

On a warm day there's no more refreshing luncheon than Libby's Veal Loaf, chilled and sliced! So easy, too. Ask your grocer for a package today.

Libby, McNeill & Libby, Chicago

**Kill Dandruff With Cuticura**  
All druggists. Soap 25, Ointment 25 and 50. Cuticura, Dept. X, Boston.

**Every Woman Wants Paxtine**  
ANTISEPTIC POWDER  
FOR PERSONAL HYGIENE  
Dissolved in water for douches stops pelvic catarrh, ulceration and inflammation. Recommended by Lydia E. Pinkham Med. Co. for ten years. A healing wonder for nasal catarrh, sore throat and sore eyes. Economical. Has extraordinary cleansing and germicidal power. Sample Free. 50c. All druggists, or postpaid by mail. The Paxtine Toilet Company, Boston, Mass.

**DAISY FLY KILLER**  
PLACED ANYWHERE ATTRACTS AND KILLS ALL FLIES. Neat, clean, ornamental, convenient, cheap. Lasts all season. Made of molasses, and is safe for all insects. Guaranteed effective. Sold by dealers, or by EXPRESS, prepaid, 45c. HAROLD SUMERS, 149 E. Kalle Ave., Brooklyn, N. Y.

**Everything Lovely.**  
"Howdy, Gap!" saluted an acquaintance, upon meeting the well known Rumpus Ridge citizen on a shopping expedition in Tumbleville. "How's everything going with you?"  
"Finer'n frog hair, Jurd!" triumphantly replied Gap Johnson. "Of course, my wife has been sorter puny, yar of late, and several of the children have got the measles and mumps and one thing and another, and the lightning struck the corner of the house tuther night and like to have tore the whole place to pieces, and one of the kids fell out of a tree and broke his arm, and a feller took a shot at me day before yesterday and ventilated my ear, and such as that, but I swapped for a running horse last week, and a couple of my hounds have got six pups apiece. Aw, I tell you, they can't keep a good man down!"—Kansas City Star.

**Well Known.**  
I was hurrying home up the hill when a little boy came rushing down in such haste that he ran headlong into me. He was quite breathless and very flushed.  
"Have you seen my pa?" he managed to stammer.  
"I don't know your pa, little boy," said I.  
He looked at me in round-eyed wonder and his pink cheeks fairly stuck out.  
"You don't know my pa?" he said incredulously. "Why, I know pa just as easy!"—Exchange.

**Brighten the Morning Meal**  
with a hot drink that gives refreshing invigoration.

**The Original POSTUM CEREAL**  
is so pleasing and satisfying that it has completely taken the place of tea and coffee in many homes everywhere.

Try this healthful Drink and note results.

Two sizes, usually sold at 15c and 25c.

At Grocers Everywhere!

**SAVE LABOR IN GROWING BEETS**

Use of More Horses and Larger Implements Reduces Work of Farm Laborers.

**COMPARISON OF PLOW CREWS**

Approximately One Hour an Acre Less of Man Labor is Necessary to Operate Plow Drawn by Three Horses Than by Two.

(Prepared by the United States Department of Agriculture.)

Many farmers are solving the labor problem by using larger implements and more horses. Such practices have enabled sugar-beet growers greatly to reduce their expenses for man labor and increase their operations. The normal man labor required in growing sugar beets will vary from 80 to 135 hours or more an acre.

Under average conditions, where more horses and larger implements are used, the man labor on machine operations will be reduced approximately 25 per cent.

A direct comparison of plowing crews in Michigan and Ohio, where conditions under which the work is done are uniform, shows that approximately one hour an acre less of man labor is necessary to operate a plow drawn by three horses than by two. With the larger outfit, as also when a tractor is used, a float or plank can be attached to the plow, and thus the breaking of a cloddy surface can be done with little additional effort or cost. In disking in the Michigan and Ohio districts it was found that a four-horse outfit saves one-quarter of an hour of man labor an hour over the two-horse equipment.

**Saving in Sugar Beets.**

Cultivation of sugar beets furnishes a striking contrast in crew efficiency. In Michigan and Ohio it was found that 1.9 man-hours an acre were required to cultivate once over with a one-row implement, 1.6 man-hours with a two-row cultivator, and only .9 of a man-hour for a four-row cultivator—a distinct saving in man labor by using the four-row machine. As many fields require attention before it is possible for the grower to get the work accomplished, any saving of labor and time is an advantage to the growing crops and affords more man labor for crops competing with the sugar beet in the distribution of labor.

Under average conditions a crew of one man and two horses working continuously will lift approximately 1½ acres of beets a day. A crew of one man and four horses will probably increase this area to two acres, or possibly 2½ acres a day under favorable conditions. The performance of the lifting implement can be improved still further with the addition of more horse power. If, by using an extra horse on the lifter, this work can be performed in a shorter period, more time will be available for hauling the beets to the factory or loading station.

