come at the start. After it is started all you will have to do will be to direct it into the proper channels.

WATER SUPPLY IS IMPORTANT

There Should Be Plenty for Home and Barn and It Should Be as Handy as Possible.

The water supply is very important. Not only should there be plenty of water for the home and the barn, but it should be convenient. Why not put in a system of water pipes and put water under pressure in the house and barn? You will find it so satisfactory that you are likely to wonder how you managed to get along without water handy.

PLANT COWPEAS WITH CORN

Nothing to Equal Them for Fattening or More Economical—Excellent for Horses.

In planting cowpeas with corn they are used mostly for pasture, especially for hogs. It is a question if anything is equal to them for fattening, or more economical. When properly cured for hay there is nothing better than cowpeas for dairy cows, and they also make excellent feed for horses. They are fine for silo, mixed with corn, but for this the running kinds, having the most foliage, are preferred.

SELECTION OF BEST VARIETIES OF SEED

Importance Is Indicated in Number of Experiments.

Variation of Yields Found at Different Western Stations With Wheat, Oats and Barley—Results of Experiments.

(Prepared by the United States Department of Agriculture.)

The importance of selecting a crop variety that is suited to the section in which it is grown is indicated in a number of variational experiments conducted at various field stations last year. In co-operative experiments at the Dickinson substation, North Dakota, a number of varieties of common wheat grown under similar conditions produced yields which varied from 19.4 bushels an acre to 11.3 bushels. The variations in yields of varieties of durum wheat were from 20.2 bushels an acre to 13.2 bushels. A wide variation was obtained in similar experiments with oats, the range being from 49.5 bushels an acre to 19.5 bushels. Barley showed a variation which ranged from 23.6 bushels an acre to 9.7 bushels.

At the Cheyenne field station in Wyoming variational experiments with winter wheat gave yields which ranged from an average of 35.5 bushels an acre to 28.4 bushels; with spring wheat, 41.2 bushels to 15.5 bushels; with oats, 79.6 bushels to 37.8 bushels; with barley, 73.1 bushels to 41.4 bushels.

At the Nephi substation, in Utah, co-operative results with varieties of winter wheat showed a variation ranging from 23.3 bushels an acre to 2.2 bushels, and with spring wheat from 15.7 bushels to 6.3 bushels.

Similar experiments conducted in California with wheat showed a variation in yield ranging from 50 bushels an acre to 12.5 bushels. In a series of years the average yields of varieties usually do not vary so widely as these yields of a single year, but it is generally found that certain varieties give better average yields than others and are therefore more profitable.

MAKE WAR ON INSECT PESTS

Rubbish, Fence Corners, Hedge Rows and Accumulations of Vegetation Should Be Cleaned Up.

(Prepared by the United States Department of Agriculture.)

During spring much may be accomplished in the control of certain insects affecting cereal and forage crops. Many of these insects spend the winter in rubbish, in fence corners, along hedge rows, and in accumulations of dried vegetation. For this reason these should be thoroughly cleaned up and burned in order to kill the insects hiding therein.

In the upper Mississippi basin west of the river grasshopper eggs are frequently laid in large numbers along ditch banks, in check rows, and in other limited uncultivated areas where they may be destroyed by disking thoroughly during the winter months. This method should be followed for destroying the eggs.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it. A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

HOW CAN YOU TELL YOUR FAVORITE TOBACCO?

As Plain as the Nose on Your Face—Just Smell It

Smokers do not have to put tobacco in their pipes to find out if they like it. They can just rub the tobacco between the palms of their hands and smell it. The nose is an infallible guide to smoking enjoyment.

All smoking tobaccos employ some flavoring "to improve the flavor and burning qualities of the leaves", to quote the Encyclopedia Britannica. Naturally, there is considerable difference in the kind of flavorings used, and the nose quickly detects this difference. TUXEDO Tobacco uses the purest, most wholesome, and delicious of all flavorings—chocolate. And the almost universal liking for chocolate in a great measure explains the widespread popularity of TUXEDO Tobacco.

Carefully aged, old Burley tobacco, plus a dash of pure chocolate, gives TUXEDO Tobacco a pure fragrance your nose can quickly distinguish from any other tobacco. Try it and see.

Army Supplies Not Exports.

By those who use the export statistics of this country, it is important to know that the reports of exports do not include supplies carried on army and navy transports for use of our expeditionary forces abroad. However, supplies carried on vessels other than those mentioned or sent abroad by the Red Cross or other agencies are included in the domestic exports of the country.

A Born Talker.

Mrs. Benham—Money talks. Benham—You seem to have been born with money.

When Baby Is Teething GIBBER'S BABY BOWEL MEDICINE will soothe the stomach and bowel troubles. Perfectly harmless. See directions on the bottle.

It isn't what a man doesn't know that worries him, but what he knows others know he doesn't know.

If your eyes smart or feel scalded, Roman Eye Balsam applied upon going to bed is just the thing to relieve them. Adv.

An unbridled passion sometimes leads to the halter.

A "Close-Up"

Swift & Company's Profit of 2.04 cents on each dollar of sales

12.96% Expenses Labor, Freight, Etc.

85% To Stock Raiser

Profit 2.04% Nearly half of this profit was used to pay taxes and interest on borrowed money.

85% To Stock Raiser

The diagram at the top shows the distribution of the average Swift dollar received from sales of beef, pork and mutton, and their by-products, during 1918. The magnifying glass brings out the distribution of the 2.04 cents profit per dollar of sales:

- .94 of one per cent goes to pay interest on borrowed money, taxes, etc.
- .50 of one per cent goes to pay dividends to shareholders.
- .60 of one per cent remains in the business to help in improving and financing the business.

Total 2.04 per cent

AS YOUNG AS YOUR KIDNEYS

The secret of youth is ELIMINATION OF POISONS from your body. This done, you can live to be a hundred and enjoy the good things of life with as much "pep" as you did when in the springtime of youth. Keep your body in good condition, that's the secret.

Watch the kidneys. They filter and purify the blood, all of which blood passes through them once every three minutes. Keep them clean and in proper working condition and you have nothing to fear. Drive the poisonous wastes and deadly uric acid accumulations from your system. Take GOLD MEDAL Haarlem Oil Capsules and you will always be in good condition. You will feel strong and vigorous, with steady nerves and elastic muscles. GOLD MEDAL Haarlem Oil Capsules are imported direct from the laboratories at Haarlem, Holland.

They are a reliable remedy which has been used by the sturdy Dutch for over 200 years, and has helped them to develop into one of the strongest and healthiest races of the world. Get them from your druggist. Do not take a substitute. In sealed packages—three sizes.—Adv.

Bragley's Line of Talk.

"Bragley says his new home is heated with hot air." "Then it is well heated. I've heard Bragley talk."

Your Eyes

A Wholesome, Cleansing, Refreshing and Healing Lotion—Murine for Redness, Soreness, Granulation, Itching and Burning of the Eyes or Eyelids.

"I Drop" After the Movies, Hysteria or Golf will win your confidence. Ask your Druggist for Murine when your Eyes Need Care.

Murine Eye Remedy Co., Chicago