**Harvesters Mean Further Economy.**  
An appreciable saving in farm labor will undoubtedly be accomplished through the development of mechanical harvesters. The hand labor on sugar beets, comprising such operations as blocking, thinning, hoeing, pulling, topping and loading, constitutes from 52 to 75 per cent of the total man labor required in growing the crop. The pulling, topping and loading, when combined, make up 24 to 42 per cent of the work. Estimates made by several growers show a variation of 24 to 30 hours in the labor requirement for the hand work in harvesting. It is very apparent, says the bulletin, that this amount can be reduced to a few hours an acre with the introduction of the mechanical harvester.

**SOY BEAN IMPORTANT CROP**

Has High Protein Value and May Be Fed to Advantage With Less Nitrogenous Crops.

(Prepared by the United States Department of Agriculture.)

The soy bean has an important place among soiling crops. Having a high protein value, the crop may be fed to good advantage with less nitrogenous crops, such as corn, sorghum, su-

A Field of Soy Beans.

dan grass, and millet. The great variation in the time of maturity of the different varieties of soy beans or the planting of the same variety at different dates will make it possible to have a succession of green forage throughout the greater part of the summer and fall. When the crop has become well established it grows well during drought and often succeeds where other crops fail.

**CULTIVATION NEEDED IN CORN PRODUCTION**

Object Is to Promote Early Growth and Development.

Methods Will Vary to Meet Requirements of Planting—Prevent Weeds From Robbing Soil of Moisture and Fertility.

(Prepared by the United States Department of Agriculture.)

Approximately 100,000,000 acres of corn in the United States are annually given two or more cultivations. Cultivation is considered essential in the corn production. The general purpose of cultivation is to promote the early growth and later development of the corn plant. The usual type of cultivation is sometimes modified to meet special conditions, such as retarding the vegetative growth of the plant by cutting the corn roots in early cultivation. The kind of cultivation will also vary to some extent to meet the requirements of different methods of planting.

Some of the most successful corn growers begin their cultivation before they plant their crop. They claim that a deep cultivation of the soil at this time is of as much value as later cultivations. It causes the soil to warm more quickly, destroys early weed growth, and incorporates the vegetable matter more thoroughly into the soil.

Corn is cultivated to prevent weeds from robbing the corn of soil moisture and fertility, to put the surface in the best condition to absorb rainfall, to warm the soil by drying its surface quickly, and to save moisture by checking the capillary rise to the soil surface.

Corn should be cultivated often enough to keep down the weeds and to maintain a loose soil muleh until the crop has attained its growth. To satisfy this end a greater number of cultivations will be necessary when rains at intervals of a week or so cause the surface soil to run together and crust. This crust must be broken and

Cultivation is Essential in the Production of Corn.

the soil mulch restored or excessive run-off and evaporation will soon rob the crop of much-needed moisture. Promptness in restoring the soil mulch after each rain is of great importance. This work can be rapidly and less expensively performed by use of double cultivators widened, and by driving astride each alternate row, as by this practice the mulch is restored in half the time necessary to drive astride of every row.

Corn should not be cultivated so long as the soil mulch is in good condition and free of weeds. Corn should not be cultivated when the soil turns up in clods, breaking the corn roots and permitting the soil to dry out to a greater depth than it would if not cultivated.

**HAY CROPS FOR LIVE STOCK**

Many Farmers Unmindful of Necessity of Providing for Fall and Winter Feeding.

(Prepared by the United States Department of Agriculture.)

The high price of rough feed emphasizes the necessity of all farmers planting a sufficient acreage of summer forage crops to enable them to provide themselves with hay and other roughages for their live stock during the coming year. With the abundance of pasture available in the springtime farmers oftentimes are unmindful of the necessity of providing for that period during the fall when pasture will be dry, or during the winter when there will be no feed available.

The county agents should be consulted with reference to the availability of seed. Where outside purchases have to be made the order should be placed at once, so that the seed may be on hand to sow when the soil is in good condition and the season is not too far advanced.

Among the several summer hay crops for the Southwest sorghum or Sudan grass are undoubtedly in most favor. In the southeastern territory sorghum and cowpeas, planted any time before the first of July, will mature a great abundance of good quality rough feed for mules or cattle. The county agents should be consulted with reference to best crops for local conditions, method of planting and quantity of seed per acre to be used in different localities.

**BUDHA IN PLACE OF GOD**

Eastern Leader's Shrewd Attempt to Stem the Onward March of Christianity in East.

Yinnanika was a strong Buddhist and a leader in the movement to revive and reform Buddhism and establish it as a bulwark against the rapid encroachment of Christianity.

He decided an excellent way to do this was to found a school for girls which would be more attractive than the Christian women's. So he erected the buildings and installed modern methods. He hired good teachers. All the paraphernalia of the best western schools was taken over. In fact, the curriculum was about as close as it could be to that of the Christian school not far away. Buddhism was a prominent feature of the institution—not the old-fashioned Buddhism, but the new form which has borrowed from Christianity, even down to the Sunday school hymns. The girls were taught to sing the famous old Christian hymns with only the word Buddha substituted for that of Christ.

**"FAKE" ASPIRIN WAS TALCUM**

Always Ask for Genuine "Bayer Tablets of Aspirin"

If you see the "Bayer Cross" on the package you are sure you are not getting talcum powder. Millions of fraudulent Aspirin Tablets were recently sold throughout the country. Aspirin is the trade mark of Bayer Manufacture of Monacatecacidester of Salicylicacid.

**Von Zeppelin's Career.**

Count von Zeppelin, inventor of the airship which bears his name, was not killed in the war, but died of pneumonia at Charlottenburg, near Berlin, on March 8, 1917. He was born in 1838 and was a lieutenant of cavalry at the age of twenty-five, when, in April, 1863, he was sent to the United States as Prussian military attaché of the Union army in the Civil war, being attached to the Army of the Mississippi, in which Gen. Carl Schurz commanded a brigade. It was at that time that Count von Zeppelin had his first experience as an aeronaut, going up in a captive balloon belonging to the corps to which he was attached.

To Purify and Enrich the Blood  
Take GROVE'S TABLETS. CHIN TONIC which is simply IRON and QUININE suspended in Syrup. So Pleasant Even Children Like It. You can soon feel its strengthening, invigorating effect. Price 50c.

**Fixing Up.**  
"Why the clean collar in such a hurry?"  
"Gotta see my girl in a minute or two."  
"But your shoes need polishing."  
"She can't see my shoes."  
"Tuh?"  
"She lives in one of these little booths in front of a picture theater. We talk through the window."—Louisville Courier-Journal.

**The Traders.**  
Erna Winrow—I hear you swapped automobiles with Si Skinner yesterday. Who got the wust of the bargain, H1?  
H1 Huskins—W-a-a-l-l, the one I got thrust on me is sufferin' horribly from ague, an' balks quite a lot 'count you missin' on each and every cylinder off an' on, but I heard this mornin' that Si is huntin' fer the justice who'll place in order to swear out a warrant fer somebody.—Buffalo Express.

If your eyes smart or feel ached, Roman Eye Balsam applied upon going to bed is just the thing to relieve them. Adv.

**Harmony in Squeaks.**  
Bacon—Did you go to Miss Screech's concert at the church?  
Egbert—I did. I went in while she was singing, and my new shoes squeaked something awful.  
Bacon—Too had to create any discord.  
Egbert—Discord nothing! The squeak of my shoes just harmonized with her voice.

**COULDN'T SLEEP**

Was Miserable and Losing Weight Suffering From Kidney Complaint. Doan's Removed the Trouble.

"I was about down and out from kidney trouble," says Harry Griffith, of 228 N. Darlington St., Westchester, Pa. "The kidney secretions burned like scalding water. Sometimes there would be a complete stoppage and, oh! what pain I suffered! My feet became swollen and I had a time of it getting on my shoes."

"My back hurt right over my kidneys. Nights I did nothing but toss about. It was just as though a knife were thrust into my back. I couldn't bend over without terrible pain and I would fall to my knees and crawl along to get hold of something to help myself up. Binding dizzy spells came on and terrible headaches added to my misery. "I was rapidly losing weight and knew something would have to be done. I began taking Doan's Kidney Pills and was more than surprised. The troubles were soon leaving me and six boxes of Doan's Kidney Pills cured me entirely. To this day I have been free from kidney complaint."

**Stock Raising in Western Canada**  
is as profitable as Grain Growing

In Western Canada Grain Growing is a profit maker. Raising Cattle, Sheep and Hogs brings certain success. It's easy to prosper where you can raise 20 to 40 bu. of wheat to the acre and buy on easy terms.

**Land at \$15 to \$30 Per Acre—Good Grazing Land at Much Less.**

Railway and Land Companies offer unusual inducements to homesteaders to settle in Western Canada and enjoy her prosperity. Loans made for the purchase of stock or other farming requirements can be had at low interest.

The Governments of the Dominion and Provinces of Manitoba, Saskatchewan and Alberta extend every encouragement to the farmer and ranchman. You can obtain excellent land at low prices on easy terms, and get high prices for your grain, cattle, sheep and hogs—low taxes (none on improvements), good markets and shipping facilities, free schools, churches, splendid climates and sure crops.

For Illustrated literature, maps, description of lands for sale in Manitoba, Saskatchewan and Alberta, reduced railroad rates, etc., apply to Superintendent of Immigration, Ottawa, Canada.
